Cases with  denotes a case that emphasizes a country, cases with  denotes a case that emphasizes an industry or company.

Preface xxiv

About the Authors xl

## • PART ONE: BACKGROUND FOR INTERNATIONAL BUSINESS 1

### 1 Globalization and International Business 1

 **CASE:** The Globalized Business of Sports 2

Introduction 5

How Does *International Business* Fit In? 5

The Forces Driving Globalization 6

Factors in Increased Globalization 7

The Costs of Globalization 12

Threats to National Sovereignty 13

Environmental Stress 13

Growing Income Inequality and Personal Stress 14

 **Point-Counterpoint**  
Is Offshoring Good Strategy? 14

Why Companies Engage in International Business 16

Expanding Sales 17

Acquiring Resources 17

Reducing Risk 17

Modes of Operations in International Business 18

Merchandise Exports and Imports 18

Service Exports and Imports 18

Investments 19

Types of International Organizations 19

Why International Business Differs from Domestic Business 20

Physical and Social Factors 20

The Competitive Environment 22

 **Looking to the Future**  
Three Ways of Looking at Globalization 23

 **CASE:** Carnival Cruise Lines 24

Summary 29

Key Terms 29

Endnotes 30

An Atlas	32
Map Index	40
• <b>PART TWO: COMPARATIVE ENVIRONMENTAL FRAMEWORKS</b>	<b>45</b>
<b>2 The Cultural Environments Facing Business</b>	<b>45</b>
 <b>CASE: Saudi Arabia's Dynamic Culture</b>	46
Introduction	50
The People Factor	50
Cultural Awareness	51
A Little Learning Goes a Long Way	52
The Idea of a "Nation": Delineating Cultures	53
The Nation as a Point of Reference	53
How Cultures Form and Change	53
Sources of Change	53
Language as Both a Diffuser and Stabilizer of Culture	54
Why English Travels So Well	56
Religion as a Cultural Stabilizer	57
Behavioral Practices Affecting Business	58
Issues in Social Stratification	58
 <b>Does Geography Matter?</b>	
Birds of a Feather Flock Together	59
Work Motivation	61
Relationship Preferences	64
Risk-Taking Behavior	65
Information and Task Processing	66
Communications	67
Spoken and Written Language	67
Silent Language	69
Dealing with Cultural Differences	70
Host Society Acceptance	70
Degree of Cultural Differences	71
Ability to Adjust: Culture Shock	71
Company and Management Orientations	72
Strategies for Instituting Change	73
 <b>Point-Counterpoint</b>	
Does International Business Lead to Cultural Imperialism?	73
 <b>Looking to the Future</b>	
What Will Happen to National Cultures?	76
 <b>CASE: Tesco PLC: Leveraging Global Knowledge</b>	78

Summary	83
Key Terms	83
Endnotes	84

### 3 The Political and Legal Environments Facing Business 87

**CASE:** China—Complicated Risks, Big Opportunities 88

Introduction 91

The Political Environment 92

Individualism Versus Collectivism 93

Individualism 93

Collectivism 94

Political Ideology 94

Spectrum Analysis 95

Democracy 96

Totalitarianism 97

The Standard of Freedom 98

Trends in Political Ideologies 99

Engines of Democracy 100

Democracy: Recession and Retreat 101

Authoritarianism's Surge 103

**Looking to the Future**

Political Ideology and MNEs' Actions 104

Political Risk 106

Classifying Political Risk 107

Classes and Characteristics of Political Risks 107

**Point-Counterpoint**

Proactive Political Risk Management: The Best Approach 109

The Legal Environment 111

Types of Legal Systems 112

Trends in Legal Systems 113

Implications for Managers 115

The Confound of Democracy's Retreat 115

Which Rule When? 116

Legal Issues in International Business 118

Operational Concerns 118

A Key Relationship: Wealth and Regulation 120

Strategic Concerns 121

Country Characteristics 121

Product Safety and Liability 122

Legal Jurisdiction	122
Intellectual Property	122
<b>The Basis of Political and Legal Differences</b>	<b>123</b>
Historical Legacies	123
Economic Circumstances	124
Cultural Orientation	124
The Potential for Cross-National Convergence	125
 <b>CASE: It's a Knockoff World</b>	126
Summary	129
Key Terms	130
Endnotes	130
<b>4 The Economic Environments Facing Businesses</b>	<b>137</b>
 <b>CASE: The Comeback Accelerates</b>	138
Introduction	142
New Markets, New Perspectives	142
International Economic Analysis	145
 <b>Does Geography Matter?</b>	
Consequence of Change in Arctic Sea Ice	146
Economic Freedom	147
Economic Freedom Today	148
The Value of Economic Freedom	149
Trends in Economic Freedom	149
Types of Economic Systems	152
Market Economy	152
Command Economy	153
Mixed Economy	154
 <b>Looking to the Future</b>	
State Capitalism: Detour or Destination?	155
Assessing Economic Development, Performance, and Potential	157
Measures of Economic Performance	158
Adjusting Analytics	159
Performance and Potential: Alternative Interpretations	162
 <b>Point-Counterpoint</b>	
Growth: Positive and Productive	165
Economic Analysis	167
Inflation	167
Unemployment	168
Debt	169

Income Distribution	169
Poverty	170
The Balance of Payments	173
Elaborating Economic Analysis with Global Indices	173
 <b>CASE: The BRICs: Vanguard of the Revolution</b>	175
Summary	180
Key Terms	180
Endnotes	181
• <b>PART THREE: THEORIES AND INSTITUTIONS: TRADE AND INVESTMENT</b>	<b>187</b>
<b>5 International Trade and Factor-Mobility Theory</b>	<b>187</b>
 <b>CASE: Costa Rica's Trade Evolution</b>	188
Introduction	191
Laissez-Faire Versus Interventionist Approaches to Exports and Imports	191
Theories of Trade Patterns	192
Trade Theories and Business	192
Factor-Mobility Theory	192
Interventionist Theories	193
Mercantilism	193
Neomercantilism	194
Free-Trade Theories	194
Theory of Absolute Advantage	194
Theory of Comparative Advantage	197
Theories of Specialization: Some Assumptions and Limitations	198
Trade Pattern Theories	200
How Much Does a Country Trade?	200
What Types of Products Does a Country Trade?	201
With Whom Do Countries Trade?	204
 <b>Does Geography Matter?</b>	
Variety Is the Spice of Life	205
The Statics and Dynamics of Trade	206
Product Life Cycle (PLC) Theory	206
The Diamond of National Competitive Advantage	208
Factor-Mobility Theory	210
 <b>Point-Counterpoint</b>	
Should Nations Use Strategic Trade Policies?	211

Why Production Factors Move	213
Effects of Factor Movements	214
The Relationship Between Trade and Factor Mobility	216
 <b>Looking to the Future</b>	
In What Direction Will Trade Winds Blow?	218
  <b>CASE: Ecuador: A Rosy Export Future?</b>	220
Summary	225
Key Terms	226
Endnotes	226
<b>6 Governmental Influence on Trade</b>	<b>229</b>
 <b>CASE: The U.S.-Vietnamese Catfish Dispute</b>	230
Introduction	233
Conflicting Results of Trade Policies	233
The Role of Stakeholders	233
Economic Rationales for Governmental Intervention	234
Fighting Unemployment	234
Protecting “Infant Industries”	235
Developing an Industrial Base	236
Economic Relationships with Other Countries	237
Noneconomic Rationales for Government Intervention	240
Maintaining Essential Industries	240
Promoting Acceptable Practices Abroad	240
  <b>Point-Counterpoint</b>	
Should Governments Impose Trade Sanctions?	242
Maintaining or Extending Spheres of Influence	243
Preserving National Culture	244
Instruments of Trade Control	244
Tariffs	244
Nontariff Barriers: Direct Price Influences	245
Nontariff Barriers: Quantity Controls	247
Dealing with Governmental Trade Influences	250
Tactics for Dealing with Import Competition	250
Convincing Decision Makers	250
Involving the Industry and Stakeholders	251
Preparing for Changes in the Competitive Environment	251
 <b>Looking to the Future</b>	
Dynamics and Complexity	251
 <b>CASE: U.S.-Cuban Trade: When Does a Cold War Strategy Become a Cold War Relic?</b>	252

Summary	256
Key Terms	256
Endnotes	256

## 7 Cross-National Cooperation and Agreements 259

**CASE:** Toyota's European Drive 260

Introduction 262

The World Trade Organization—Global Integration 263

GATT: Predecessor to the WTO 263

What Does the WTO Do? 264

The Rise of Bilateral Agreements 265

Regional Economic Integration 266

Geography Matters 266

The Effects of Integration 267

Major Regional Trading Groups 269

The European Union 269

The North American Free Trade Agreement (NAFTA) 275

Regional Economic Integration in the Americas 278

**Point-Counterpoint**

Is CAFTA-DR a Good Idea? 280

Regional Economic Integration in Asia 282

Regional Economic Integration in Africa 284

Other Forms of International Cooperation 285

Commodity Agreements 286

Commodities and the World Economy 286

Consumers and Producers 286

The Organization of the Petroleum Exporting Countries (OPEC) 287

**Looking to the Future**

Will the WTO Overcome Bilateral and Regional Integration Efforts? 289

**CASE:** Walmart Goes South 290

Summary 294

Key Terms 295

Endnotes 295

## • PART FOUR: WORLD FINANCIAL ENVIRONMENT 297

## 8 Global Foreign-Exchange Markets 297

**CASE:** Going Down to the Wire in the Money-Transfer Market 298

Introduction 300

What Is Foreign Exchange? 301

Players on the Foreign-Exchange Market 301

How to Trade Foreign Exchange	303
Some Aspects of the Foreign-Exchange Market	303
Global OTC Foreign Exchange Instruments	303
Size, Composition, and Location of the Foreign-Exchange Market	304
 <b>Does Geography Matter?</b>	
Foreign-Exchange Trades and Time Zones	307
Major Foreign-Exchange Markets	309
The Spot Market	309
The Forward Market	310
Options	311
Futures	311
The Foreign-Exchange Trading Process	311
Banks and Exchanges	312
Top Exchanges for Trading Foreign Exchange	314
How Companies Use Foreign Exchange	314
Business Purposes (I): Cash Flow Aspects of Imports and Exports	315
Business Purposes (II): Other Financial Flows	316
 <b>Point-Counterpoint</b>	
Is it OK to Speculate on Currency?	317
 <b>Looking to the Future</b>	
Where Are Foreign-Exchange Markets Headed?	319
 <b>CASE: Do Yuan to Buy Some Renminbi?</b>	320
Summary	325
Key Terms	326
Endnotes	326

## 9 The Determination of Exchange Rates 329

 <b>CASE: El Salvador Adopts the U.S. Dollar</b>	330
Introduction	332
The International Monetary Fund	332
Origin and Objectives	332
The IMF Today	333
The Global Financial Crisis and the IMF	334
Evolution to Floating Exchange Rates	334
Exchange-Rate Arrangements	335
Three Choices: Hard Peg, Soft Peg, or Floating Arrangement	337
Hard Peg	338
Soft Peg	338
Floating Arrangement	338
The Euro	339
Pluses and Minuses of the Conversion to the Euro	340

 <b>Point-Counterpoint</b>	
Should Africa Develop a Common Currency?	342
<b>Determining Exchange Rates</b>	343
Nonintervention: Currency in a Floating-Rate World	343
Intervention: Currency in a Fixed-Rate or Managed Floating-Rate World	344
 <b>CASE: The U.S. Dollar and the Japanese Yen</b>	345
Black Markets	347
Foreign-Exchange Convertibility and Controls	347
Exchange Rates and Purchasing Power Parity	349
Exchange Rates and Interest Rates	352
Other Factors in Exchange-Rate Determination	353
<b>Forecasting Exchange-Rate Movements</b>	353
Fundamental and Technical Forecasting	354
Fundamental Factors to Monitor	354
<b>Business Implications of Exchange-Rate Changes</b>	355
Marketing Decisions	355
Production Decisions	355
Financial Decisions	356
 <b>Looking to the Future</b>	
Changes in the Relative Strength of Global Currencies	356
 <b>CASE: Welcome to the World of Sony—Unless the Falling Yen Rises Again</b>	357
<b>Summary</b>	362
<b>Key Terms</b>	363
<b>Endnotes</b>	363

## 10 Global Capital Markets 365

 <b>CASE: GPS: In the Market for an Effective Hedging Strategy?</b>	366
<b>Introduction</b>	369
<b>The Finance Function</b>	370
The Role of the CFO	371
<b>Capital Structure</b>	371
Leveraging Debt Financing	371
Factors Affecting the Choice of Capital Structure	372
Debt Markets as a Means of Expansion	374
<b>Global Capital Markets</b>	374
Eurocurrencies and the Eurocurrency Market	374
International Bonds	376
Equity Securities	378
The Size of Global Stock Markets	379

Taxation of Foreign-Source Income	383
International Tax Practices	383
Taxing Branches and Subsidiaries	384
Transfer Prices	386
Double Taxation and Tax Credit	387
Dodging Taxes	388
Offshore Financing and Offshore Financial Centers	388
What Is an OFC?	388
 <b>Point-Counterpoint</b>	
Should Offshore Financial Centers and Aggressive Tax Practices Be Eliminated?	390
 <b>Looking to the Future</b>	
The Growth of Capital Markets and the Drive by Governments to Capture More Tax Revenues by MNEs	391
 <b>CASE: Does the Devil Really Wear Prada?</b>	392
Summary	395
Key Terms	396
Endnotes	396

• **PART FIVE: GLOBAL STRATEGY, STRUCTURE, AND IMPLEMENTATION** 399

**11 Globalization and Society** 399

**CASE: Ecomagination and the Global Greening of GE** 400

Introduction	403
Stakeholder Trade-Offs	403
The Foundations of Ethical Behavior	404
Why Do Companies Care About Ethical Behavior?	405
The Cultural Foundations of Ethical Behavior	405
Relativism Versus Normativism	406
The Legal Foundations of Ethical Behavior	407
Legal Justification: Pro and Con	408
Extraterritoriality	408
Ethics and Corporate Bribery	409
Corruption and Bribery	409
The Consequences of Corruption	410
What's Being Done About Corruption?	410
 <b>Point-Counterpoint</b>	
Are Top Managers Responsible When Corruption Is Afoot?	413

Ethics and the Environment	414
What Is “Sustainability”?	414
Global Warming and the Kyoto Protocol	415
 <b>Does Geography Matter?</b>	
How to See the Trees in the Rain Forest	417
Ethical Dilemmas and the Pharmaceutical Industry	418
Tiered Pricing and Other Price-Related Issues	418
Taking TRIPS for What It’s Worth	419
R&D and the Bottom Line	419
Ethical Dilemmas of Labor Conditions	420
The Problem of Child Labor	421
What MNEs Can and Can’t Do	422
Corporate Codes of Ethics: How Should a Company Behave?	422
Motivations for Corporate Responsibility	423
Developing a Code of Conduct	423
 <b>Looking to the Future</b>	
Dealing with Ethical Dilemmas in the Global Economy	424
 <b>CASE: Anglo-American PLC in South Africa: What Do You Do When Costs Reach Epidemic Proportions?</b>	425
Summary	429
Key Terms	429
Endnotes	429

## 12 The Strategy of International Business 433

 **CASE: Zara’s Strategy for Value Creation in the Global Apparel Industry** 434

Introduction	439
Industry Structure	440
Industry Change	441
Perspectives on Strategy	442
Approaches to Value Creation	443
Cost Leadership	444
Differentiation	444
The Firm as Value Chain	445
Managing the Value Chain	447
Configuration	447
 <b>Does Geography Matter?</b>	
Clusters and Configuring Value Chains	449
Logistics	454
Coordination	455
 <b>Looking to the Future</b>	
The Rise of Robots	456

Change and the Value Chain	458
A Case in Point	458
 <b>Point-Counterpoint</b>	
Building a Better Value Chain: The Superiority of Convention	459
Global Integration Versus Local Responsiveness	461
Pressures for Global Integration	461
Pressures for Local Responsiveness	463
When Pressures Interact	465
Types of Strategy	466
International Strategy	467
Multidomestic Strategy	469
Global Strategy	470
Transnational Strategy	471
 <b>CASE:</b> The Multinational Enterprise of the Future: Forecasts and Scenarios	473
Summary	476
Key Terms	477
Endnotes	477

### 13 Country Evaluation and Selection 483

  <b>CASE:</b> Burger King	484
Introduction	488
How Does Scanning Work?	490
Scanning Versus Detailed Analysis	490
What Information Is Important in Scanning?	490
Opportunities: Sales Expansion	490
Opportunities: Resource Acquisition	492
Risks	495
 <b>Does Geography Matter?</b>	
Don't Fool with Mother Nature	498
Collecting and Analyzing Data	501
Some Problems with Research Results and Data	501
External Sources of Information	502
Internally Generated Data	503
Country Comparison Tools	503
 <b>Point-Counterpoint</b>	
Should Companies Operate in and Send Employees to Violent Areas?	503
Grids	505
Matrices	506

Allocating Among Locations	506
Alternative Gradual Commitments	507
Geographic Diversification Versus Concentration	508
Reinvestment and Harvesting	509
Noncomparative Decision Making	510
 Looking to the Future	
Will Prime Locations Change?	511
  <b>CASE: Carrefour</b>	512
Summary	515
Key Terms	516
Endnotes	516
<b>14 Export and Import</b>	<b>519</b>
 <b>CASE: SpinCent: The Decision to Export</b>	520
Introduction	522
Exporting	524
Who Are Exporters?	525
The Matter of Advantages	525
Characteristics of Exporters	526
Why Export?	527
Profitability	527
Productivity	528
Diversification	528
Export: Initiation and Development	529
Sequences and Increments	529
Born Globals	530
Interaction: Time and Place	531
The Wildcard Role of Serendipity	533
Approaches to Exporting	533
Which Approach When?	535
Importing	536
Who Are Importers?	536
Input Optimizers	536
Opportunistic	536
Arbitrageurs	537
Characteristics of Importers	537
Why Import?	537
Specialization of Labor	538
Global Rivalry	538
Local Unavailability	538
Diversification	538

	<b>Point-Counterpoint</b>	
	Exporting E-waste: A Useful Solution?	539
	<b>Importing and Exporting: Problems and Pitfalls</b>	<b>542</b>
	Financial Risks	542
	Customer Management	543
	International Business Expertise	544
	Marketing Challenges	544
	Top Management Commitment	544
	Government Regulation	544
	Trade Documentation	545
	<b>Importing and Exporting: Resources and Assistance</b>	<b>546</b>
	Government Agencies	548
	Export Intermediaries	549
	Customs Brokers	551
	Freight Forwarders	553
	Third-Party Logistics	554
	<b>Reconciling Opportunity and Challenge: An Export Plan</b>	<b>554</b>
		<b>Looking to the Future</b>
	Technology and International Trade	557
	<b>Countertrade</b>	<b>559</b>
	Costs	559
	Benefits	560
		<b>CASE: A Little Electronic Magic at Alibaba.com</b>
		560
	<b>Summary</b>	<b>563</b>
	<b>Key Terms</b>	<b>563</b>
	<b>Endnotes</b>	<b>563</b>

## 15 Direct Investment and Collaborative Strategies 569

	<b>CASE: Meliá Hotels International</b>	<b>570</b>
	<b>Introduction</b>	<b>576</b>
	<b>Why Exporting May Not Be Feasible</b>	<b>577</b>
	When It's Cheaper to Produce Abroad	577
	When Transportation Costs Too Much	577
	When Domestic Capacity Isn't Enough	577
	When Products and Services Need Altering	578
	When Trade Restrictions Hinder Imports	578
	When Country of Origin Becomes an Issue	578
	<b>Noncollaboration: FDI</b>	<b>579</b>
	Reasons for Foreign Direct Investment	579
	Acquisition Versus Greenfield	580

Why Companies Collaborate	581
Alliance Types	581
General Motives for Collaborative Arrangements	582
International Motives for Collaborative Arrangements	583
Types of Collaborative Arrangements	585
Some Considerations in Collaborative Arrangements	585
 <b>Point-Counterpoint</b>	
Should Countries Limit Foreign Control of Key Industries?	586
Licensing	587
Franchising	588
Management Contracts	589
Turnkey Operations	590
Joint Ventures	592
Equity Alliances	592
Problems with Collaborative Arrangements	593
Relative Importance	593
Divergent Objectives	594
Questions of Control	595
Comparative Contributions and Appropriations	595
Culture Clashes	596
Managing International Collaborations	596
Country Attractiveness and Operational Options	596
Problems of Switching Modes	597
Learning from Experience	597
Dealing with Partners	598
 <b>Looking to the Future</b>	
Why Innovation Breeds Collaboration	599
 <b>CASE: The oneworld Airline Alliance</b>	600
Summary	606
Key Terms	606
Endnotes	606

## 16 The Organization of International Business 611

**CASE: Building a Global Organization at Johnson & Johnson** 612

Introduction	615
Changing Situations, Changing Organizations	616
Building a “Magical” Organization	617
Organization Structure	617
Vertical Differentiation	618
A Dynamic Balance	618

Horizontal Differentiation	620
Functional Structure	620
Divisional Structures	620
Matrix Structure	623
Mixed Structure	624
Neoclassical Structures	624
Changing Times, Changing Strategies, Changing Structures	625
The Ideal of Boundarylessness	626
Network Structure	627
Virtual Organization	629
Pitfalls of Neoclassical Structures	629
Coordination Systems	630
Coordination by Standardization	630
 <b>Point-Counterpoint</b>	
Hierarchy: The Superior Structure?	631

# Preface

*This textbook is one of the best-selling international business textbooks in both the United States and the rest of the world. Widely used in both undergraduate and MBA level courses, this text has had authorized translations into Spanish, Chinese, Thai, and Russian, and it will soon be in Albanian, Korean, and Macedonian as well. This textbook set the global standard for studying the environments and operations of international business. The elements of success that have driven this performance anchor our efforts to make this edition the best version yet. We believe these efforts result in a textbook that provides you and your students the best possible understanding of what is happening and is likely to happen in the world of business.*

## **AUTHORITATIVE, RELEVANT, CURRENT**

Students, faculty, and managers praise this book for its compelling balance between rigorous, authoritative theory and meaningful practice within the context of a fresh, current analysis of the international business environment. Indeed, this book not only describes the ideas of international business but also uses contemporary examples, scenarios, and cases to make sense of what managers do and should do. We include multiple insights and real-world examples, which we base on our research, discussions with managers and other stakeholders, opinions of students and professors, and observations from traveling the world. Since 2010, the authors have traveled individually to more than 45 countries, only a few of which overlapped. We traveled to every region and nearly every continent, which provided significant insights we were able to use in this edition. We believe no other textbook comes close to successfully blending a comprehensive review of international business theory with exhaustive attention to what happens in the many parts of the global market. We are confident that this new edition, by making international business ideas and practices more meaningful than ever before, will give students a comprehensive, current view of international business in the twenty-first century.

## **RELEVANT MATERIALS THAT ENGAGE STUDENTS**

### **AUTHOR-WRITTEN CASES**

An enduring strength of this text is its in-depth case profiles of cutting-edge issues in international business. This edition introduces new cases and updates and revises the remaining. All 40 cases are unique and, with few exceptions, are personally researched and written by the text's authors. As such, we believe they set the standard for integration of theory and practice in an international business textbook on the following three levels:

1. *Level of Analysis:* Cases engage an extensive range of topics from environmental, institutional, country, industry, company, and individual perspectives. No one perspective dominates; all are represented and, hence, create a meaningful representation of the world of international business.
2. *Scope of Geographic Coverage:* Cases cover topics in settings that span the globe; no region is unaddressed, no major market is neglected.

3. *Scope of Company Coverage*: Cases look at various issues from a range of company perspectives, notably companies headquartered in all regions of the world, from large MNEs to small exporters, from old-line manufacturers to emergent cyber businesses, from companies that make products to those that deliver services.

**Opening Case** Each chapter starts with a provocative case written to set the stage for the major issues covered in the chapter. Designed to grab the student's attention, these cases look at fascinating issues in a way that makes students want to understand the ideas and concepts of international business. These cases, by variously taking the point of view of individuals, companies, governments, and institutions, give a great sense of the richness of the ensuing chapter. Material from the opening cases is then integrated with chapter discussions that we highlight in the text.

**Closing Case** Each chapter closes with a rich, elaborate case that integrates the ideas and tools presented in the chapter. The closing cases aim to put the student into a situation that asks, given certain circumstances, what should be done. Called on to analyze issues and decisions for which the chapter prepares them, students can then grapple with many of the opportunities and challenges of international business.

## NEW CASES IN THIS EDITION

We have extensively updated *all* the cases from the previous edition so that students will find them relevant and rigorous. In addition, we have included several entirely new cases:

- Chapter 2: Tesco PLC: Leveraging Global Knowledge
- Chapter 4: The BRICs: Vanguard of the Revolution
- Chapter 12: Strategy in the Multinational Enterprise of the Future: Forecasts and Scenarios
- Chapter 15: Meliá Hotels International
- Chapter 18: Apple's Global Supply Chain
- Chapter 19: H&M: The Challenges of Global Expansion and the Move to Adopt International Financial Reporting Standards

## LOOKING TO THE FUTURE

Each chapter offers future scenarios that are important to managers, companies, or the world. The topic of each *Looking to the Future* feature alludes to ideas discussed in the chapter in a way that prompts students to engage their imagination about the future of the world.

## POINT-COUNTERPOINT

To reinforce our strong applications orientation, we have included a separate feature in every chapter that brings to life a major debate in contemporary international business and globalization. We use a point-counterpoint style to highlight the diversity of perspectives that managers and policymakers use to make sense of vital issues.

The give-and-take between two sides reinforces this textbook's effort to link theory and practice in ways that will undoubtedly energize class discussion.

## GEOGRAPHY AND INTERNATIONAL BUSINESS

In appropriate chapters, we have included "Does Geography Matter?" sections. Some of the geographic variables we include to help explain the chapters' content are country location, location of population and population segments within countries, natural resources and barriers, climate, natural disasters, and country size.

## NEW TOPICS AND CHAPTER CHANGES

Although it is a tired cliché, every instructor of international business knows the world is changing in many and often unpredictable ways. We wake up to the same challenges you do, trying to make sense of what we read, hear, and see in the global press. Our effort to make sense of this leads to an unconditional effort to improve and update the text to reflect the latest knowledge and practice of international business. Most notably, among the many changes in this edition are the following:

## PART ONE: BACKGROUND FOR INTERNATIONAL BUSINESS

- Updated opening case, such as including the cost and company sponsorship of the London Summer Olympics (Chapter 1)
- Brought in new examples of determining product origins because of their mixed composition, such as the example of Swiss chocolate (Chapter 1)
- Extended discussion of economic uncertainties (oil prices and economic recession), especially as they affect the value of international trade and investment (Chapter 1)
- Explained how countries' sizes influence their degree of globalization (Chapter 1)
- Introduced the concept of inshoring (Chapter 1)
- Presented example of how border cooperation enhances efficiency, e.g. dam between Brazil and Paraguay, and how lack of standards create inefficiencies, e.g. trans-European rail service (Chapter 1)
- Illustrated global economic cooperation with example of G-20 countries (Chapter 1)
- Introduced additional downsides of offshoring, such as the loss of higher skilled jobs and the possible inattention to process techniques when relying on cheap labor (Chapter 1)
- Illustrated job shifts because of technology with example of airline cockpit crews (Chapter 1)
- Revised the ending case, such as by inclusion of recent cruise line safety and mechanical problems (Chapter 1)

## PART TWO: COMPARATIVE ENVIRONMENTAL FRAMEWORKS

- Updated the opening case on Saudi Arabia, such as with illustrations of women's changing roles in the work force, Olympics participation, and possible changes in driving prohibitions (Chapter 2)

- Emphasized the advantages and problems of using multi-cultural teams (Chapter 2)
- Introduced the concept of deal-focused versus relationship-focused societies (Chapter 2)
- Discussed the growth of bicultural and multicultural individuals (Chapter 2)
- Expanded the coverage of laws to include underutilized societal groups, such as women on European boards, ethnic work quotas in Malaysia, and university racial quotas in Brazil (Chapter 2)
- Used Korea to show strain of using needed foreign workers while maintaining traditional cultural values (Chapter 2)
- Illustrated how poor translations affect business with example of Chinese contracts with foreign companies (Chapter 2)
- Showed how ethnic conflict may lead to the dissolution of the United Kingdom and Spain as we know them today (Chapter 2)
- Included a new closing case on Tesco that discusses how the company used multicultural teams to transfer knowledge among countries (Chapter 2)
- Expanded profile of the importance of the political system; particular attention paid to implication of political affairs in Russia (Chapter 3)
- Streamlined discussion of collectivism and individualism; greater emphasis given to their implication to the business environment (Chapter 3)
- Revised profile of political freedom and its implication to rights of individuals and organizations (Chapter 3)
- Detailed update of trends in political ideologies, the play of long-run trends in recent developments and circumstances (Chapter 3)
- Expanded coverage of democracy and totalitarianism within the context of changing degrees of political freedom (Chapter 3)
- Updated profile of the drivers of the recession retreat of democracy; profile of current assessments as provided by Freedom House as *Economist Intelligence Unit* (Chapter 3)
- Updated profile of the drivers of the surge in totalitarianism (Chapter 3)
- Revised interpretation of the implication of political ideological change and MNEs' actions (Chapter 3)
- Streamlined discussion of political risk; reset table to better represent classes and characteristics of political risk (Chapter 3)
- Updated developments in the legal environment; greater emphasis given to business implications of legal change (Chapter 3)
- Profiled ongoing trends in the basis of rule, highlighting the scale and scope of the rule of law versus the rule of man (Chapter 3)
- Streamlined discussion of the interaction of the basis of rule and the practice of democracy worldwide (Chapter 3)
- Reported latest World Bank data on the ease of doing business worldwide; particular attention paid to critical startup, operational, and shutdown activities (Chapter 3)
- Streamlined discussion of the strategic implications of legal environments to the activities of MNEs; particular attention directed toward the ongoing play of intellectual property specification and protection in established versus emerging economies (Chapter 3)

- New section developed to better present the basis for political and legal differences among countries. Provides students a systematic profile of the basis for cross-national differentiation. New section highlights the potential for cross-national convergence in political and legal outlooks and orientations (Chapter 3)
- Updated case profile of intellectual property violation and counterfeiting in the world today; reset case to highlight economic, political, and social dynamics of counterfeiting and intellectual property piracy; emphasized angles of political and legal ambiguity that reflect location effects. Data points updated to report most recent statistics (Chapter 3)
- Updated and expanded opening case, emphasizing the ongoing and accelerating comeback of emerging economies and its growing scope of implication to Western economies (Chapter 4)
- Contextualized discussion of economic trends and anomalies that shape the perspectives brought to bear to assess the performance and potential of international markets; designed to illustrate that systematic principles guide assessment of differentiated markets (Chapter 4)
- Streamlined specification of key assumptions anchoring international market analysis (Chapter 4)
- Updated assessment of ice melt rates in the Arctic ice cap and their implication to economic development (Chapter 4)
- Revised discussion of the centrality of economic freedom in international market analysis; precise specification of components of economic freedom (Chapter 4)
- Revised discussion of the current state of economic freedom and predominant trends (Chapter 4)
- Assessment of the concerns and constraints that motivate national governments to reduce individuals' economic freedom (Chapter 4)
- Revised presentation of materials profiling types of economic systems (Chapter 4)
- Updated assessment of the scale and scope of state capitalism; direct evaluation of the ongoing debate regarding whether state capitalism is a detour or destination for established and emerging markets (Chapter 4)
- Summary discussion in chart profiling various specifications of emerging economy clusters (Chapter 4)
- Expanded discussion of broader conceptions of economic performance and potential, with additional emphasis given toward measures of sustainability—most notably Net National Product, Genuine Progress Indicator, and Human Development Index—and stability, most notably Your Better Life Index, Gross National Happiness, and Happy Planet (Chapter 4)
- Stronger connections drawn between economic performance and national potential (Chapter 4)
- Streamlining of the Point-Counterpoint, “Growth: Positive and Productive?” to more directly stress test the comparative benefits and costs of growth (Chapter 4)
- Revised coverage of key components of economic analysis, with particular attention given to include inflation, unemployment, debt, income distribution, poverty, and the balance of payments (Chapter 4)
- Expanded coverage of the base-of-the-pyramid concept as well as discussion of the multidimensionality of poverty (Chapter 4)

- Addition of section to discuss the explanatory usefulness of global indices to evaluate the economic potential of international markets; particular attention given to the Global Competitiveness, World Competitiveness, Global Innovation, and the Where to Be Born Indices (Chapter 4)
- Reference throughout chapter evolving implication of global credit crisis, particularly in Western economies (Chapter 4)
- Addition of new case that evaluates trends, opportunities and constraints in the BRIC markets with an overt sensitivity of the relevance of those markets to fellow emerging economies (Chapter 4)
- Updated statistics throughout chapter (Chapter 4)

### **PART THREE: THEORIES AND INSTITUTIONS: TRADE AND INVESTMENT**

- Updated trade and demographic figures for both the opening case on Costa Rican trade and the closing case on Ecuadoran rose exports (Chapter 5)
- Brought in the recent upsurge in trade among developing countries, mainly due to Chinese and Indian demand for raw materials (Chapter 5)
- Added a map comparing U.S. states' GDPs with those of countries to demonstrate why the U.S. is a major trader with a low dependence on foreign trade (Chapter 5)
- Compared homogeneous and differentiated products in terms of the importance of distance in explanation of countries' trading partners (Chapter 5)
- Included new map showing recent major destinations of immigration (Chapter 5)
- Brought in new examples of technology that is causing shifts in global trade patterns, such as robots with cameras that displace agricultural pickers and fracking for natural gas that displaces petroleum trade (Chapter 5)
- Discussed the effect of ethnic networks on trade patterns (Chapter 5)
- Updated the opening case on U.S.–Vietnamese disputes on catfish trade, such as with later figures and the 2012 U.S. repeal on inspections of Vietnamese catfish (Chapter 6)
- Replaced old with recent export restrictions to maintain domestic supplies (Chapter 6)
- Brought in the effect on workers in exporting countries when importing countries impose an optimum tariff (Chapter 6)
- Introduced the Committee on Foreign Investment in the United States (CFIUS) (Chapter 6)
- Augmented discussion of trade sanctions with examples of recent trade bans with Iran (Chapter 6)
- Discussed the problem and documentation needed to explain a product's origin, such as with imports when animals were born in one country, raised in a second one, and slaughtered in a third (Chapter 6)
- Showed how the image of a country's products changes when some of its exported products are rejected for health or safety reasons (Chapter 6)
- Updated the U.S.–Cuban trade case, such as with new figures and the 2012 permit of U.S. exports to Cuba of humanitarian goods (Chapter 6)

- Updated the Toyota case to reflect its expansion into Europe, and revised the Walmart case to reflect its expansion into Central America and the consolidation of its regional operations with its Mexican operations (Chapter 7)
- Focus on the importance of bilateral and regional trade agreements at the expense of program on WTO talks, especially on the Doha Round (Chapter 7)
- Updated the progress in different regional trade agreements and introduced new talks between the U.S. and the EU (Chapter 7)
- Included the addition of Croatia to the EU in 2013, an updated status of other expansion moves in the EU, and the importance of the Schengen Area and monetary union (the Euro) as two important areas of focus in Europe (Chapter 7)
- Update of the differences between the EU and NAFTA regarding rules of origin (Chapter 7)
- Added a discussion of new regional agreements being discussed in Latin America (UNASUR) and Asia (the Trans-Pacific Partnership) (Chapter 7)

#### **PART FOUR: WORLD FINANCIAL ENVIRONMENT**

- Revised opening case to include information on sources and destinations of migration as well as the role of remittances of foreign workers in Dubai (Chapter 8)
- Update of players on the foreign-exchange market to demonstrate the changes that have occurred (Chapter 8)
- Updated size, composition, and location of the foreign-exchange market according to the latest BIS survey (Chapter 8)
- Updated the end-of-chapter case on China's revaluation of the yuan and how China is gradually opening up the market for trading yuan and using Hong Kong as a place to test changes in the role of the yuan in the global financial system (Chapter 8)
- New information on the global financial crisis as it expanded in 2012–2013 and especially the challenges in Europe (Chapter 9)
- Update of exchange rate agreements to fit with the new definitions (Chapter 9)
- Discussion of the Greek financial crisis and its spread to other southern European countries and the efforts of the European Union to find a resolution (Chapter 9)
- Updated the closing case to reflect the falling value of the yen in the fall of 2012 after several quarters of sustained rise in the value of the yen against the dollar and its impact on Sony's competitive position (Chapter 9)
- Added a new Chapter 10 on global capital markets to strengthen PART FOUR: The World Financial Environment (Chapter 10)
- Updated the opening case to discuss the expansion of GPS into Europe and the challenges they face with new financial market regulations (Chapter 10)
- Updated data in Chapter 10 to reflect changes in the size of capital markets resulting from the drop in global equity values in the 2010–2012 period (Chapter 10)
- Included additional information on international tax issues and tax haven countries as a result of the global efforts to go after MNEs that are perceived as avoiding paying a fair share of taxes (Chapter 10)
- Updated the closing case on Prada's IPO in Hong Kong and why Asia is so important for the luxury goods market (Chapter 10)

## **PART FIVE: GLOBAL STRATEGY, STRUCTURE, AND IMPLEMENTATION**

- Moved the Chapter on Globalization and Society from PART TWO to PART FIVE due to the strategic emphasis on how firms relate to the broader society in which they operate (Chapter 11)
- Updated initiatives by the UN and EU to combat bribery as well as expanded coverage on U.S. anticorruption efforts (Chapter 11)
- Discussed the impact of the slowing global economy on the ability of countries to comply with the Kyoto Protocol and the slowdown in the progress of the Protocol to expand its coverage globally (Chapter 11)
- Added new examples of global sustainability initiatives by SMEs as well as larger MNEs (Chapter 11)
- Updated opening case profile of Zara for latest performance data and strategic moves; streamlined presentation of materials (Chapter 12)
- Revised discussion of drivers of industry change to better reflect contemporary examples in established and emerging markets (Chapter 12)
- Revised introduction given reviewers' comments to better anchor the concept of strategy in the international market (Chapter 12)
- Profile of key examples that link generic concepts of strategy and industry structure to the activities of MNEs (Chapter 12)
- Refined discussion of the cost leadership and differentiation strategy in international markets (Chapter 12)
- Streamlined specification of the value chain and anchored more directly within the context of global operations (Chapter 12)
- Reset discussion of the Industrial Organization perspective relative to ideas developed within the context of Great by Choice viewpoint (Chapter 12)
- Updated profile of key factors that shaped the configuration of value chains (Chapter 12)
- Reset graphics to better communicate the concept and components of the value chain (Chapter 12)
- Expanded discussion of force that shaped the configuration of value chains to reflect ongoing technological innovations (Chapter 12)
- Expanded discussion of configuration moderators to better capture the implication of labor demographics, dynamics, and costs (Chapter 12)
- Emphasized geographic aspects of strategy and international market by profiling the moderating effects of business clusters (Chapter 12)
- Added discussion of the lexicon of location perspectives to better interpret the configuration of value chains (Chapter 12)
- Added new Looking To The Future profile of the rise of robots and their potentially dramatic implications to the conception of value chain configuration and coordination
- Updated the profiles of Samsung and Sony, as an interactive scenario that illustrates the dynamic give-and-take of strategy and global markets (Chapter 12)
- Expanded profile of the dynamic of change in competitive competencies resulting implications to configuring and coordinating the value chain in international markets (Chapter 12)

- Updated and streamlined presentation of the pressures posed by global integration and local responsiveness in the conception of strategy and the configuration and coordination of value chains for international markets (Chapter 12)
- Broadened discussion of integration and responsiveness pressures to reflect predominant trends among emerging markets (Chapter 12)
- Reset discussion of the international, multi-domestic, global, and transnational strategies to reflect new ideas and revised principles introduced in preceding sections (Chapter 12)
- Revised summary chart to integrate and organize the key characteristics of the international, multi-domestic, global, and transnational strategies (Chapter 12)
- Added a new closing case that profiles forecast scenarios of the form and functionality of the future MNE and its implications to strategy (Chapter 12)
- Juxtaposed the opening and closing cases (Burger King and Carrefour) and updated figures and locations for both (Chapter 13)
- Bolstered discussion of company and country bargaining positions because of access to unique resources (Chapter 13)
- Enhanced discussion on lack of accuracy on countries' data, including how different methodologies lead to different results (e.g., Chinese 2012 GDP data) (Chapter 13)
- Examined the need to consider risks throughout the supply chain, including location of secondary suppliers (Chapter 13)
- Gave opposing thoughts of preferring versus avoiding countries with weak protections of intellectual property rights (Chapter 13)
- Added evidence that access to knowledge is enhanced by locating in knowledge-producing countries (Chapter 13)
- Included the factor of stress for people working in countries with violence (Chapter 13)
- Updated opening case on Burger King's international expansion to include its new entries into Morocco, Russia, and Slovenia (Chapter 13)
- Enriched discussion in opening case to better profile the opportunities and constraints posed by export options to small and medium-size enterprises (Chapter 14)
- Highlighted connection between international business activity and the steadily expanding scale and scope of export and import (Chapter 14)
- Revised sections regarding the characteristics and classes of exporters and differential export motivations (Chapter 14)
- Reset coverage of export development perspectives, emphasizing the sequential nature of the incremental internationalization viewpoint as well as the dynamism of the born global perspectives (Chapter 14)
- Applied data-driven analysis to evaluate the interaction between export development perspectives; evaluated the leading import and export part of the United States to stress test discussion (Chapter 14)
- Expanded discussion of the primary approaches to exporting (Chapter 14)
- Streamlined and updated discussion of the export of electronic waste (Chapter 14)
- Expanded sections on who importers are and why they import (Chapter 14)
- Expanded coverage of the pitfalls and problems that challenge importers and exporters; fortified discussion by tapping data analytics provided by various United States agencies (Chapter 14)

- Identification of key points of difficulty that complicate international trade; directly adopted the perspective of small and medium-sized enterprises (Chapter 14)
- Better organized discussion of the resources available to international traders; emphasized the growing scale and scope of technologies and their moderating influence on the decision to import and export (Chapter 14)
- Sharper specification of the theoretical components that anchor an export plan (Chapter 14)
- Updated profile of the technology of trade and its application to the potential and practice of export and import (Chapter 14)
- Further streamlined coverage of countertrade and its role as a facilitator of international trade (Chapter 14)
- Updated closing case to reflect contemporary developments (Chapter 14)
- Updated statistics throughout the chapter (Chapter 14)
- New opening case, map, and figures on Meliá Hotels International, a company using multiple operating modes for its international operations (Chapter 15)
- Enhanced coverage of market failure as a reason for using FDI as an operating mode (Chapter 15)
- Added Lenova's acquisition of IBM's PC division as example of cultural collision when combining managers from the two companies (Chapter 15)
- Brought in leasing as an alternative to FDI in foreign expansion (Chapter 15)
- Introduced the concept of coopetition (Chapter 15)
- Revamped discussion on how to divide compensation in collaborative arrangements (Chapter 15)
- Showed change in turnkey leadership because of growth in Chinese companies' operations (Chapter 15)
- Presented new example of equity alliance, e.g. management contract of Port of Antwerp with a port facility in India (Chapter 15)
- Illustrate how shift in a partner's product line emphasis puts strain on partnership arrangements, e.g. IBM with Toshiba (Chapter 15)
- Indicated how home market trust influences trust in foreign collaborations (Chapter 15)
- Indicated the resurgence in importance of conglomerates (Chapter 15)
- Updated the ending case on the oneworld Alliance, such as by discussing the complexity of the proposed merger between American Airlines and US Airways because of their membership in different airline alliances (Chapter 15)
- Streamlined opening case profile of Johnson & Johnson to directly reference elements of organization structure, systems, and culture that are discussed in the chapter (Chapter 16)
- Reset and updated discussion of macro environmental trends that influence contemporary interpretations of organizing the MNE (Chapter 16)
- Clarified discussion of classical and neoclassical structures to emphasize key points of form, functionality, overlap, and differentiation (Chapter 16)
- Updated company examples regarding adoption or abandonment of classical organization structures (Chapter 16)
- Structured discussion of neoclassical structures to reflect ongoing developments driven by technological innovation, behavioral economics, and virtuality (Chapter 16)

- Reset graphic representation of network structure to better communicate dimensions and dynamics (Chapter 16)
- Streamlined interpretation of coordination and control systems; developed richer explanations within the context of MNE's practices (Chapter 16)
- Broadened discussion of coordination systems to reflect changes precipitated by technological innovations and expanding interpersonal connectivity (Chapter 16)
- Fortified discussion of organization culture by strengthening connection between its outlook, forms, and functionality and the MNE's strategy (Chapter 16)
- Updated profile of the rise of corporate universities and their role in developing and sustaining organization in the MNE (Chapter 16)
- Streamlined profile of Infosys in the closing case to better highlight the role of its founding mission and enduring principles (Chapter 16)

## PART SIX: MANAGING INTERNATIONAL OPERATIONS

- Updated the opening case on Hilfiger, such as with newer operating figures and the company's use of Disney characters to promote its children's line (Chapter 17)
- Illustrated the use of global team members to develop more globally standardized products (Chapter 17)
- Enhanced discussion of companies' approaches to sell simultaneously to different income levels, such as Diageo's and SABMiller's sale of a cheaper beer in some African countries (Chapter 17)
- Gave new examples of standardized products aimed at a global niche, e.g. Red Bull and Ferrari (Chapter 17)
- Showed how companies can adapt their competencies to foreign markets, such as Hermès' use of its luxury silk competence to sell saris in India (Chapter 17)
- Added the importance of social media using Web 2.0 in word-of-mouth product acceptance (Chapter 17)
- Inserted new examples of brand name changes to better fit sounds, meaning, and visual acceptance in other languages (Chapter 17)
- Enhanced reasons for national differences in negotiating prices (Chapter 17)
- Mentioned new U.S. Supreme Court rulings permitting U.S. sales in the gray market (Chapter 17)
- Updated ending case on Grameen Danone Foods in Bangladesh, such as by showing newer demographics and recent sales growth (Chapter 17)
- Introduced a new case discussing Apple's Global Supply Chain (Chapter 18)
- Restructured the chapter on global supply chain to introduce the concepts of global sourcing at the beginning of the chapter (Chapter 18)
- New discussion on contract manufacturing as a way to source parts and final products (Chapter 18)
- Discussed the problems of a company like Apple using a supplier like Foxconn to manufacture high-end products in China and possibly losing control of intellectual property and creating a competitor (Chapter 18)
- Discussion of principles from *The World Is Flat* to illustrate offshoring, outsourcing, and supply-chaining and other ways information technology is changing global supply chains (Chapter 18)
- Consolidated material from Chapters 18 and 19 into one chapter on Global Accounting and Finance (Chapter 19)

- Updated the opening case to reflect how Parmalat has recovered from its corporate corruption scandal (Chapter 19)
- Updated trends in the convergence of accounting standards through IFRS and negotiations with the U.S. FASB and explained why it will be difficult, if not impossible, for the U.S. to adopt IFRS in place of U.S. GAAP (Chapter 19)
- Updated the differences in American and European responses to the adoption of IFRS (Chapter 19)
- Moved the discussion of global debt and equity markets to Chapter 10
- Focused on operational issues in international finance, such as capital budgeting, the internal flow of funds, and foreign exchange risk management (Chapter 19)
- Dropped the Ericsson case at the end of the chapter and added a new case on H&M's global strategy and how it is coping with IFRS for its financial statements (Chapter 19)
- Refined the idea of globalizing your career as reported in opening case; expanded the diversity of viewpoints on the usefulness, responsibilities, opportunities and costs of the expatriate experience (Chapter 20)
- Emphasized the growing connection between the MNE's success in planning its strategy and the quality of its HRM programs in general, its expatriate management in specific (Chapter 20)
- Profiled trends in expatriate processes given consequences of global financial crisis and the call to contain the escalating expenses (Chapter 20)
- Highlighted implications of the changing workplace and workforce of globalization to the use of third-country nationals, reverse expatriates, and different genders and demographics (Chapter 20)
- Revised discussion of the ethnocentric, polycentric, and geocentric approaches to expatriate staffing; adjusted discussion for changing interpersonal connectivity through unfolding technological innovations (Chapter 20)
- Streamlined discussion of the linkage of expatriate selection to the matters of professional and personal characteristics (Chapter 20)
- Expanded data that substantiate key competencies and key concerns of expatriates (Chapter 20)
- Profile of changing compensation patterns given globalization of compensation standards as well as growing pressures to economize (Chapter 20)
- Expanded and elaborated discussion of the role of English in the world of business, specifically testing the proposition that English is destined as the default language of the world (Chapter 20)
- Added section and table data profiling the scale and scope of various forms of language in the world (Chapter 20)
- Fuller explanation of the causes and consequences of expatriate failure; repositioned section to reflect reviewers' suggestions on chapter flow (Chapter 20)
- Expanded section on the evolving location mix of expatriate assignments, emphasizing the shift from established to emerging locations (Chapter 20)
- Updated coverage of the general characteristics and peculiar attributes of the Indian market; highlights the role they play in moderating the selection of the Indian country manager (Chapter 20)
- Enriched the presentation of material closing case by including fuller profiles of the candidates for the Indian country manager (Chapter 20)

## ENGAGING IN-TEXT LEARNING AIDS

We believe a powerful textbook must teach as well as present ideas. To that end, we use several in-text aids to make this book an effective learning tool. Most notably, each chapter uses all of the following features:

### CHAPTER OBJECTIVES AND SUMMARY

Each chapter begins with learning objectives and ends with a summary; both tie directly to the chapter material. This linkage helps students prepare for the major issues within each chapter and appreciate their general relationships, and reinforces the important lessons of the chapter material.

### CONCEPT LINKS

Throughout each chapter, as warranted by discussion in the corresponding text, we highlight in the margin how ideas from previous chapters link to the ideas being discussed. This cumulative series of concept links helps the student build an understanding of the connections among concepts across chapters. This feature also facilitates student understanding when instructors do not assign all chapters.

### CASE ICONS

Although all of our cases are primarily issue-oriented, new icons now enable easy identification of the focus of the chapter opening and closing cases. Know at a glance if a case is more focused on a specific country or on company or industry issues, or, when both icons are present, if it will provide both a country and company/industry focus. The identifying icons appear in both the extended table of contents and in the opening and closing cases within the chapters themselves.

### CASE LINKS

Another effort to help students better interpret the connections among ideas and practices is encompassed in our latest innovation. Specifically, as warranted by discussion in the corresponding text, we highlight with text shading and icons how those ideas being discussed elaborate ideas that were presented in the opening and closing cases of that chapter.

### KEY TERMS AND POINTS: BOLDING, MARGINAL NOTES, AND GLOSSARY

Every chapter highlights key terms; each key term is put in bold print when it first appears. Key learning points are also highlighted in the adjoining margin. These terms and others are then assembled in an end-of-chapter list and into a comprehensive glossary at the end of the book.

## CASE QUESTIONS

The opening and closing case of each chapter stipulates several questions to guide students in applying what they have learned in the chapter to the reality of international business. We have found in our classes that the questions at the end of the case go a long way toward putting the case into perspective for students. In addition, they make for great assignment activities, directing students to respond to questions with information presented in the specific case as well as the chapter. Select questions are also available as assisted graded writing prompts in MyManagementLab.

## POINT-COUNTERPOINT

This feature, as we have already discussed, is compelling not only for class discussion, but also for specific assignments. These assignments may include requiring students to take sides in debates or to apply arguments to specific countries.

## MAPS

Geographic literacy is essential in international business. Thus, we have not only included a map section between Chapters 1 and 2, but we incorporate maps throughout that show both locations and other information.

## INTERNATIONAL BUSINESS MINI-SIMULATIONS

Students can apply the concepts they've learned and exercise their decision-making skills in real-world scenarios via the online mini-simulations found in MyManagementLab. Created in collaboration with experts in the field, eight mini-simulations covering the following topics will be available for fall 2014 courses: Global Culture and Diversity, Management in a Global Environment, Organizational Structure, Globalization, International Ethics, Legal Differences, Outsourcing, and Tariffs, Subsidies, and Quotas. Sign into MyManagementLab.com or ask your Pearson representative for more information.

## CURRENCY AND READABILITY

We have always prided ourselves on being current in the research and examples we cite in the chapters. The 15th edition is no exception; in fact, we believe our coverage goes beyond that of any other IB text. If you examine the endnotes for any chapter, you will see that we include both classic and the most up-to-date materials from both scholarly treatises and the popular press. If you examine the list of companies in the "Company Index and Trademarks," you will see that our citations are numerous and include large and small firms from a variety of industries based in countries throughout the world. These citations illustrate to students the practical reality of the theories and alternative operations we describe.

We have made a special effort in this edition to improve the readability of the extensive materials we present. First, we make a point of putting authors' names (except for classics such as Adam Smith) only in the reference section rather than in

the chapters' prose. We have simply seen too many students try to remember names rather than concepts. Second, we have engaged a copy editor to improve the language and flow of materials.

## INSTRUCTOR SUPPLEMENTS

Instructors can access downloadable supplemental resources by signing into the Instructor Resource Center at [www.pearsonhighered.com/educator](http://www.pearsonhighered.com/educator).

- **Instructor's Manual**
- **Test Item File**—over 100 questions per chapter, including multiple choice, true/false, short answer, and essays. The Test Item File includes questions that are tagged Learning Objectives, Learning Outcomes, and AACSB Learning Standards to help measure whether students are grasping the course content that aligns with AACSB guidelines.
- **TestGen Software**
- **PowerPoint Slides**
- **Image Library**

*Need help?* Our dedicated Technical Support team is ready to assist instructors with questions about the media supplements that accompany this text. Visit <http://247pearsoned.custhelp.com> for answers to frequently asked questions and toll-free user-support phone numbers.

## LEARNING MANAGEMENT SYSTEMS

### BLACKBOARD/WEBCT

BlackBoard and WebCT Course Cartridges are available for download from [www.pearsonhighered.com/irc](http://www.pearsonhighered.com/irc). These standard course cartridges contain the Instructor's Manual, TestGen, Instructor PowerPoints, and when available, Student Data Files.

## 2014 QUALITATIVE BUSINESS VIDEO LIBRARY

This DVD, designed to support in-classroom viewing, provides a selection of videos for use with International Business concepts as well as other business disciplines. These videos and many more are found in MyManagementLab. The DVD is an instructor support and is not available for student purchase.

## COURSESMART ETEXTBOOKS ONLINE

CourseSmart eTextbooks were developed for students looking to save the cost on required or recommended textbooks. Students simply select their eText by title or author and purchase immediate access to the content for the duration of the course using any major credit card. With a CourseSmart eText, students can search for specific keywords or page numbers, take notes online, print out reading assignments that incorporate lecture notes, and bookmark important passages for later review. For more information or to purchase a CourseSmart eTextbook, visit [www.coursesmart.com](http://www.coursesmart.com)

## ACKNOWLEDGMENTS

Every author relies on the comments, critiques, and insights of reviewers. It is a tough task that few choose to support. Therefore, we want to thank the following people for their insightful and helpful comments on the fourteenth edition of *International Business: Environments and Operations*, which helped guide us in preparing the fifteenth edition.

MARK BAYLOR, University of Delaware  
ALI KARA, Pennsylvania State University  
LOUIS MELBOURNE, Florida International University  
SHAD MORRIS, Ohio State University  
JOHN O'BRIEN, University of Denver  
AJAYI RICHARD, University of Central Florida  
SHIRI TERJESEN, Indiana University  
ANTHONY PAPUZZA, University of Colorado, Boulder

In addition, we have been fortunate since the first edition to have colleagues who have been willing to make the effort to critique draft materials, react to coverage already in print, advise on suggested changes, and send items to be corrected. Because this is the culmination of several previous editions, we would like to acknowledge everyone's efforts. However, many more individuals than we can possibly list have helped us. To those who must remain anonymous, we offer our sincere thanks.

We would also like to acknowledge people whom we interviewed in writing cases. These are Brenda Yester (Carnival Cruise Lines); Omar Aljindi, Nora al Jundi, and Talah Tamimi (Saudi Arabia's Dynamic Culture); Mauricio Calero (Ecuador: A Rosy Export Future?); Raul Arguelles Diaz Gonzales and Francisco Suarez Mogollon (Walmart Goes South); Jonathan Fitzpatrick, Julio A. Ramirez, Arianne Cento, and Ana Miranda (Burger King); several executives at American Airlines and oneworld who wish to remain anonymous (The oneworld Airline Alliance); and Ali R. Manbien (GPS: In the Market for an Effective Hedging Strategy). In addition, we would like to thank several people who authored or co-authored cases for us: Mary Yoko Brannen and Terence Mughan at the University of Victoria for Tesco PLC: Leveraging Global Knowledge (Chapter 2), Fidel León-Darder and Cristina Villar at Universitat de València for Meliá Hotels International (Chapter 15), Jon Jungbien Moon at Korea University for Grameen Danone Foods in Bangladesh (Chapter 17), and Manuel Serapio at the University of Colorado at Denver and Steve Katsaros, founder and CEO of Nokero for Nokero: Lighting the World (Chapter 18); others who helped with administrative and research matters include Melanie Hunter, Maddison Daines, Lisa Curlee, Allison Johnson, and Katie Cooper Redding.

It takes a dedicated group of individuals to take a textbook from first draft to final manuscript. We would like to thank our partners at Pearson Prentice Hall for their tireless efforts in bringing the fifteenth edition of this book to fruition. Our thanks go to Editor in Chief, Stephanie Wall; Senior Acquisitions Editor, Kris Ellis-Levy; Program Manager Team Lead, Ashley Santora; Senior Marketing Manager, Erin Gardner; Project Manager Team Lead, Judy Leale; Program Manager, Sarah Holle; and Project Manager, Ann Pulido.

# About the Authors

**From left to right: Daniel Sullivan, Lee Radebaugh, John Daniels**

*Three respected and renowned scholars show your students how dynamic, how real, how interesting, and how important the study of international business can be.*

**John D. Daniels**, the Samuel N. Friedland Chair of Executive Management emeritus at the University of Miami, received his Ph.D. at the University of Michigan. His dissertation won first place in the award competition of the Academy of International Business. Since then, he has been an active researcher and won a decade award from the *Journal of International Business Studies*. His articles have appeared in such leading journals as *Academy of Management Journal*, *Advances in International Marketing*, *California Management Review*, *Columbia Journal of World Business*, *International Marketing Review*, *International Trade Journal*, *Journal of Business Research*, *Journal of High Technology Management Research*, *Journal of International Business Studies*, *Management International Review*, *Multinational Business Review*, *Strategic Management Journal*, *Transnational Corporations*, and *Weltwirtschaftliches Archiv*. Professor Daniels has published 15 books, most recently *Multinational Enterprises and the Changing World Economy* (coedited with Ray Loveridge, Tsai-Mei Lin, and Alan M. Rugman), three volumes on *Multinational Enterprise Theory*, and three volumes on *International Business and Globalization* (all co-edited with Jeffrey Krug). On its 30th anniversary, *Management International Review* referred to him as “one of the most prolific American IB scholars.” He served as president of the Academy of International Business and dean of its Fellows. He also served as chairperson of the international division of the Academy of Management, which named him Outstanding Educator of the Year in 2010. Professor Daniels has worked and lived a year or longer in seven different countries, worked shorter stints in approximately 30 other countries on six continents, and traveled in many more. His foreign work has been a combination of private sector, governmental, teaching, and research assignments. He was formerly

a faculty member at Georgia State University and The Pennsylvania State University, director of the Center for International Business Education and Research (CIBER) at Indiana University, and holder of the E. Claiborne Robins Distinguished Chair at the University of Richmond.

**Lee H. Radebaugh** is the emeritus Kay and Yvonne Whitmore Professor of International Business and former Director of the Whitmore Global Management Center/CIBER at Brigham Young University. He received his M.B.A. and doctorate from Indiana University. He was a faculty member at The Pennsylvania State University from 1972 to 1980. He also has been a visiting professor at Escuela de Administracion de Negocios para Graduados (ESAN) in Lima, Peru. In 1985, Professor Radebaugh was the James Cusator Wards visiting professor at Glasgow University, Scotland. His other books include *International Accounting and Multinational Enterprises* (John Wiley and Sons, 6th edition) with S. J. Gray and Erv Black; *Introduction to Business: International Dimensions* (South-Western Publishing Company) with John D. Daniels; and seven books on Canada-U.S. trade and investment relations, with Earl Fry as co-editor. He has also published several other monographs and articles on international business and international accounting in journals such as the *Journal of Accounting Research*, *Journal of International Financial Management and Accounting*, *Journal of International Business Studies*, and the *International Journal of Accounting*. He is the former editor of the *Journal of International Accounting Research* and area editor of the *Journal of International Business Studies*. His primary teaching interests are international business and international accounting. Professor Radebaugh is an active member of the American Accounting Association, the European Accounting Association, the International Association of Accounting Education and Research, and the Academy of International Business, having served on several committees as the president of the International Section of the AAA and as the secretary treasurer of the AIB. He is a member of the Fellows of the Academy of International Business. He is also active with the local business community as past president of the World Trade Association of Utah and member of the District Export Council. In 2007, Professor Radebaugh received the Outstanding International Accounting Service Award of the International Accounting Section of the American Accounting Association, and in 1998, he was named International Person of the Year in the state of Utah and Outstanding International Educator of the International Section of the American Accounting Association. In 2012, Lee was honored when the award for the top article published in the *Journal of International Accounting Research* in the past decade was named the Lee H. Radebaugh Notable Contribution to International Accounting Research.

**Daniel P. Sullivan**, Professor of International Business at the Alfred Lerner College of Business of the University of Delaware, received his Ph.D. from the University of South Carolina. He researches a range of topics, including globalization and business, international management, global strategy, competitive analysis, and corporate governance. His work on these topics has been published in leading scholarly journals, including the *Journal of International Business Studies*, *Management International Review*, *Law and Society Review*, and *Academy of Management Journal*. In addition, he has served on the editorial boards of the *Journal of International Business Studies* and *Management International Review*. Professor Sullivan has been honored for both his research and teaching, receiving grants and winning awards for both activities while at the University of Delaware and, his former affiliation, the Freeman School of Tulane University. He has been awarded numerous teaching honors at the undergraduate,

M.B.A., and E.M.B.A. levels—most notably, he has been voted Outstanding Teacher by the students of 17 different Executive M.B.A. classes at the University of Delaware and Tulane University. Professor Sullivan has taught, designed, and administered a range of graduate, undergraduate, and nondegree courses on topics spanning globalization and business, international business operations, international management, strategic perspectives, executive leadership, and corporate strategy. In the United States, he has delivered lectures and courses at several university sites and company facilities. In addition, he has led courses in several foreign countries, including China, Hong Kong, Bulgaria, the Czech Republic, France, South Korea, Switzerland, Taiwan, and the United Kingdom. Finally, he has worked with many managers and consulted with several multinational enterprises on issues of international business.

# CHAPTER 1

## Globalization and International Business

### OBJECTIVES

After studying this chapter, you should be able to

1. Define *globalization* and *international business* and explain how they affect each other
2. Grasp why companies engage in international business and why its growth has accelerated
3. Discuss globalization's future and the major criticisms of it
4. Illustrate the different ways a company can accomplish its global objectives
5. Recognize the need to apply social science disciplines to understand how international and domestic business differ

Dutourdumonde/Alamy

## CASE

# The Globalized Business of Sports

Sports may be the most globalized legitimate business in the world.<sup>1</sup> Historically, most players and teams in most sports have competed only on their own home turf; today, however, fans demand to see the best, and “best” has become a global standard. Satellite TV brings live events from just about anywhere in the world to fans just about anywhere else. This gives the key players in the sports-promotion business—team owners, league representatives, and sports associations—broadened audience exposure, expanded fan bases, and augmented revenues, especially through advertising that cuts across national borders.

Nevertheless, competition among teams sponsored by national sports federations goes back more than a century, most notably the World Cup in football (soccer) and the Olympics. More national organizations participate in these events than there are countries in the United Nations. And probably more people follow these competitions than follow most of the goings-on at the UN. In fact, you were likely part of the record global television audience for at least some of the 2010 World Cup in South Africa and the 2012 Summer Olympics games in London. (The chapter’s opening photo shows Wenlock, the London games’ mascot, dressed as a Queen’s Guard. Hundreds of thousands of stuffed mascot toys were made in China and shipped to the games.)

How do these international competitions relate to business? Cities and countries compete to host the events in order to attract tourists and publicize to the world (especially potential investors) the opportunities that might exist for business. In turn, global companies pay for marketing rights as sponsors, such as the \$957 million paid by eleven companies for the London Olympics. For instance, Coca-Cola’s Facebook page enabled millions of Facebook visitors from dozens of countries to upload videos dealing with the games. Finally, individual athletes compete not only for medals, but also for lucrative contracts to endorse products. Michael Phelps’ swimming successes have led to contracts with Visa, Omega, Hilton, Procter & Gamble, Under Armour, Subway, and HP.

While the participation in the Olympics and the World Cup has long been global, the location of competition has been less so, largely because of the cost of staging the events. This is now changing. The 2010 World Cup was the first in Africa. The first South American Olympics is scheduled for Brazil in 2016, and the first Middle East World Cup is slated for Qatar in 2022.

## THE INTERNATIONAL JOB MARKET

Because more fans expect to see the world’s best teams and players, the search for talent has become worldwide. You can now find U.S. and European professional basketball scouts in remote areas of Nigeria looking for tall high-potential youngsters. Baseball agents have opened live-in training camps for teenagers in the Dominican Republic in exchange for a percentage of any of their future professional signing bonuses. Keep in mind, though, that assembling talent is necessary but insufficient for making a sports business successful. Shrewd marketing and financial management are crucial too. For instance, the Barcelona football club, arguably the best professional soccer team in recent years, has turned to young business graduates to help turn around its financial problems.

Most of today’s top-notch athletes are willing to follow the money wherever it may take them. For example, many of the best Brazilian soccer players are with European teams that offer much higher payrolls than their Brazilian counterparts. England’s professional soccer league (Premiership) includes players from about 70 countries, which helps improve the caliber of play and increase the TV fan base outside England.

## How the ATP Courts Worldwide Support

If you’re a fan of individual sports, you’ve probably noticed that players are globe hoppers. Take tennis. No single country boasts enough interested fans to keep players at home for year-round competition, yet today’s top-flight tennis pros come from every continent except Antarctica. For 2013, the Association of Tennis Professionals (ATP) sanctioned 64 tournaments in 31 countries. It also requires member pros to play in a certain number of events—and thus stop over in a number of countries—to maintain international rankings.

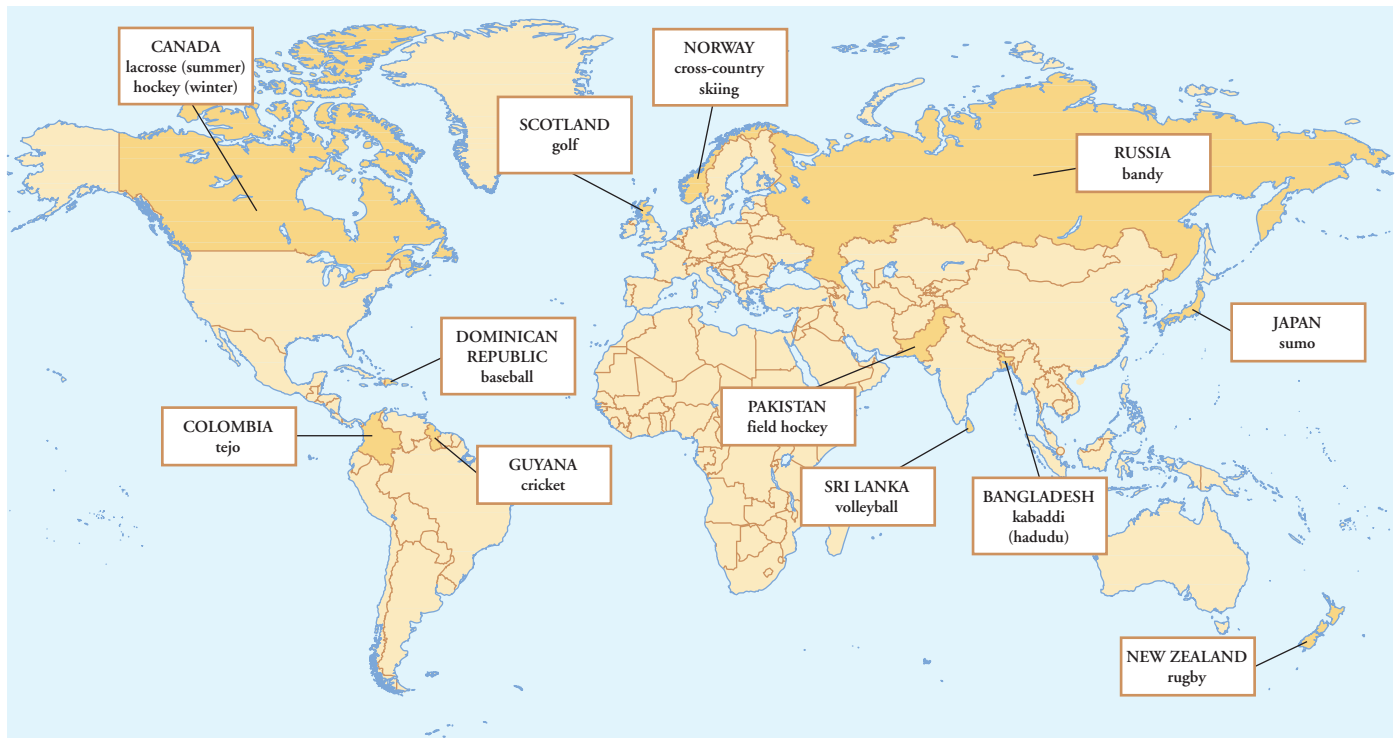

Because no tennis pro can possibly play in every tournament, organizers must attract enough top draws to fill stadium seats and land lucrative TV contracts. So tournaments compete for top-billed stars, not only with other tournaments but also with such regular international showcases as the Olympics and the Davis Cup. Prizes for two weeks’ worth of expert serving and volleying can be extremely generous (about US \$2.55 million for the 2013 singles champions of the Australian Open).

Remember, too, that tournaments earn money through ticket sales, corporate sponsorship agreements, television contracts, and leasing of advertising space. The more people in the stadium and TV audience, the more sponsors and

## MAP 1.1 Examples of National Sports

Some 33 countries have either defined a national sport by law or de facto have a national sport. Some national sports are shared by more than one country, such as cricket by six former British colonies in the Caribbean. Some others have been established to protect an historical heritage, such as tejo in Colombia. Note also that Canada has two designations, one for winter and one for summer.

Source: The information on sports was taken from Wikipedia, [http://en.wikipedia.org/wiki/National\\_sport](http://en.wikipedia.org/wiki/National_sport) (accessed January 30, 2013)

advertisers will pay to get their attention. Moreover, international broadcasts attract sponsorship from international companies. The partner and sponsor list for the 2013 Australian Open tennis tournament included a South Korean automaker (Kia), a Dutch brewer (Heineken), a Swiss watchmaker (Rolex), a French clothing company (Lacoste), and a U.S. sporting goods firm (Wilson). Such sponsorship of world-watched sporting events generally gets companies in a higher market growth rate.

### From National to International Sports Pastimes

Some countries have legally designated a national sport as a means of preserving traditions; others effectively have one. Map 1.1 shows a sample of these. However, other sports have sometimes replaced national sports in popularity, such as cricket replacing field hockey as India's most popular sport.

The International Baseball Federation now has over 100 member countries, even though baseball was popular only in its North American birthplace for most of its history. As TV revenues flattened in North America, Major League Baseball (MLB) began broadcasting games to international audiences. Increased exposure not only broadened the global fan base, it also showed youngsters all over the world how the game was played. As late as 1986, only 14 percent of MLB players were born outside the United States; by 2013, that number had climbed to over 28 percent. The average MLB clubhouse is now a bastion of multilingual camaraderie, with players and coaches talking baseball in Spanish, Japanese, Mandarin, and Korean as well as English.

### THE WIDE WORLD OF TELEVISED SPORTS

Not surprisingly, other professional sports groups have expanded their global TV coverage (and marketing programs). Most viewers of Stanley Cup hockey watch from outside North America. Fans watch NASCAR

aces (National Association for Stock Car Auto Racing) in more than 120 countries and NBA games in about 200. If you lived in Tunisia and enjoyed simultaneous access to multiple TV channels, you could watch more hours of NBA action than there are hours in the year.

TV isn't the only means by which sports organizations are seeking foreign fan bases and players. The National Football League (NFL) of the United States underwrites football programs in Chinese schools and is playing some regular NFL games in Europe. The NBA has appointed a director of basketball operations for India to help build youth leagues there. With the growth of broadband, we'll soon enter the realm of thousand-channel TV, where we'll be able to tune into sporting events that currently appeal only to highly localized niche markets. How about Thai boxing or Japanese sumo wrestling?

### The Top-Notch Pro as Upscale Brand

Many top players are effectively global brands because of their sports success and usually because of good looks and pleasing personalities as well. Philippine boxer Manny Pacquiao, Russian tennis pro Maria Sharapova, Portuguese soccer forward Cristiano Ronaldo (he has over 50 million fans on Facebook), and U.S. basketball star LeBron James are so popular globally that companies within and outside the sports industry are willing to pay them millions of dollars for endorsing clothing, equipment, and other products.

### Promotion as Teamwork

A few teams, such as the New York Yankees in baseball, the New Zealand All Blacks in rugby, and Manchester United (Man U) in soccer also have enough brand-name cachet to be global brands for selling clothing and other items to fans around the world. Just about every team can get something for the rights to use its logo, while some have enough name recognition to support global chains of retail outlets. Similarly, companies both sponsor and seek endorsements from well-known teams. For instance, Nike, the U.S. sports shoes and apparel giant, has fought hard to become the top sportswear and equipment supplier to European soccer teams. The success of this campaign has stimulated Nike's international sales to become greater than those in the United States.

Many nonsports companies, such as Canon (cameras, office equipment), Sharp (consumer electronics), and Carlsberg (beer), sponsor teams mainly to get corporate logos emblazoned on uniforms. Still others, such as United Airlines in Chicago, pay for the naming rights to arenas and other venues. Of course, teams themselves can be attractive international investments. For instance, the owners of the Boston Red Sox baseball team (U.S.A.) bought the Liverpool Football Club of the United Kingdom.

### Sports and You

What does all this mean to you as a sports fan? Chances are you fantasized at one time about going pro in some sport, but you've probably given up that fantasy and settled into the role of spectator. Now that pro sports has become a global phenomenon (thanks to better communications), you can enjoy a greater variety—and a higher level of competition—than any generation before you.

That's the upside, but we must point out that people don't always take easily to another country's sport. Despite many efforts, cricket, although popular in countries that were British colonies for centuries, has never become popular elsewhere. (In post-colonial United States, it was popular, but it gradually gave way to baseball.) Nor has American football gained much popularity outside the United States. A former NFL lineman expressed a reason: that rules for cricket and American football are so complicated that one must learn them as children. However, basketball and soccer have traveled to new markets more readily because they are easier to understand and require no specialized equipment.

Further, there is disagreement about the economic effect of successfully winning a bid to host big international competitions such as the World Cup and Olympics. On the one hand, they help spur tourism, foreign investment, infrastructure construction, and improvement of blighted areas that will speed future economic growth. (The cost of building facilities for the 2012 London Olympics was

about \$15 billion.) On the other hand, in light of threats from global terrorism the cost of security has skyrocketed, while hosts may have to spend on stadiums and facilities that have no use afterward. Many competitions have ended with substantially increased local and national debt.

Nor is everyone happy with the unbridled globalization of sports—or at least with some of the effects. Brazilian soccer fans lament the loss of their best players, and French fans protested the purchase of the Paris Saint-Germain (PSG) football club by the Qatar Investment Authority. ■

## QUESTIONS

- ★1-1. Professional athlete A is a star, and professional athlete B is an average player. How has the globalization of professional sports affected each of these both positively and negatively?
- ★1-2. As you read the chapter, identify and show an example of each international mode of operations that is illustrated in the globalization of professional sports.

## INTRODUCTION

**Globalization** refers to the widening set of interdependent relationships among people from different parts of a world that happens to be divided into nations. The term sometimes refers to the elimination of barriers to international movements of goods, services, capital, technology, and people that influence the integration of world economies.<sup>2</sup> Throughout history, wider human connections have expanded people's access to more varied resources, products, services, and markets. We've altered the way we want and expect to live, and we've become more deeply affected (positively and negatively) by conditions outside our immediate domains.

The opening case shows how far-flung global contact allows the world's best sports talent to compete, and their fans to watch them, just about anywhere. Likewise, managers in almost every industry consider ever more distant places as sources of supplies and markets. As consumers we know from "Made in" labels that we commonly buy products from all over the world, but these labels do not tell us everything. So many different components, ingredients, and specialized business activities from different countries go into products that it's often a challenge to say exactly where they were made. Belgium is renowned for its chocolate, but a Belgian Neuhaus bonbon includes ingredients from the Ivory Coast, Philippines, Ecuador, São Tomé, and Venezuela.<sup>3</sup> Because Apple ships its iPhones from China, they appear to be Chinese products, but less than 4 percent of their value is created in China.<sup>4</sup>

## HOW DOES INTERNATIONAL BUSINESS FIT IN?

Globalization enables us to get more variety, better quality, or lower prices. Our daily meals contain spices that aren't grown domestically and fresh produce that's out of season in one local climate or another. Our cars cost less than they would if all the parts were made and the labor performed in one place. All of these connections between supplies and markets result from the activities of **international business**, defined as all commercial transactions, including sales, investments, and transportation, that take place between two or more countries. Private companies undertake such transactions for profit; governments may undertake them either for profit or for other reasons.

**The Study of International Business** Why should you study international business? Simply, it makes up a large and growing portion of the world's business. Global events and competition affect almost all companies, large and small, regardless of industry. They sell output and secure supplies and resources abroad, and they compete against products, services, and companies from foreign countries. Thus, most managers need to take into account

International business consists of all commercial transactions between two or more countries.

- The goal of private business is to make profits.
- Government business may or may not be motivated by profit.

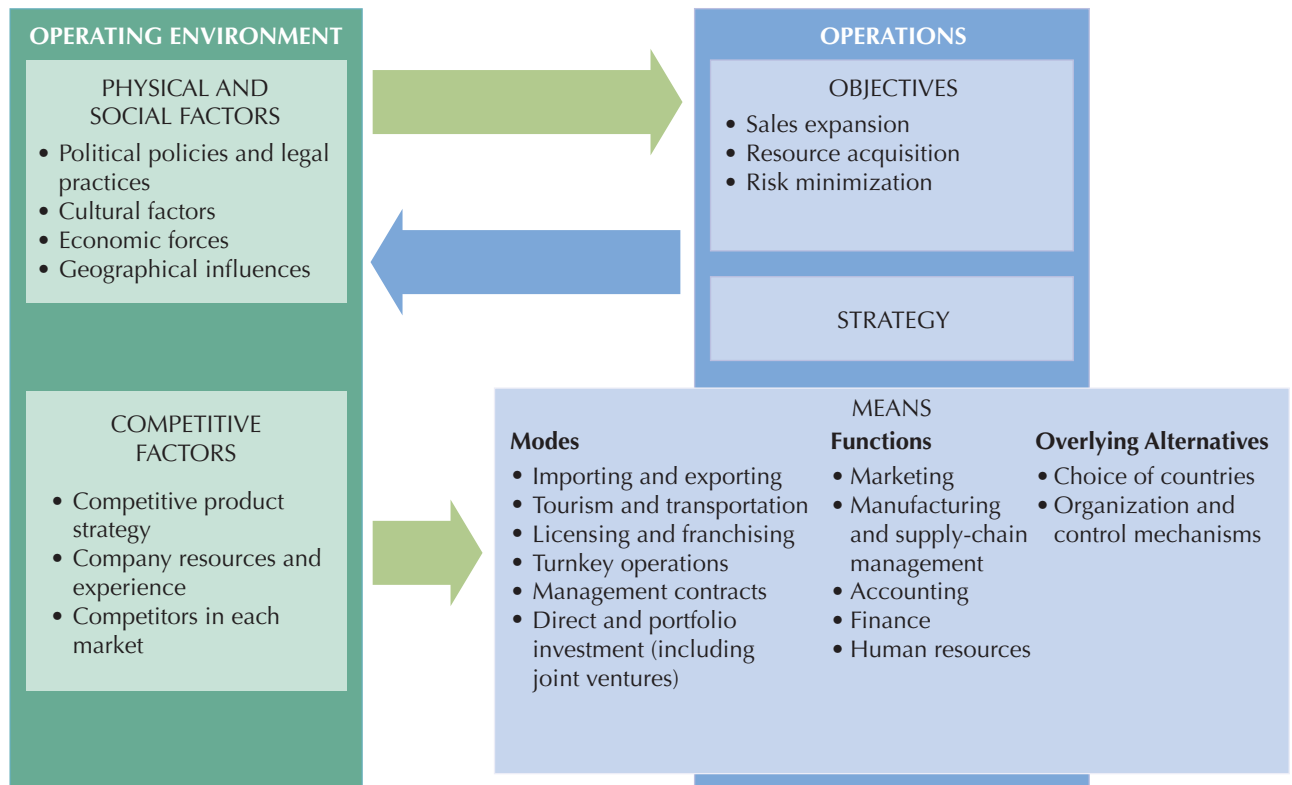

Studying international business is important because

- Most companies either are international or compete with international companies.
- Modes of operations may differ from those used domestically.
- The best way of conducting business may differ by country.
- An understanding helps you make better career decisions.
- An understanding helps you decide what governmental policies to support.

**FIGURE 1.1** Factors in International Business Operations

The conduct of a company's international operations depends on two factors: its objectives and the means by which it intends to achieve them. Likewise, its operations affect, and are affected by, two sets of factors: physical/social and competitive.

international business when setting their operating strategies and practices. Like the NBA teams in the opening case, which search globally for talent and additional markets, as a manager in almost any industry you'll need to consider (1) where you can obtain the best required inputs at the best possible price and (2) where you can best sell the product or service you've put together from those inputs.

**Understanding the Environment/Operations Relationship** The best way to do business abroad may not be the same as the best way at home. Why? First, when your company operates internationally, it will engage in *modes* of business, such as exporting and importing, which differ from those it uses domestically. Second, physical, social, and competitive conditions differ among countries and affect the optimum ways to conduct business. Thus, international companies have more diverse and complex operating environments than purely domestic ones. Figure 1.1 outlines the set of relationships between international environments and operations.

Even if you never have direct international business responsibilities, understanding some of the complexities may be useful to you. Companies' international operations and their governmental regulations affect overall national conditions—economic growth, employment, consumer prices, national security—as well as the success of individual industries and firms. A better understanding of international business will help you make more informed decisions, such as where you want to work and what governmental policies you want to support.

#### Globalization

- Has been growing.
- Is less pervasive than generally thought.
- Has economic and non-economic dimensions.
- Is stimulated by several factors.

## THE FORCES DRIVING GLOBALIZATION

Measuring globalization is problematic, especially for historical comparisons. First, a country's interdependence must be measured indirectly.<sup>5</sup> Second, when national boundaries shift, such as in the breakup of the former Soviet Union or the reunification of East and West
