Research Methods for Business Students

Pearson

At Pearson, we have a simple mission: to help people make more of their lives through learning.

We combine innovative learning technology with trusted content and educational expertise to provide engaging and effective learning experiences that serve people wherever and whenever they are learning.

From classroom to boardroom, our curriculum materials, digital learning tools and testing programmes help to educate millions of people worldwide – more than any other private enterprise.

Every day our work helps learning flourish, and wherever learning flourishes, so do people.

How to use this book	xvii
Preface	xxiii
Contributors	xxv
1 Research, reflective diaries and the purpose of this book	2
<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
Learning outcomes	2
1.1 Introduction	2
1.2 The nature of research	4
1.3 Business and management research	6
1.4 The research process	12
1.5 Keeping a reflective diary or research notebook	14
1.6 The purpose and structure of this book	16
1.7 Summary	20
Self-check questions	21
Review and discussion questions	21
Progressing your research project: Starting your reflective diary or notebook	22
References	22
Further reading	23
Case 1: A reflective journal? . . . About research? . . . Where do I even begin?	25
<i>Emily A Morrison</i>	
Self-check answers	27

2	Generating a research idea and developing your research proposal	28
	<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
	Learning outcomes	28
2.1	Introduction	28
2.2	Characteristics of good research ideas	30
2.3	Generating research ideas	33
2.4	Refining research ideas	40
2.5	Developing your overarching research question	42
2.6	Writing a research aim and set of research objectives	45
2.7	The importance of theory	48
2.8	The need for a research proposal	55
2.9	Structuring your research proposal	57
2.10	Summary	62
	Self-check questions	63
	Review and discussion questions	63
	Progressing your research project: Choosing a research topic and developing your research proposal	64
	References	64
	Further reading	66
	Case 2: Keza's research aim formulation	67
	<i>Adina Dudau</i>	
	Self-check answers	69
3	Critically reviewing the literature	72
	<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
	Learning outcomes	72
3.1	Introduction	72
3.2	Being 'critical' and the purposes and forms of review	75
3.3	The content and structure of a critical review	80
3.4	Literature sources	83
3.5	Planning your literature search	91
3.6	Conducting your literature search	94
3.7	Reading critically and evaluating the literature	105
3.8	Note-taking and referencing	107
3.9	Using systematic review	110
3.10	Drafting the critical review	113
3.11	A note about plagiarism	116
3.12	Summary	117

Self-check questions	118
Review and discussion questions	119
Progressing your research project: Critically reviewing the literature	120
References	120
Further reading	122
Case 3: Shaping powerful questions when reviewing the literature	123
<i>Mat Hughes</i>	
Self-check answers	126
4 Understanding research philosophy and approaches to theory development	128
<i>Mark NK Saunders, Philip Lewis, Adrian Thornhill and Alexandra Bristow</i>	
Learning outcomes	128
4.1 Introduction	128
4.2 The philosophical underpinnings of business and management	131
4.3 Research paradigms	140
4.4 Five management philosophies	145
4.5 Approaches to theory development	154
4.6 Summary	161
Self-check questions	163
Review and discussion questions	163
Progressing your research project: Heightening your Awareness of your Research Philosophy (HARP)	163
References	167
Further reading	170
Case 4: Working out your philosophical assumptions	171
<i>Natasha Mauthner</i>	
Self-check answers	174
5 Formulating the research design	176
<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
Learning outcomes	176
5.1 Introduction	176
5.2 Achieving a coherent research design	178
5.3 The research purpose	179
5.4 Methodological choice: choosing a quantitative, qualitative or mixed methods research design	181

5.5	Developing a coherent research strategy	191
5.6	Considering time horizons	212
5.7	Anticipating potential ethical issues	213
5.8	Assessing the quality of research design	214
5.9	Recognising your role as researcher	220
5.10	Summary	222
	Self-check questions	223
	Review and discussion questions	224
	Progressing your research project: Deciding on your research design	224
	References	225
	Further reading	228
	Case 5: Internationalizing strategy: Developing small firms and their local communities via engaged scholarship	229
	<i>Fariba Darabi and Jonathan M Scott</i>	
	Self-check answers	231
6	Negotiating access and research ethics	234
	<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
	Learning outcomes	234
6.1	Introduction	234
6.2	Characteristics of access	236
6.3	Researcher status	240
6.4	Internet-mediated access	242
6.5	Strategies to gain access	245
6.6	Research ethics and acting ethically	253
6.7	Ethical issues at specific research stages	262
6.8	Data protection principles	274
6.9	Summary	276
	Self-check questions	277
	Review and discussion questions	278
	Progressing your research project: Negotiating access and addressing ethical issues	278
	References	279
	Further reading	280
	Case 6: Onboarding practices and employee retention	281
	<i>Josephine LaPointe</i>	
	Self-check answers	284

7	Selecting samples	288
	<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
	Learning outcomes	288
7.1	Introduction	289
7.2	The need to sample	291
7.3	An overview of sampling procedures	293
7.4	Probability sampling – sampling frame	295
7.5	Probability sampling – sample size	297
7.6	Probability sampling – procedures	304
7.7	Probability sampling – representativeness	312
7.8	Non-probability sampling – sample size	313
7.9	Non-probability sampling – procedures	316
7.10	Mixed and multi-stage sampling designs	325
7.11	Summary	327
	Self-check questions	328
	Review and discussion questions	331
	Progressing your research project: Using sampling as part of your research	332
	References	332
	Further reading	334
	Case 7: Female ride share app drivers' careers in Tehran	335
	<i>Mina Beigi, Shahrzad Nayyeri and Melika Shirmohamma</i>	
	Self-check answers	337
8	Obtaining and evaluating secondary data	342
	<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
	Learning outcomes	342
8.1	Introduction	342
8.2	Types of secondary data and uses in research	345
8.3	Advantages of secondary data	358
8.4	Disadvantages of secondary data	360
8.5	Searching for and locating secondary data	364
8.6	Evaluating and selecting secondary data sources	370
8.7	Summary	378
	Self-check questions	379
	Review and discussion questions	380
	Progressing your research project: Assessing utility, selecting and incorporating secondary data in your research	381
	References	381
	Further reading	384

Case 8: Investigating refugees' challenges in setting up a business	385
<i>Megan Miralles, Marc Stierand and Viktor Dörfler</i>	
Self-check answers	387
9 Collecting primary data using observation	390
<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
Learning outcomes	390
9.1 Introduction	390
9.2 Observation choices	392
9.3 Participant observation	400
9.4 Structured observation	410
9.5 Internet-mediated observation	418
9.6 Recording video	422
9.7 Creating static images	426
9.8 Audio recording	429
9.9 Summary	431
Self-check questions	432
Review and discussion questions	433
Progressing your research project: Deciding on the appropriateness of observation	433
References	434
Further reading	435
Case 9: Observing leadership and team dynamics using simulation	436
<i>Trevor Morrow</i>	
Self-check answers	438
10 Collecting primary data using interviews and diaries	440
<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
Learning outcomes	440
10.1 Introduction	440
10.2 Standardisation and structure in questioning	442
10.3 Interview mediums and modes	448
10.4 The potential of semi-structured and in-depth interviews	450
10.5 Data quality issues and evaluating interviewing practice	452

10.6	Preparing for semi-structured or in-depth interviewing	459
10.7	Conducting one-to-one face-to-face interviews	465
10.8	Conducting one-to-one online interviews	477
10.9	Conducting one-to-one telephone interviews	479
10.10	Conducting group interviews and focus groups	481
10.11	Conducting visual interviews	485
10.12	Using diaries and diary studies	488
10.13	Summary	494
	Self-check questions	494
	Review and discussion questions	496
	Progressing your research project: Using research interviews and research diaries	497
	References	497
	Further reading	500
	Case 10: Conducting audio diaries of work-life conflict	501
	<i>Catherine Cassell</i>	
	Self-check answers	503
11	Collecting primary data using questionnaires	506
	<i>Mark NK Saunders, Philip Lewis and Adrian Thornhill</i>	
	Learning outcomes	506
11.1	Introduction	506
11.2	Questionnaires: an overview	509
11.3	Deciding what data need to be collected	514
11.4	Questionnaire validity and reliability	520
11.5	Designing individual questions	523
11.6	Designing the questionnaire	539
11.7	Pilot testing	548
11.8	Distributing the questionnaire	549
11.9	Summary	557
	Self-check questions	558
	Review and discussion questions	560
	Progressing your research project: Using questionnaires in your research	560
	References	561
	Further reading	563
	Case 11: Assessing the utility of questionnaire scales	564
	<i>Sarah Forbes</i>	
	Self-check answers	566

12	Analysing data quantitatively	572
	<i>Mark NK Saunders, Philip Lewis, Adrian Thornhill and Catherine Wang</i>	
	Learning outcomes	572
12.1	Introduction	572
12.2	Data types and precision of measurement	575
12.3	Preparing data for quantitative analysis	579
12.4	Data entry and checking	585
12.5	Exploring and presenting data: an overview	590
12.6	Exploring and presenting individual variables	593
12.7	Exploring and comparing two or more variables	602
12.8	Describing data using statistics	607
12.9	Statistical tests' assumptions and hypothesis testing	613
12.10	Examining associations and differences	621
12.11	Assessing the strength of relationships	626
12.12	Making predictions	630
12.13	Examining trends	634
12.14	Summary	636

Supporting resources

Visit www.pearsoned.co.uk/saunders to find valuable online resources:

Companion Website for students

- Multiple-choice questions to test your learning
- Tutorials and datasets for Excel and SPSS
- Updated research datasets to practise with
- Updated additional case studies with accompanying questions
- Smarter Online Searching Guide – how to make the most of the Internet in your research
- Online glossary

For instructors

- Complete, downloadable Instructor's Manual
- PowerPoint slides that can be downloaded and used for presentations

Also: The regularly maintained Companion Website provides the following features:

- Search tool to help locate specific items of content
- Email results and profile tools to send results of quizzes to instructors
- Online help and support to assist with website usage and troubleshooting

For more information please contact your local Pearson Education sales representative or visit www.pearsoned.co.uk/saunders.

How to use this book

This book is written with a progressive logic, which means that terms and concepts are defined when they are first introduced. One implication of this is that it is sensible for you to start at the beginning and to work your way through the text, various boxes, self-check questions, review and discussion questions, case studies and case study questions. You can do this in a variety of ways depending on your reasons for using this book. However, this approach may not be suitable for your purposes, and you may wish to read the chapters in a different order or just dip into particular sections of the book. If this is true for you then you will probably need to use the glossary to check that you understand some of the terms and concepts used in the chapters you read. Suggestions for three of the more common ways in which you might wish to use this book follow.

As part of a research methods course or for self-study for your research project

If you are using this book as part of a research methods course the order in which you read the chapters is likely to be prescribed by your tutors and dependent upon their perceptions of your needs. Conversely, if you are pursuing a course of self-study for your research project, dissertation or consultancy report, the order in which you read the chapters is your own choice. However, whichever of these you are, we would argue that the order in which you read the chapters is dependent upon your recent academic experience.

For many students, such as those taking an undergraduate degree in business or management, the research methods course and associated project, dissertation or consultancy report comes in either the second or the final year of study. In such situations it is probable that you will follow the chapter order quite closely (see Figure P.1). Groups of chapters within which we believe you can switch the order without affecting the logic of the flow too much are shown on the same level in this diagram and are:

- those associated with obtaining or collecting data (Chapters 8, 9, 10 and 11);
- those associated with data analysis (Chapters 12 and 13).

Within the book we emphasise the importance of beginning to write early on in the research process as a way of clarifying your thoughts. In Chapter 1 we encourage you to keep a reflective diary, notebook or journal throughout the research process so it is helpful to read this chapter early on. We recommend you also read the sections in Chapter 14 on writing prior to starting to draft your critical review of the literature (Chapter 3).

Alternatively, you may be returning to academic study after a gap of some years, to take a full-time or part-time course such as a Master of Business Administration, a Master of Arts or a Master of Science with a Business and Management focus. Many students in such situations need to refresh their study skills early in their programme, particularly

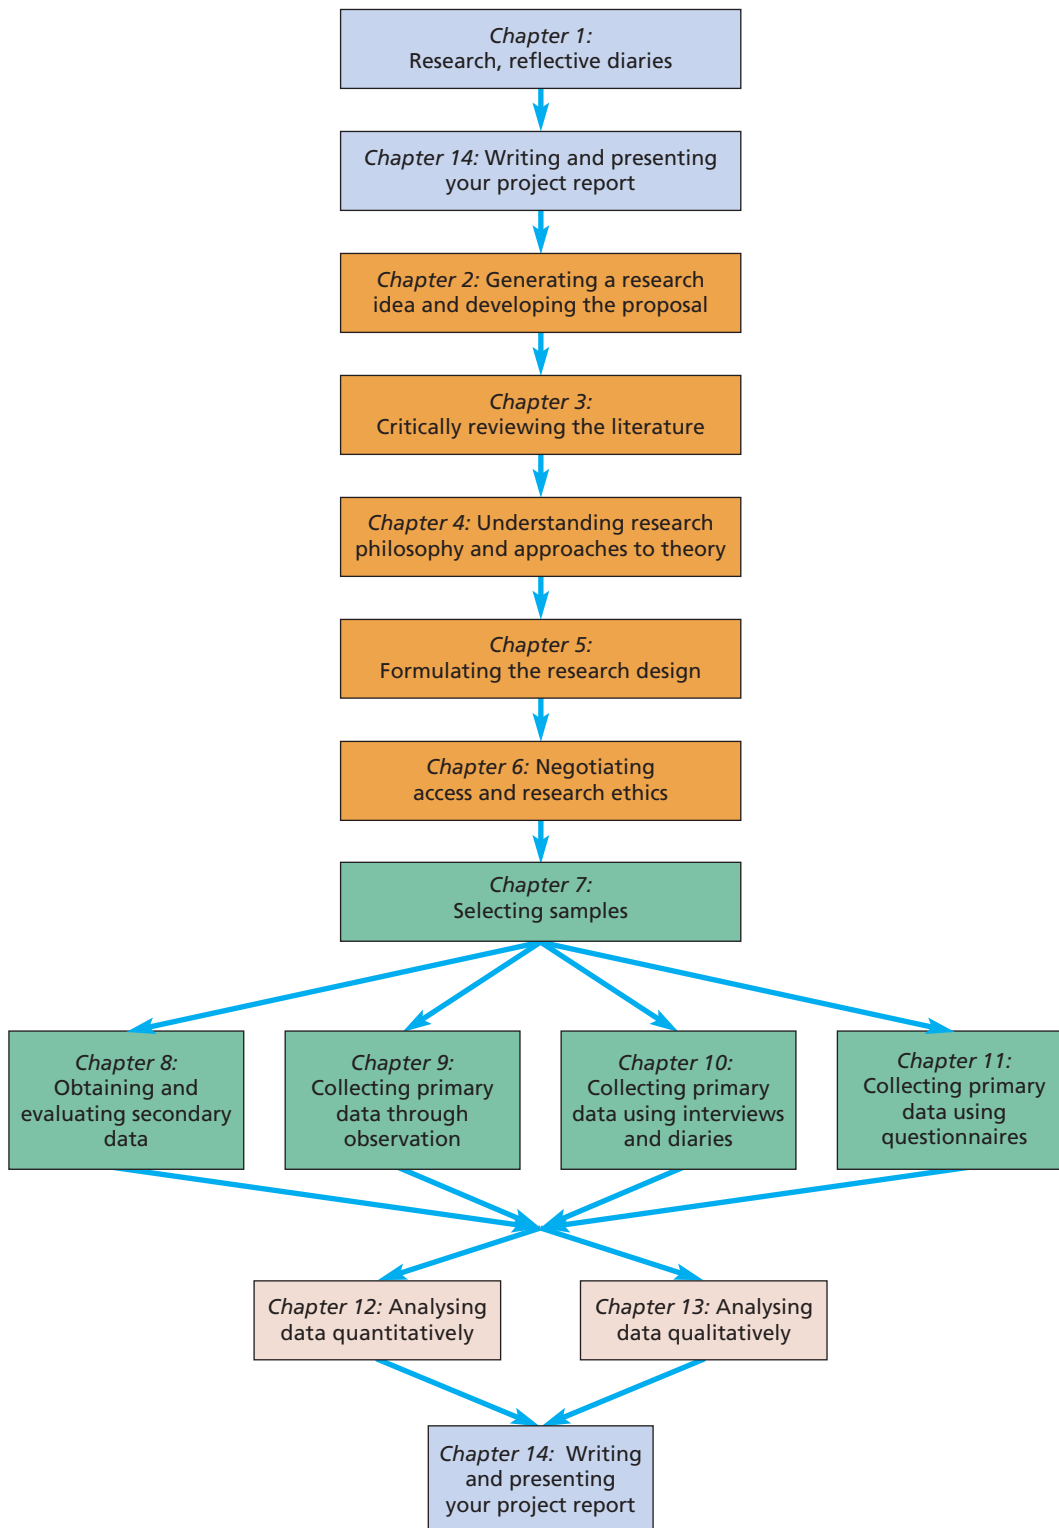

Figure P.1 Using this book for your research methods course and associated project

those associated with critical reading of academic literature and academic writing. If you feel the need to do this, you may wish to start with those chapters that support you in developing and refining these skills (Chapters 3 and 14), followed by Chapter 8, which introduces you to the range of secondary data sources available that might be of use for other assignments (Figure P.2). Once again, groups of chapters within which we believe

Figure P.2 Using this book as a returner to academic study

you can switch the order without affecting the logic of the flow too much are shown on the same level in the diagram and are:

- those chapters associated with primary data collection (Chapters 9, 10 and 11);
- those associated with data analysis (Chapters 12 and 13).

In addition, we would recommend that you re-read Chapter 14 prior to starting to write your project report, dissertation or consultancy report, or if you need to undertake a presentation.

In whichever order you choose to read the chapters, we would recommend that you attempt all the self-check questions, review and discussion questions and those questions associated with the case studies. Your answers to the self-check questions can be self-assessed using the answers at the end of each chapter. However, we hope that you will actually attempt each question prior to reading the answer! If you need further information on an idea or a technique, then first look at the references in the further reading section.

At the end of each chapter, the section headed 'Progressing your research project' lists a number of tasks. Such tasks might involve you in just planning a research project or, alternatively, designing and distributing a questionnaire of your own. They all include making an entry in your reflective diary or notebook. When completed, these tasks will provide a useful aide-mémoire for assessed work (including a reflective essay or learning log) and can be used as the basis for the first draft of your project report. It is worth pointing out here that many consultancy reports for organisations do not require you to include a review of the academic literature.

As a guide through the research process

If you are intending to use this book to guide you through the research process for a research project you are undertaking, such as your dissertation, we recommend that you read the entire book quickly before starting your research. In that way you will have a good overview of the entire process, including a range of techniques available, and will be better able to plan your work.

After you have read the book once, we suggest that you re-read Section 1.5 on keeping a reflective diary or notebook and Sections 14.2–14.10 on writing first. Then work your way through the book again following the chapter order. This time you should attempt the self-check questions, review and discussion questions and those questions associated with each case study to ensure that you have understood the material contained in each chapter prior to applying it to your own research project. Your responses to self-check questions can be assessed using the answers at the end of each chapter.

If you are still unsure as to whether particular techniques, procedures or ideas are relevant, then pay special attention to the 'Focus on student research', 'Focus on management research' and 'Focus on research in the news' boxes. 'Focus on student research' boxes are based on actual students' experiences and illustrate how an issue has been addressed or a technique or procedure used in a student's research project. 'Focus on management research' boxes discuss recent research articles in established refereed academic journals, allowing you to see how research is undertaken successfully. These articles are easily accessible via the main online business and management databases. 'Focus on research in the news' boxes provide topical news stories of how particular research techniques, procedures and ideas are used in the business world. You can also look in the 'Further reading' for other examples of research where these have been used. If you need further

information on an idea, technique or procedure then, again, start with the references in the further reading section.

Material in some of the chapters is likely to prove less relevant to some research topics than others. However, you should beware of choosing techniques because you are happy with them, if they are inappropriate. Completion of the tasks in the section headed 'Progressing your research project' at the end of Chapters 2–13 will enable you to generate all the material that you will need to include in your research project, dissertation or consultancy report. This will also help you to focus on the techniques and ideas that are most appropriate to your research. When you have completed these tasks for Chapter 14 you will have written your research project, dissertation or consultancy report and also prepared a presentation using slides or a poster.

As a reference source

It may be that you wish to use this book now or subsequently as a reference source. If this is the case, an extensive index will point you to the appropriate page or pages. Often you will find a 'checklist' box within these pages. 'Checklist' boxes are designed to provide you with further guidance on the particular topic. You will also find the contents pages and the glossary useful reference sources, the latter defining over 750 research terms. In addition, we have tried to help you to use the book in this way by including cross-references between sections in chapters as appropriate. Do follow these up as necessary. If you need further information on an idea or a technique then begin by consulting the references in the further reading section. Wherever possible we have tried to reference books that are in print and readily available in university libraries and journal articles that are in the major business and management online databases.

Pearson's Commitment to Diversity, Equity and Inclusion

Pearson is dedicated to creating bias-free content that reflects the diversity, depth and breadth of all learners' lived experiences. We embrace the many dimensions of diversity including, but not limited to, race, ethnicity, gender, sex, sexual orientation, socioeconomic status, ability, age and religious or political beliefs.

Education is a powerful force for equity and change in our world. It has the potential to deliver opportunities that improve lives and enable economic mobility. As we work with authors to create content for every product and service, we acknowledge our responsibility to demonstrate inclusivity and incorporate diverse scholarship so that everyone can achieve their potential through learning. As the world's leading learning company, we have a duty to help drive change and live up to our purpose to help more people create a better life for themselves and to create a better world.

Our ambition is to purposefully contribute to a world where:

- Everyone has an equitable and lifelong opportunity to succeed through learning.
- Our educational products and services are inclusive and represent the rich diversity of learners.
- Our educational content accurately reflects the histories and lived experiences of the learners we serve.
- Our educational content prompts deeper discussions with students and motivates them to expand their own learning and worldview.

We are also committed to providing products that are fully accessible to all learners. As per Pearson's guidelines for accessible educational Web media, we test and retest the capabilities of our products against the highest standards for every release, following the WCAG guidelines in developing new products for copyright year 2022 and beyond. You can learn more about Pearson's commitment to accessibility at:

<https://www.pearson.com/us/accessibility.html>

While we work hard to present unbiased, fully accessible content, we want to hear from you about any concerns or needs regarding this Pearson product so that we can investigate and address them.

- Please contact us with concerns about any potential bias at:
<https://www.pearson.com/report-bias.html>
- For accessibility-related issues, such as using assistive technology with Pearson products, alternative text requests, or accessibility documentation, email the Pearson Disability Support team at:

Preface

In writing the ninth edition of *Research Methods for Business Students* we have, alongside the many comments we have received regarding previous editions, considered the implications of the Covid-19 pandemic for undertaking research. The pandemic invariably caused us to adapt the way we do research posing new challenges for gaining access and recruiting people to take part, and in the collecting of data (Nind et al., 2021). Alongside an already growing use of online questionnaires, there was a shift from face-to-face to online and telephone interviews. The former of these made considerable use of cloud based video-conferencing and the latter computer assisted telephone interviewing. Ethnographic, diary and other expressive methods were also used more widely.

In response to these challenges and over developments we have fully revised the book, expanding our consideration of online, ethnographic, diary and other expressive methods and the analysis of the resulting data. In particular: Chapter 1 now includes a discussion of responsible business research; Chapter 2 contains considerably more detail on developing research questions including using the AbC (Abstract, Context) rule; Chapter 4 now considers the interrelationships between paradigms and philosophies in more depth; Chapter 5 now considers engaged scholarship; Chapter 6 now considers Internet mediated access and associated issues of ethics in more detail; Chapter 7 discusses using purchased database lists and volunteer panels alongside more detailed discussions of sample size; Chapter 9 contains enlarged sections on using researcher and informant created videos, static images and audio recordings in observation; Chapter 10 has a new section on evaluating interview practice looking at conversational space mapping and language cleanliness; Chapter 11 now provides an overview of scale development; Chapter 13 includes more detail on transcription and thematic coding, including using the Gioia method; Chapter 14 includes more detailed advice regarding using quotations from transcripts, diaries and other documentary data, as well as on poster design; and we have developed further the Glossary, which now includes over 750 research-related terms. New case studies at the end of each chapter have been developed with colleagues, providing up-to-date scenarios through which to illustrate issues associated with undertaking research. Alongside this we have also taken the opportunity to update many examples and revise the tables of Internet addresses.

As in previous editions, we have taken a predominantly non-software-specific approach in our discussion of methods. By doing this, we have been able to focus on the general principles needed to utilise a range of analysis software and the Internet effectively for research. However, recognising that many students have access to sophisticated data collection and analysis software and may need help in developing these skills, we continue to provide access to up-to-date 'teach yourself' guides to Qualtrics™, IBM SPSS Statistics™, Excel™ and Internet searching via the book's website (www.pearsoned.co.uk/saunders). Where appropriate, these guides are provided with data sets. In the preparation of the ninth edition we were fortunate to receive considerable feedback from colleagues and students

in universities throughout the world. We are extremely grateful to all the reviewers who gave their time and shared their ideas.

Inevitably, the body of knowledge of research methods has developed further since 2019, and we have revised all chapters accordingly. Our experiences of teaching and supervising students and working through the methods in classes have suggested alternative approaches and the need to provide alternative material. Consequently, we have taken the opportunity to update and refine existing worked examples, remove those that were becoming dated, and develop new ones where appropriate. However, the basic structure remains much the same as the previous eight editions.

Other minor changes and updating have been made throughout. Needless to say, any errors of omission and commission continue to remain our responsibility.

As with previous editions, much of our updating has been guided by comments from students and colleagues, to whom we are most grateful. We should like particularly to thank students from University of Birmingham, and various Doctoral Symposiums for their comments on all of the chapters. Colleagues in both our own and other universities have continued to provide helpful comments, advice and ideas. We are particularly grateful to Heather Cairns-Lee, Zeineb Djebali, Colin Hughes, Emrah Karakaya, Juliet Kele, Amanda Lee, Ben Saunders, and Nicholas Wheeler for their insightful comments and help with early drafts of chapters. Colleagues and friends again deserve thanks for their assistance in providing examples of research across the spectrum of business and management, co-authoring chapters, writing case studies and in reviewing parts of this book: Neve Abgeller, Mina Beigi, Alexandra Bristow, Clare Burns, Catherine Cassell, Fariba Darabi, Viktor Dörfler, Adina Dudau, Sarah Forbes, Mat Hughes, Joséphine Lapointe, Natasha Mauthner, Megane Miralles, Emily Morrison, Trevor Morrow, Shahrzad Nayyeri, Jonathan Scott, Maura Sheehan, Melika Shirmohamma, Marc Stierand and Catherine Wang.

We would also like to thank all of the staff at Pearson (both past and present) who supported us through the process of writing the ninth edition. Our thanks go, in particular, to Vicky Tubb, our commissioning editor, and Kay Richardson our online content developer for their continuing support and enthusiasm throughout the process. We would also like to express our thanks to Andrew Muller as content producer and as copy-editor.

Contributors

Mark N.K. Saunders, BA, MSc, PGCE, PhD, Chartered FCIPD, is Professor of Business Research Methods at the Birmingham Business School, University of Birmingham. He is a Fellow of both the Academy of Social Sciences and the British Academy of Management. He currently holds visiting professorships at Mälardalen University in Sweden, University of Surrey and the University of Worcester. Mark teaches research methods to masters and doctoral students as well as supervising master's dissertations and research degrees. He has published articles on research methods, trust, and human resource aspects of the management of change, in journals such as *Annals of Tourism Research*, *British Journal of Management*, *Field Methods*, *Human Relations*, *Human Resource Management Journal*, *Journal of Small Business Management*, *Management Learning* and *Social Science and Medicine*. Mark is book series editor of the *Handbooks of Research Methods* (Edward Elgar) and co-series book editor of *Elgar Dissertation Companions* (Edward Elgar). He is co-editor of *How to Keep your Doctorate on Track*, *Keeping your Research on Project on Track*, the *Handbook of Research Methods on Human Resource Development* and the *Handbook of Research Methods on Trust* (all published by Edward Elgar). Mark has also written textbooks on business statistics, human resource management, and managing change. He continues to undertake consultancy in the public, private and not-for-profit sectors. Prior to becoming an academic, he had a variety of research jobs in the public sector. Mark also enjoys hill walking, and riding his motor-trike.

Philip Lewis, BA, PhD, MSc, Chartered MCIPD, PGDipM, Cert Ed, began his career in HR as a training adviser with the Distributive Industry Training Board. He subsequently taught HRM and research methods in three UK universities. He studied part-time for degrees with the Open University and the University of Bath, from which he gained an MSc in industrial relations and a PhD for his research on performance pay in retail financial services. He is co-author with Adrian and Mark of *Employee Relations: Understanding the Employment Relationship* and with Mark, Adrian, Mike Millmore and Trevor Morrow of *Strategic Human Resource Management* and with Adrian, Mark and Mike Millmore of *Managing Change: A Human Resource Strategy Approach*, all published by Pearson. He has undertaken consultancy in both public and private sectors.

Adrian Thornhill, BA, PhD, PGCE, Chartered FCIPD. Prior to his career as a university lecturer and Head of Department, he worked as an industrial relations researcher and in training and vocational education. He has also undertaken consultancy and training for a range of private and public-sector organisations. He has taught a range of subjects, including HRM, the management of change and research methods, to undergraduate, postgraduate and professional students. He has experience of supervising undergraduate and postgraduate dissertations, professional management projects and research degrees. Adrian has published a number of articles principally associated with employee and justice perspectives related to managing change and the management of organisational downsizing

and redundancy. He is co-author with Phil and Mark of *Employee Relations: Understanding the Employment Relationship*, with Phil, Mark, Mike Millmore and Trevor Morrow of *Strategic Human Resource Management* and with Phil, Mark and Mike Millmore of *Managing Change: A Human Resource Strategy Approach*, all published by Pearson. He has also co-authored a book on downsizing and redundancy.

Dr Neve Abgeller is a Lecturer in Organisation, Work and Employment at Birmingham Business School, University of Birmingham, UK.

Dr Mina Beigi is an Associate Professor in Organisational Behaviour and Human Resource Management in Southampton Business School, University of Southampton, UK.

Dr Alexandra Bristow is Senior Lecturer in Organisational Behaviour at the Open University Business School, UK.

Dr Clare JM Burns is a Sessional Academic in the Department of Business Strategy and Innovation at Griffith University, Brisbane, Australia.

Professor Catherine Cassell is Executive Dean of the Faculty of Business, Durham University Business School, UK.

Dr Fariba Darabi is a Senior Lecturer in International Business at the Business, Technology and Engineering College, Sheffield Business School, Sheffield Hallam University, UK.

Dr Viktor Dörfler is Senior Lecturer in Information & Knowledge Management at the University of Strathclyde Business School, UK.

Dr Adina I Dudau is a Senior Lecturer in Management at the Adam Smith Business School, University of Glasgow, UK.

Dr Sarah Forbes is a Senior Lecturer in the People, Operations and Marketing Group at the School for Business and Society, University of York, UK.

Dr Mat Hughes is Professor of Entrepreneurship and Innovation at the School of Business and Economics, Loughborough University, UK.

Joséphine Lapointe is a Postgraduate Researcher in the Department of Management at Birmingham Business School, University of Birmingham, UK.

Professor Natasha Mauthner is Professor of Social Science Philosophy and Method, and Director of Research, at the Newcastle University Business School, UK.

Megane Miralles is a Research Associate at the Institute of Business Creativity at Ecole Hôtelière de Lausanne, HES-SO University of Applied Sciences and Arts Western Switzerland.

Dr Emily A Morrison is an Organizational Effectiveness and Development Advisor for a US Government agency in Washington, DC, having served as an assistant professor for 11 years at The George Washington University.

Professor Trevor Morrow is Professor of Management Practice and Director of On-line and Digital Learning at University of Aberdeen Business School, Scotland

Dr Shahrzad Nayyeri is an Assistant Professor at the Research Center of Management & Productivity Studies Center at the Tarbiat Modares University, Iran.

Dr Jonathan M Scott is a Senior Lecturer in Strategic Management at the Waikato Management School, University of Waikato, New Zealand.

Professor Maura Sheehan is Professor in International Management and Co-Director, The International Centre for Management and Governance Research (ICMGR), The Business School, Edinburgh Napier University, UK.

Dr Melika Shirmohamma is an Assistant Professor in Human Resource Development in the Department of Human Development and Consumer Sciences at the University of Houston, USA.

Dr Marc Stierand is an Associate Professor of Service Management and the Director of the Institute of Business Creativity at Ecole Hôtelière de Lausanne, HES-SO University of Applied Sciences and Arts Western Switzerland.

Professor Catherine L Wang is Professor of Strategy and Entrepreneurship at Brunel Business School, Brunel University.

Chapter 1

Research, reflective diaries and the purpose of this book

Learning outcomes

By the end of this chapter you should be able to:

- define the nature of research;
- outline the features of business and management research;
- recall the stages you will need to complete (and revisit) as part of your research process;
- understand the importance of keeping a reflective diary;
- recognise the purpose, structure and features of this book;
- progress your research project by starting to make entries in your reflective diary or notebook.

1.1 Introduction

This book is designed to help you to undertake your research project, whether you are an undergraduate or postgraduate student of business and management or a practising manager. It provides a clear guide on how to undertake research as well as highlighting the realities of undertaking research, including the more common pitfalls. The book will provide you with the necessary knowledge and skills to undertake a piece of research from first thoughts about a potential research topic to writing your project report and delivering an oral presentation. As such, you will find it useful as a manual or handbook on how to tackle your research project.

After reading the book you will understand what it means to review the literature critically; have been introduced to research philosophies and approaches to reasoning; explored a range of strategies, techniques and procedures with which you could collect and analyse data; and considered how to report and present your research. Of equal importance, you will know that there is no one best way for undertaking all research. Rather you will be aware of the choices you will have to make and how these will impact upon what you can find out. This means you will be able to make a series of informed choices including your research philosophy, approaches to reasoning, strategies, techniques and procedures that are most suitable to your own research project and be able to justify them. In reading the book you will have been introduced to the

wealth of data that are available online, both online and face-to-face procedures for collecting your own data and techniques for analysing different types of data, have had a chance to practise them, and be able to select and justify which to use.

The invention of Post-it® notes

The Post-it® note is one of the best-known and most widely used office products in the world. Yet, despite the discovery of the repositionable adhesive that made the Post-it® note possible in 1968, it was not until 1980 that the product was introduced to the market (Post-it® 2022). In the 1960s, 3M research scientist Spencer Silver was looking for ways to improve the adhesive used in tapes. However, he discovered something quite different from what he was looking for, an adhesive that did not stick strongly when coated onto the back of tapes! What was unclear was how it might be used. Over the next five years he struggled to find a use for his new adhesive, talking about it and its merits to colleagues whenever possible. He became known as 'Mr Persistent' because he would not give up!

Most people working for 3M know the story of what happened next and how the Post-it® note concept came about. A new product development researcher working for 3M, Art Fry, was frustrated by how the scraps of paper he used as bookmarks kept falling out of his church choir hymn book. He realised that Silver's adhesive would mean his bookmarks would not fall out. Soon afterwards the Post-it® note concept was developed and market research undertaken. This was extremely difficult as the product was

Post-it® notes in use

revolutionary and was, in effect, designed to replace pieces of torn scrap paper! However, despite some initial scepticism within the company, Post-it® notes were launched in 1980. One year after their launch, they were named 3M's outstanding new product.

While your research project will be within the business and management discipline rather than natural science (such as developing a new adhesive), our opening vignette still offers several insights into the nature of research and in particular the business and management research you will be undertaking. It highlights that when undertaking research we should be open to finding the unexpected and how sometimes the applicability of our research findings may not be immediately obvious. It also emphasises the importance of discussing your ideas with other people.

However, a word of caution before you continue. In your study, you will inevitably read a wide range of books and articles. In many of these the terms ‘research method’ and ‘research methodology’ will be used interchangeably, perhaps just using methodology as a more verbose way of saying method. In this book we have been more precise in our use of these terms. Throughout the book we use the term **method** to refer to a procedure or technique used to obtain and analyse data. This, therefore, includes questionnaires, observation and interviews as well as both quantitative (statistical) and qualitative (non-statistical) analysis techniques and, as you have probably gathered from the title, is the main focus of this book. In contrast, the term **methodology** refers to the theory of how research should be undertaken. We believe it is important that you have some understanding of this so that you can make informed choices about your research. For this reason, we also discuss a range of philosophical assumptions upon which research can be based and the implications of these for the method or methods adopted.

1.2 The nature of research

When browsing social media, listening to the radio, watching television, listening to the radio or reading a daily newspaper it is difficult to avoid the term ‘research’. The results of ‘research’ are all around us. A debate about the findings of a recent poll of people’s opinions inevitably includes a discussion of ‘research’, normally referring to the way in which the data were collected. Politicians often justify their policy decisions on the basis of ‘research’. Newspapers report the research findings of academics and organisations (Box 1.1). Documentary programmes tell us about ‘research findings’ and advertisers may highlight the ‘results of research’ to encourage you to buy a particular product or brand. However, we believe that what these examples really emphasise is the wide range of meanings given to the term ‘research’ in everyday speech.

Walliman (2020) argues that many of these everyday uses of the term ‘research’ are not research in the true meaning of the word. As part of this, he highlights ways in which the term is used wrongly:

- just collecting facts or information with no clear purpose;
- reassembling and reordering facts or information without interpretation;
- as an activity with no or little relevance to everyday life;
- as a term to get your product or idea noticed and respected.

The first of these highlights that, although research often involves the collection of information, it is more than just reading a few books or articles, talking to a few people or asking people questions. While collecting data may be part of the research process, if it is not undertaken in a systematic way and without a clear purpose, it will not be seen as research. The second of these is commonplace in many reports. Data are collected, perhaps from a variety of different sources, and then assembled in a single document with the sources of these data listed without any explanation of what the data means. In other words, there is no interpretation of the data collected. Again, while the assembly of data from a variety of sources may be part of the research process, without interpretation it is not research. The third emphasises, as shown in the opening vignette, how despite research often appearing abstract, it influences our daily lives and creates our understanding of the world. Finally, the term ‘research’ can be used to get an idea or product noticed by people and to suggest that people should have confidence in it. In such instances, when you ask for details of the research process, these are either unclear or not forthcoming.
