To Stephen A. Ross and family

Our great friend, colleague, and coauthor Steve Ross passed away on March 3, 2017. Steve's influence on our textbook, like his influence on the field of finance, is seminal, deep, and enduring, and we miss him greatly.

**R.W.W. B.D.J.**

# About the Authors

## STEPHEN A. ROSS

Stephen A. Ross

The late Stephen A. Ross was the Franco Modigliani Professor of Finance and Economics at the Sloan School of Management, Massachusetts Institute of Technology. One of the most widely published authors in finance and economics, Professor Ross was known for his work in developing the Arbitrage Pricing Theory as well as his substantial contributions to the discipline through his research on signaling, agency theory, option pricing, and the theory of the term structure of interest rates, among other topics. A past president of the American Finance Association, he also served as an associate editor of various academic and practitioner journals. He was a trustee of CalTech.

## RANDOLPH W. WESTERFIELD

*Marshall School of Business, University of Southern California*

Randolph W. Westerfield

Randolph W. Westerfield is Dean Emeritus and the Charles B. Thornton Professor in Finance Emeritus at the University of Southern California's Marshall School of Business. Professor Westerfield came to USC from the Wharton School, University of Pennsylvania, where he was the chairman of the finance department and a member of the finance faculty for 20 years. He is a member of the board of trustees of Oaktree Capital mutual funds. His areas of expertise include corporate financial policy, investment management, and stock market price behavior.

## BRADFORD D. JORDAN

*Warrington College of Business, University of Florida*

Bradford D. Jordan

Bradford D. Jordan is Visiting Scholar in the Warrington College of Business at the University of Florida. He previously held the duPont Endowed Chair in Banking and Financial Services at the University of Kentucky, where he was department chair for many years. Professor Jordan has published numerous articles in top journals on issues such as cost of capital, capital structure, and the behavior of security prices. He is a past president of the Southern Finance Association, and he is coauthor of *Fundamentals of Investments: Valuation and Management*, 9e, a leading investments text, also published by McGraw Hill.

# Preface from the Authors

When the three of us decided to write a book, we were united by one strongly held principle: Corporate finance should be developed in terms of a few integrated, powerful ideas. We believed that the subject was all too often presented as a collection of loosely related topics, unified primarily by virtue of being bound together in one book, and we thought there must be a better way.

One thing we knew for certain was that we didn't want to write a "me-too" book. So, with a lot of help, we took a hard look at what was truly important and useful. In doing so, we were led to eliminate topics of dubious relevance, downplay purely theoretical issues, and minimize the use of extensive and elaborate calculations to illustrate points that are either intuitively obvious or of limited practical use.

As a result of this process, three basic themes became our central focus in writing *Fundamentals of Corporate Finance*:

## **AN EMPHASIS ON INTUITION**

We always try to separate and explain the principles at work on a commonsense, intuitive level before launching into any specifics. The underlying ideas are discussed first in very general terms and then by way of examples that illustrate in more concrete terms how a financial manager might proceed in a given situation.

## **A UNIFIED VALUATION APPROACH**

We treat net present value (NPV) as the basic concept underlying corporate finance. Many texts stop well short of consistently integrating this important principle. The most basic and important notion—that NPV represents the excess of market value over cost—often is lost in an overly mechanical approach that emphasizes computation at the expense of comprehension. In contrast, every subject we cover is firmly rooted in valuation, and care is taken throughout to explain how particular decisions have valuation effects.

## **A MANAGERIAL FOCUS**

Students shouldn't lose sight of the fact that financial management concerns management. We emphasize the role of the financial manager as decision maker, and we stress the need for managerial input and judgment. We consciously avoid "black box" approaches to finance, and, where appropriate, the approximate, pragmatic nature of financial analysis is made explicit, possible pitfalls are described, and limitations are discussed.

In retrospect, looking back to our 1991 first edition IPO, we had the same hopes and fears as any entrepreneurs. How would we be received in the market? At the time, we had no idea that almost 30 years later, we would be working on a thirteenth edition. We certainly never dreamed that in those years we would work with friends and colleagues from around the world to create country-specific Australian, Canadian, European, Indian, and South African editions; an International edition; Chinese, French, Polish, Portuguese, Thai, Russian, Korean, and Spanish (among others) language editions; and an entirely separate book, *Essentials of Corporate Finance*, now in its tenth edition.

Today, as we prepare to once more enter the market, our goal is to stick with the basic principles that have brought us this far. However, based on the enormous amount of feedback we have received from you and your colleagues, we have made this edition and its package even more flexible than previous editions. We offer flexibility in coverage, as customized editions of this text can be crafted in any combination through McGraw Hill's *CREATE* system, and flexibility in pedagogy, by providing a wide variety

of features in the book to help students learn about corporate finance. We also provide flexibility in package options by offering the most extensive collection of teaching, learning, and technology aids of any corporate finance text. Whether you use only the textbook, or the book in conjunction with our other products, we believe you will find a combination with this edition that will meet your current as well as your changing course needs.

**Bradford D. Jordan**

## **THE TAX CUTS AND JOBS ACT (TCJA) IS INCORPORATED THROUGHOUT ROSS FUNDAMENTALS OF CORPORATE FINANCE, 13E.**

There are six primary areas of change that are reflected in the 13th edition:

1. *Corporate tax.* The new, flat-rate 21 percent corporate rate is discussed and compared to the old progressive system. The new rate is used throughout the text in examples and problems. Entities other than C corporations still face progressive taxation, so the discussion of marginal versus average tax rates remains relevant and is retained.
2. *Bonus depreciation.* For a limited time, businesses can take a 100 percent depreciation charge the first year for most non–real estate, MACRS-qualified investments. This “bonus depreciation” ends in a few years and MACRS returns, so the MACRS material remains relevant and is retained. The impact of bonus depreciation is illustrated in various problems.
3. *Limitations on interest deductions.* The amount of interest that may be deducted for tax purposes is limited. Interest that cannot be deducted can be carried forward to future tax years (but not carried back; see next).
4. *Carrybacks.* Net operating loss (NOL) carrybacks have been eliminated and NOL carryforward deductions are limited in any one tax year.
5. *Dividends received tax break.* The tax break on dividends received by a corporation has been reduced, meaning that the portion subject to taxation has increased.
6. *Repatriation.* The distinction between U.S. and non-U.S. profits has been essentially eliminated. All “overseas” assets, both liquid and illiquid, were subject to a one-time “deemed” tax.

With the 13th edition, we’ve also included coverage of:

- COVID-19 and its impact on finance in multiple chapters.
- Clawbacks and deferred compensation.
- Fintech and the relationship between finance and other disciplines.
- Ratios in practice.
- Inversions.
- Negative interest rates.
- Corporate default rates in practice.
- Entrepreneurship and venture capital.
- Online Appendix on covariance and correlation.
- Direct listings and cryptocurrency initial coin offerings (ICOs).
- Regulation CF.
- Brexit.
- Repatriation.
- Changes in lease accounting.

# Coverage

This book was designed and developed explicitly for a first course in business or corporate finance, for both finance majors and non-majors alike. In terms of background or prerequisites, the book is nearly self-contained, assuming some familiarity with basic algebra and accounting concepts, while still reviewing important accounting principles very early on. The organization of this text has been developed to give instructors the flexibility they need.

The following grid presents, for each chapter, some of the most significant features as well as a few selected chapter highlights of the 13th edition of *Fundamentals*. Of course, in every chapter, opening vignettes, boxed features, in-chapter illustrated examples using real companies, and end-of-chapter material have been thoroughly updated as well.

Chapters	Selected Topics of Interest	Benefits to You
<b>PART 1 Overview of Corporate Finance</b>		
<b>CHAPTER 1</b> Introduction to Corporate Finance	Goal of the firm and agency problems.	Stresses value creation as the most fundamental aspect of management and describes agency issues that can arise.
	Ethics, financial management, and executive compensation.	Brings in real-world issues concerning conflicts of interest and current controversies surrounding ethical conduct and management pay.
	Sarbanes-Oxley.	Up-to-date discussion of Sarbanes-Oxley and its implications and impact.
	<i>New:</i> Finance and other disciplines, including fintech.	Discusses how finance interacts with other business disciplines. Also includes a discussion of fintech.
	<i>Minicase:</i> The McGee Cake Company.	Examines the choice of organization form for a small business.
<b>CHAPTER 2</b> Financial Statements, Taxes, and Cash Flow	Cash flow vs. earnings.	Clearly defines cash flow and spells out the differences between cash flow and earnings.
	<i>New:</i> COVID-19 and cash flows.	Discussion of how COVID-19 has affected cash flows.
	Market values vs. book values.	Emphasizes the relevance of market values over book values.
	Brief discussion of average corporate tax rates.	Highlights the variation in corporate tax rates across industries in practice.
	<i>New:</i> Personal tax rates.	Discusses how personal tax rates affect sole proprietorships, partnerships, and LLCs.
<i>Minicase:</i> Cash Flows and Financial Statements at Sunset Boards, Inc.	Reinforces key cash flow concepts in a small business setting.	

Chapters	Selected Topics of Interest	Benefits to You
<b>PART 2 Financial Statements and Long-Term Financial Planning</b>		
<b>CHAPTER 3</b> Working with Financial Statements	<p>New: COVID-19 and financial ratios.</p> <p>Expanded DuPont analysis.</p> <p>DuPont analysis for real companies using data from <i>S&amp;P Market Insight</i>.</p> <p>Ratio and financial statement analysis using smaller firm data.</p> <p>Understanding financial statements.</p> <p>The enterprise value-EBITDA ratio.</p> <p>New: Ratios for various industries.</p> <p><i>Minicase</i>: Ratio Analysis at S&amp;S Air, Inc.</p>	<p>Discussion of COVID-19 and its affect on ratios.</p> <p>Expands the basic DuPont equation to better explore the interrelationships between operating and financial performance.</p> <p>Analysis shows students how to get and use real-world data, thereby applying key chapter ideas.</p> <p>Uses firm data from <i>RMA</i> to show students how to actually get and evaluate financial statement benchmarks.</p> <p>Thorough coverage of standardized financial statements and key ratios.</p> <p>Defines enterprise value (EV) and discusses the widely used EV-EBITDA ratio.</p> <p>Discussion of ratios for various industries in practice.</p> <p>Illustrates the use of ratios and some pitfalls in a small business context.</p>
<b>CHAPTER 4</b> Long-Term Financial Planning and Growth	<p>Expanded discussion of sustainable growth calculations.</p> <p>Explanation of alternative formulas for sustainable and internal growth rates.</p> <p>Thorough coverage of sustainable growth as a planning tool.</p> <p>Long-range financial planning.</p> <p><i>Minicase</i>: Planning for Growth at S&amp;S Air.</p>	<p>Illustrates the importance of financial planning in a small firm.</p> <p>Explanation of growth rate formulas clears up a common misunderstanding about these formulas and the circumstances under which alternative formulas are correct.</p> <p>Provides a vehicle for examining the interrelationships between operations, financing, and growth.</p> <p>Covers the percentage of sales approach to creating pro forma statements.</p> <p>Discusses the importance of a financial plan and capacity utilization for a small business.</p>
<b>PART 3 Valuation of Future Cash Flows</b>		
<b>CHAPTER 5</b> Introduction to Valuation: The Time Value of Money	<p>First of two chapters on time value of money.</p>	<p>Relatively short chapter introduces just the basic ideas on time value of money to get students started on this traditionally difficult topic.</p>
<b>CHAPTER 6</b> Discounted Cash Flow Valuation	<p>Growing annuities and perpetuities.</p> <p>Second of two chapters on time value of money.</p> <p><i>Minicase</i>: The MBA Decision.</p>	<p>Covers more advanced time value topics with numerous examples, calculator tips, and Excel spreadsheet exhibits. Contains many real-world examples.</p> <p>Explores the financial pros and cons of pursuing an MBA degree.</p>

Chapters	Selected Topics of Interest	Benefits to You
<p><b>CHAPTER 7</b> Interest Rates and Bond Valuation</p>	<p>Negative interest rates.</p> <p>Bond valuation.</p> <p>Interest rates.</p> <p>“Clean” vs. “dirty” bond prices and accrued interest.</p> <p>TRACE system and transparency in the corporate bond market.</p> <p>“Make-whole” call provisions.</p> <p>Islamic finance.</p> <p><i>New:</i> COVID-19 and credit ratings</p> <p><i>New:</i> Corporate default rates.</p> <p><i>Minicase:</i> Financing S&amp;S Air’s Expansion Plans with a Bond Issue.</p>	<p>Chapter explores the recent phenomenon of negative interest on government bonds.</p> <p>Complete coverage of bond valuation and bond features.</p> <p>Discusses real versus nominal rates and the determinants of the term structure.</p> <p>Clears up the pricing of bonds between coupon payment dates and also bond market quoting conventions.</p> <p>Up-to-date discussion of new developments in fixed income with regard to price, volume, and transactions reporting.</p> <p>Up-to-date discussion of a relatively new type of call provision that has become very common.</p> <p>Provides basics of some important concepts in Islamic finance.</p> <p>Discussion of the negative impact of COVID-19 on credit ratings.</p> <p>Provides a discussion of default rates by credit rating.</p> <p>Discusses the issues that come up in selling bonds to the public.</p>
<p><b>CHAPTER 8</b> Stock Valuation</p>	<p>Stock valuation.</p> <p>NYSE market operations.</p> <p>Valuation using multiples.</p> <p><i>New:</i> Valuation ratios for industries.</p> <p><i>Minicase:</i> Stock Valuation at Ragan, Inc.</p>	<p>Thorough coverage of constant and nonconstant growth models.</p> <p>Up-to-date description of major stock market operations.</p> <p>Illustrates using PE and price/sales ratios for equity valuation.</p> <p>Provides a discussion of how valuation ratios vary between industries.</p> <p>Illustrates the difficulties and issues surrounding small business valuation.</p>

**PART 4 Capital Budgeting**

<p><b>CHAPTER 9</b> Net Present Value and Other Investment Criteria</p>	<p>First of three chapters on capital budgeting.</p> <p>NPV, IRR, payback, discounted payback, MIRR, and accounting rate of return.</p> <p><i>Minicase:</i> Bullock Gold Mining.</p>	<p>Relatively short chapter introduces key ideas on an intuitive level to help students with this traditionally difficult topic.</p> <p>Consistent, balanced examination of advantages and disadvantages of various criteria.</p> <p>Explores different capital budgeting techniques with nonstandard cash flows.</p>
<p><b>CHAPTER 10</b> Making Capital Investment Decisions</p>	<p>Project cash flow.</p> <p>Alternative cash flow definitions.</p> <p>Special cases of DCF analysis.</p> <p><i>Minicase:</i> Conch Republic Electronics, Part 1.</p>	<p>Thorough coverage of project cash flows and the relevant numbers for a project analysis.</p> <p>Emphasizes the equivalence of various formulas, thereby removing common misunderstandings.</p> <p>Considers important applications of chapter tools.</p> <p>Analyzes capital budgeting issues and complexities.</p>

Chapters	Selected Topics of Interest	Benefits to You
<b>CHAPTER 11</b> Project Analysis and Evaluation	Sources of value.  Scenario and sensitivity “what-if” analyses.  Break-even analysis.  <i>Minicase:</i> Conch Republic Electronics, Part 2.	Stresses the need to understand the economic basis for value creation in a project.  Illustrates how to actually apply and interpret these tools in a project analysis.  Covers cash, accounting, and financial break-even levels.  Illustrates the use of sensitivity analysis in capital budgeting.
<b>PART 5 Risk and Return</b>		
<b>CHAPTER 12</b> Some Lessons from Capital Market History	<i>New:</i> The stock market in 2020.  Expanded discussion of geometric vs. arithmetic returns.  Capital market history.  Market efficiency.  The equity risk premium.  The 2008 experience. <i>Minicase:</i> A Job at S&S Air.	Discussion of the market turmoil in early 2020 caused by COVID-19.  Discusses calculation and interpretation of geometric returns. Clarifies common misconceptions regarding appropriate use of arithmetic vs. geometric average returns.  Extensive coverage of historical returns, volatilities, and risk premiums.  Efficient markets hypothesis discussed along with common misconceptions.  Discusses the equity premium puzzle and latest international evidence.  Section on the stock market turmoil of 2008.  Discusses selection of investments for a 401(k) plan.
<b>CHAPTER 13</b> Return, Risk, and the Security Market Line	Diversification and systematic and unsystematic risk.  Beta and the security market line.  <i>New:</i> Covariance and correlation.  <i>Minicase:</i> The Beta for Colgate-Palmolive.	Illustrates basics of risk and return in a straightforward fashion.  Develops the security market line with an intuitive approach that bypasses much of the usual portfolio theory and statistics.  Online Appendix provides a more in-depth discussion of covariance and correlation.  Detailed discussion of beta estimation.
<b>PART 6 Cost of Capital and Long-Term Financial Policy</b>		
<b>CHAPTER 14</b> Cost of Capital	Cost of capital estimation.  Geometric vs. arithmetic growth rates.  Firm valuation.  <i>Minicase:</i> Cost of Capital for Swan Motors.	Contains a complete, web-based illustration of cost of capital for a real company.  Both approaches are used in practice. Clears up issues surrounding growth rate estimates.  Develops the free cash flow approach to firm valuation.  Covers pure play approach to cost of capital estimation.

Chapters	Selected Topics of Interest	Benefits to You
<p><b>CHAPTER 15</b> Raising Capital</p>	<p>New: Entrepreneurship and venture capital. Dutch auction IPOs. Regulation CF.  IPO “quiet periods.” Rights vs. warrants.  IPO valuation.  <i>Minicase:</i> S&amp;S Air Goes Public.</p>	<p>Discussion of entrepreneurship and the venture capital market. Explains uniform price auctions. Explains the new Regulation CF for crowdfunding and provides some examples. Explains the SEC’s quiet period rules. Clarifies the optionlike nature of rights prior to their expiration dates. Extensive, up-to-date discussion of IPOs, including the 1999–2000 period. Covers the key parts of the IPO process for a small firm.</p>
<p><b>CHAPTER 16</b> Financial Leverage and Capital Structure Policy</p>	<p>Basics of financial leverage. Optimal capital structure.  Financial distress and bankruptcy. <i>Minicase:</i> Stephenson Real Estate Recapitalization.</p>	<p>Illustrates effect of leverage on risk and return. Describes the basic trade-offs leading to an optimal capital structure. Briefly surveys the bankruptcy process. Discusses optimal capital structure for a medium-sized firm.</p>
<p><b>CHAPTER 17</b> Dividends and Payout Policy</p>	<p>New survey evidence on dividend policy.  Effect of new tax laws.  Dividends and dividend policy.  Optimal payout policy.  Stock repurchases.  <i>Minicase:</i> Electronic Timing, Inc.</p>	<p>New survey results show the most important (and least important) factors considered by financial managers in setting dividend policy. Discusses implications of new, lower dividend and capital gains rates. Describes dividend payments and the factors favoring higher and lower payout policies. Extensive discussion of the latest research and survey evidence on dividend policy, including life-cycle theory. Thorough coverage of buybacks as an alternative to cash dividends. Describes the dividend/share repurchase issue for a small company.</p>
<p><b>PART 7 Short-Term Financial Planning and Management</b></p>		
<p><b>CHAPTER 18</b> Short-Term Finance and Planning</p>	<p>Operating and cash cycles. Short-term financial planning.  Purchase order financing.  <i>Minicase:</i> Piepkorn Manufacturing Working Capital Management.</p>	<p>Stresses the importance of cash flow timing. Illustrates creation of cash budgets and potential need for financing. Brief discussion of PO financing, which is popular with small and medium-sized firms. Illustrates the construction of a cash budget and short-term financial plan for a small company.</p>

Chapters	Selected Topics of Interest	Benefits to You
<b>CHAPTER 19</b> Cash and Liquidity Management	<p><i>New:</i> COVID and short-term finance.</p> <p>Float management.</p> <p>Cash collection and disbursement.</p> <p><i>Minicase:</i> Cash Management at Webb Corporation.</p>	<p>Discussion of the COVID-19 crisis on short-term planning.</p> <p>Thorough coverage of float management and potential ethical issues.</p> <p>Examination of systems used by firms to handle cash inflows and outflows.</p> <p>Evaluates alternative cash concentration systems for a small firm.</p>
<b>CHAPTER 20</b> Credit and Inventory Management	<p><i>New:</i> COVID-19 and inventory.</p> <p>Credit management.</p> <p>Inventory management.</p> <p><i>Minicase:</i> Credit Policy at Howlett Industries.</p>	<p>Discussion of excess inventory and inventory shortages due to COVID-19.</p> <p>Analysis of credit policy and implementation.</p> <p>Brief overview of important inventory concepts.</p> <p>Evaluates working capital issues for a small firm.</p>
<b>PART 8 Topics in Corporate Finance</b>		
<b>CHAPTER 21</b> International Corporate Finance	<p>Foreign exchange.</p> <p>International capital budgeting.</p> <p>Exchange rate and political risk.</p> <p>Brexit.</p> <p>Repatriation.</p> <p><i>Minicase:</i> S&amp;S Air Goes International.</p>	<p>Covers essentials of exchange rates and their determination.</p> <p>Shows how to adapt basic DCF approach to handle exchange rates.</p> <p>Discusses hedging and issues surrounding sovereign risk.</p> <p>Uses “Brexit” as an illustration of political risk.</p> <p>Chapter opener and in-chapter discussion of the immense overseas cash holdings by U.S. corporations.</p> <p>Discusses factors in an international expansion for a small firm.</p>
<b>CHAPTER 22</b> Behavioral Finance: Implications for Financial Management	<p>Behavioral finance.</p> <p>Case against efficient markets.</p> <p><i>Minicase:</i> Your 401(k) Account at S&amp;S Air.</p>	<p>Unique and innovative coverage of the effects of biases and heuristics on financial management decisions. “In Their Own Words” box by Hersh Shefrin.</p> <p>Presents the behavioral case for market inefficiency and related evidence pro and con.</p> <p>Illustrates the considerations to be taken when selecting investment options.</p>
<b>CHAPTER 23</b> Enterprise Risk Management	<p>Volatility and risk.</p> <p>Hedging with forwards, options, and swaps.</p> <p><i>Minicase:</i> Chatman Mortgage, Inc.</p>	<p>Illustrates need to manage risk and some of the most important types of risk.</p> <p>Shows how many risks can be managed with financial derivatives.</p> <p>Analyzes hedging of interest rate risk.</p>

Chapters	Selected Topics of Interest	Benefits to You
<b>CHAPTER 24</b> Options and Corporate Finance	<p>Stock options, employee stock options, and real options.</p> <p>Option-embedded securities.</p> <p><i>Minicase:</i> S&amp;S Air's Convertible Bond.</p>	<p>Discusses the basics of these important option types.</p> <p>Describes the different types of options found in corporate securities.</p> <p>Examines security issuance issues for a small firm.</p>
<b>CHAPTER 25</b> Option Valuation	<p>Put-call parity and Black-Scholes.</p> <p>Options and corporate finance.</p> <p><i>Minicase:</i> Exotic Cuisines Employee Stock Options.</p>	<p>Develops modern option valuation and factors influencing option values.</p> <p>Applies option valuation to a variety of corporate issues, including mergers and capital budgeting.</p> <p>Illustrates complexities that arise in valuing employee stock options.</p>
<b>CHAPTER 26</b> Mergers and Acquisitions	<p>Alternatives to mergers and acquisitions.</p> <p>Defensive tactics.</p> <p>Divestitures and restructurings.</p> <p>Mergers and acquisitions.</p> <p><i>Minicase:</i> The Birdie Golf–Hybrid Golf Merger.</p>	<p>Covers strategic alliances and joint ventures and why they are important alternatives.</p> <p>Expanded discussion of antitakeover provisions.</p> <p>Examines important actions such as equity carve-outs, spins-offs, and split-ups.</p> <p>Develops essentials of M&amp;A analysis, including financial, tax, and accounting issues.</p> <p>Covers small business valuation for acquisition purposes.</p>
<b>CHAPTER 27</b> Leasing	<p>Changes in lease accounting.</p> <p>Leases and lease valuation.</p> <p><i>Minicase:</i> The Decision to Lease or Buy at Warf Computers.</p>	<p>Discusses recent changes in lease accounting rules and the curtailment of “off-balance-sheet” financing.</p> <p>Examines essentials of leasing, good and bad reasons for leasing, and NPV of leasing.</p> <p>Covers lease-or-buy and related issues for a small business.</p>

# In-Text Study Features

To meet the varied needs of its intended audience, *Fundamentals of Corporate Finance* is rich in valuable learning tools and support.

## CHAPTER-OPENING VIGNETTES

Vignettes drawn from real-world events introduce students to the chapter concepts.

Part 5 Risk and Return

## 12 Some Lessons from Capital Market History

**THANKS TO THE COVID-19** pandemic, the first half of 2020 was a wild ride for stock market investors. Markets closed at an all-time high on February 19, before dropping about 34 percent by March 23 as fears related to the virus spread. To the surprise of many, the market didn't stay down for long, jumping back to about even for the year by June, the largest gain over such a short period since 1933.

The ride was even wilder for investors in individual companies. Stock in Zoom, which became a widely used college lecture platform, zoomed up more than 250 percent. And, as people went online for payments and shopping, PayPal jumped 54 percent and Amazon rose 43 percent. But investors in travel-related companies weren't so lucky as stay-at-home orders became widespread. American Airlines stock dropped 78 percent, Hertz dropped 88 percent, and Royal Caribbean Cruises dropped 56 percent.

These examples show that there were tremendous potential profits to be made during the COVID-19 pandemic, but there was also the risk of losing money—lots of it. So what should you, as a stock market investor, expect when you invest your own money? In this chapter, we study more than nine decades of market history to find out.

**LEARNING OBJECTIVES**

After studying this chapter, you should be able to:

<p><b>L01</b> Calculate the return on an investment.</p> <p><b>L02</b> Discuss the historical returns on various important types of investments.</p>	<p><b>L03</b> Discuss the historical risks on various important types of investments.</p> <p><b>L04</b> Explain the implications of market efficiency.</p>
--	--

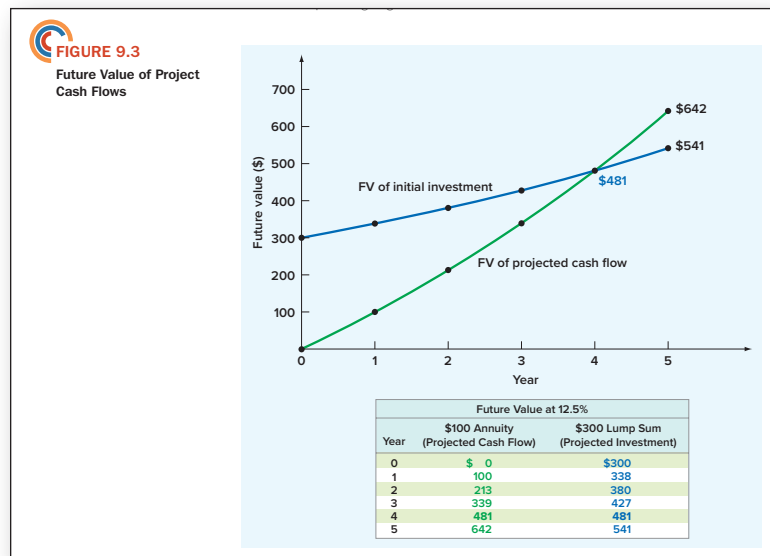

For updates on the latest happenings in finance, visit [fundamentalsofcorporatefinance.blogspot.com](http://fundamentalsofcorporatefinance.blogspot.com).

## CHAPTER LEARNING OBJECTIVES

This feature maps out the topics and learning goals in every chapter. Each end-of-chapter problem and test bank question is linked to a learning objective, to help you organize your assessment of knowledge and comprehension.

## PEDAGOGICAL USE OF COLOR

This learning tool continues to be an important feature of *Fundamentals of Corporate Finance*. In almost every chapter, color plays an extensive, nonschematic, and largely self-evident role. A guide to the functional use of color is on page xlvii of this front matter.

**IN THEIR OWN WORDS . . .**

**Robert C. Higgins on Sustainable Growth**

**Most financial officers** know intuitively that it takes money to make money. Rapid sales growth requires increased assets in the form of accounts receivable, inventory, and fixed plant, which, in turn, require money to pay for assets. They also know that if their company does not have the money when needed, it can literally “grow broke.” The sustainable growth equation states these intuitive truths explicitly.

Sustainable growth is often used by bankers and other external analysts to assess a company’s creditworthiness. They are aided in this exercise by several sophisticated computer software packages that provide detailed analyses of the company’s past financial performance, including its annual sustainable growth rate.

Bankers use this information in several ways. Quick comparison of a company’s actual growth rate to its sustainable rate tells the banker what issues will be at the top of management’s financial agenda. If actual growth consistently exceeds sustainable growth, management’s problem will be where to get the cash to finance growth. The banker thus can anticipate interest in loan products. Conversely, if sustainable growth consistently exceeds actual, the banker had best be prepared to talk about investment products, because management’s problem will be what to do with all the cash that keeps piling up in the till.

Bankers also find the sustainable growth equation useful for explaining to financially inexperienced small business owners and overly optimistic entrepreneurs that, for the long-run viability of their business, it is necessary to keep growth and profitability in proper balance.

Finally, comparison of actual to sustainable growth rates helps a banker understand why a loan applicant needs money and for how long the need might continue. In one instance, a loan applicant requested \$100,000 to pay off several insistent suppliers and promised to repay in a few months when he collected some accounts receivable that were coming due. A sustainable growth analysis revealed that the firm had been growing at four to six times its sustainable growth rate and that this pattern was likely to continue in the foreseeable future. This alerted the banker to the fact that impatient suppliers were only a symptom of the much more fundamental disease of overly rapid growth, and that a \$100,000 loan would likely prove to be only the down payment on a much larger, multiyear commitment.

Robert C. Higgins is a Professor Emeritus of Finance, at the Foster School of Business at the University of Washington. He pioneered the use of sustainable growth as a tool for financial analysis.

## IN THEIR OWN WORDS BOXES

This series of boxes features popular articles on key topics in the text written by distinguished scholars and practitioners. Boxes include essays by Merton Miller on capital structure, Fischer Black on dividends, and Roger Ibbotson on capital market history. A complete list of In Their Own Words boxes appears on page xlv.

## WORK THE WEB BOXES

These boxes show students how to research financial issues using the web and then how to use the information they find to make business decisions. Work the Web boxes also include interactive follow-up questions and exercises.

**WORK THE WEB**

As we discussed in this chapter, ratios are an important tool for examining a company’s performance. Gathering the necessary financial statements to calculate ratios can be tedious and time-consuming. Fortunately, many sites on the web provide this information for free. One of these is [www.reuters.com](http://www.reuters.com). We went there, entered the ticker symbol “HD” (for Home Depot), and then went to the “Key Metrics” page. Here is an abbreviated look at the results:

	Company	Industry	Sector
Quick Ratio (MRQ)	0.42	1.03	1.26
Current Ratio (MRQ)	1.34	1.91	1.58
LT Debt to Equity (MRQ)	397.33	84.80	34.40
Total Debt to Equity (MRQ)	406.99	98.04	64.39
Interest Coverage (TTM)	18.56	14.73	3.63

The website reports numerous ratios for each publicly traded company. We encourage you to have a look at your favorite company.

**Questions**

- Go to [www.reuters.com](http://www.reuters.com) and find the major ratio categories listed on this website. How do the categories differ from the categories listed in this textbook?
- Go to [www.reuters.com](http://www.reuters.com) and look at the ratios. You will notice the ratios are reported for annual, quarterly, trailing twelve month, or 5-year numbers. Why might the ratios be calculated using different values?

## REAL-WORLD EXAMPLES

Actual events are integrated throughout the text, tying chapter concepts to real life through illustration and reinforcing the relevance of the material. Some examples tie into the chapter-opening vignette for added reinforcement.

### SPREADSHEET STRATEGIES

#### How to Calculate Present Values with Multiple Future Cash Flows Using a Spreadsheet

Just as we did in our previous chapter, we can set up a basic spreadsheet to calculate the present values of the individual cash flows as follows. Notice that we have calculated the present values one at a time and added them up:

	A	B	C	D	E
1					
2	Using a spreadsheet to value multiple future cash flows				
3					
4	What is the present value of \$200 in one year, \$400 the next year, \$600 the next year, and				
5	\$800 the last year if the discount rate is 12 percent?				
6					
7	Rate:	.12			
8					
9	Year	Cash flows	Present values	Formula used	
10	1	\$200	\$178.57	=PV(\$B\$7:A10.0,-B10)	
11	2	\$400	\$318.88	=PV(\$B\$7:A11.0,-B11)	
12	3	\$600	\$427.07	=PV(\$B\$7:A12.0,-B12)	
13	4	\$800	\$508.41	=PV(\$B\$7:A13.0,-B13)	
14					
15		Total PV:	\$1,432.93	=SUM(C10:C13)	
16					
17	Notice the negative signs inserted in the PV formulas. These just make the present values have				
18	positive signs. Also, the discount rate in cell B7 is entered as \$B\$7 (an "absolute" reference)				
19	because it is used over and over. We could have just entered ".12" instead, but our approach is				
20	more flexible.				
21					
22					

## SPREADSHEET STRATEGIES

This feature introduces students to Excel and shows them how to set up spreadsheets in order to analyze common financial problems—a vital part of every business student's education.

## CALCULATOR HINTS

Brief calculator tutorials appear in selected chapters to help students learn or brush up on their financial calculator skills. These complement the Spreadsheet Strategies.

### CALCULATOR HINTS

#### How to Calculate Present Values with Multiple Future Cash Flows Using a Financial Calculator

To calculate the present value of multiple cash flows with a financial calculator, we will discount the individual cash flows one at a time using the same technique we used in our previous chapter, so this is not really new. However, we can show you a shortcut. We will use the numbers in Example 6.3 to illustrate.

To begin, of course, we first remember to clear out the calculator! Next, from Example 6.3, the first cash flow is \$200 to be received in one year and the discount rate is 12 percent, so we do the following:

Enter 1 12 200  
**N I/Y PMT PV FV**  
 Solve for -178.57

Now, you can write down this answer to save it, but that's inefficient. All calculators have a memory where you can store numbers. Why not just save it there? Doing so cuts down on mistakes because you don't have to write down and/or rekey numbers, and it's much faster.

Next, we value the second cash flow. We need to change N to 2 and FV to 400. As long as we haven't changed anything else, we don't have to reenter I/Y or clear out the calculator, so we have:

Enter 2 400  
**N I/Y PMT PV FV**  
 Solve for -318.88

## CONCEPT BUILDING

Chapter sections are intentionally kept short to promote a step-by-step, building block approach to learning. Each section is then followed by a series of short concept questions that highlight the key ideas just presented. Students use these questions to make sure they can identify and understand the most important concepts as they read.

**Concept Questions**

**3.3a** What are the five groups of ratios? Give two or three examples of each kind.

**3.3b** Given the total debt ratio, what other two ratios can be computed? Explain how.

**3.3c** Turnover ratios all have one of two figures as the numerator. What are these two figures? What do these ratios measure? How do you interpret the results?

**3.3d** Profitability ratios all have the same figure in the numerator. What is it? What do these ratios measure? How do you interpret the results?

## SUMMARY TABLES

These tables succinctly restate key principles, results, and equations. They appear whenever it is useful to emphasize and summarize a group of related concepts. For an example, see Chapter 3, page 72.

6.4

**PV for a perpetuity =  $C/r$**

For example, an investment offers a perpetual cash flow of \$500 every year. The return you require on such an investment is 8 percent. What is the value of this investment? The value of this perpetuity is:

$$\text{Perpetuity PV} = C/r = \$500/.08 = \$6,250$$

For future reference, Table 6.2 contains a summary of the annuity and perpetuity basic calculations we have described in this section. By now, you probably think that you'll just use online calculators to handle annuity problems. Before you do, see our nearby *Work the Web* box!

---

**EXAMPLE 6.7**

**Preferred Stock**

*Preferred stock* (or preference stock) is an important example of a perpetuity. When a corporation sells preferred stock, the buyer is promised a fixed cash dividend every period (usually every quarter) forever. This dividend must be paid before any dividend can be paid to regular stockholders—hence the term *preferred*.

Suppose the Fellini Co. wants to sell preferred stock at \$100 per share. A similar issue of preferred stock already outstanding has a price of \$40 per share and offers a dividend of \$1 every quarter. What dividend will Fellini have to offer if the preferred stock is going to sell?

## LABELED EXAMPLES

Separate numbered and titled examples are extensively integrated into the chapters. These examples provide detailed applications and illustrations of the text material in a step-by-step format. Each example is completely self-contained so students don't have to search for additional information. Based on our classroom testing, these examples are among the most useful learning aids because they provide both detail and explanation.

## KEY TERMS

Key terms are printed in bold type and defined within the text the first time they appear. They also appear in the margins with definitions for easy location and identification by the student.

## EXPLANATORY WEB LINKS

These web links are provided in the margins of the text. They are specifically selected to accompany text material and provide students and instructors with a quick way to check for additional information using the internet.

1. A petition is filed in a federal court. Corporations may file a voluntary petition, or involuntary petitions may be filed against the corporation by several of its creditors.
2. A trustee-in-bankruptcy is elected by the creditors to take over the assets of the debtor corporation. The trustee will attempt to liquidate the assets.
3. When the assets are liquidated, after payment of the bankruptcy administration costs, the proceeds are distributed among the creditors.
4. If any proceeds remain, after expenses and payments to creditors, they are distributed to the shareholders.

The distribution of the proceeds of the liquidation occurs according to the following priority list:

The SEC has a good overview of the bankruptcy process in its "Online Publications" section at [www.sec.gov](http://www.sec.gov).

## KEY EQUATIONS

Called out in the text, key equations are identified by an equation number. The list in Appendix B shows the key equations by chapter, providing students with a convenient reference.

Based on our examples, we can now write the general expression for the value of a bond. If a bond has (1) a face value of  $F$  paid at maturity, (2) a coupon of  $C$  paid per period, (3)  $t$  periods to maturity, and (4) a yield of  $r$  per period, its value is:

$$\text{Bond value} = C \times [1 - 1/(1+r)^t]/r + F/(1+r)^t$$

$$\text{Bond value} = \text{Present value of the coupons} + \text{Present value of the face amount}$$

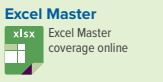

7.1

## HIGHLIGHTED CONCEPTS

Throughout the text, important ideas are pulled out and presented in a highlighted box—signaling to students that this material is particularly relevant and critical for their understanding. For examples, see Chapter 10, page 319; Chapter 13, page 441.

## EXCEL MASTER

Icons in the margin identify concepts and skills covered in our unique, RWJ-created Excel Master program. For more training in Excel functions for finance, and for more practice, log on to McGraw Hill's *Connect Finance* for *Fundamentals of Corporate Finance* to access the Excel Master files. This pedagogically superior tool will help get your students the practice they need to succeed—and to exceed expectations.

**Excel Master**  
Excel Master coverage online

### 12.3 Average Returns: The First Lesson

As you've probably begun to notice, the history of capital market returns is too complicated to be of much use in its undigested form. We need to begin summarizing all these numbers. Accordingly, we discuss how to go about condensing the detailed data. We start out by calculating average returns.

**CALCULATING AVERAGE RETURNS**

The obvious way to calculate the average returns on the different investments in Table 12.1 is to add up the yearly returns and divide by 94. The result is the historical average of the individual values.

For example, if you add up the returns for the large-company stocks in Figure 12.5 for the 94 years, you will get about 11.37. The average annual return is  $11.37/94 = .121$ , or 12.1%. You interpret this **12.1 percent** just like any other average. If you were to pick a year at random from the 94-year history and you had to guess what the return in that year was, the best guess would be 12.1 percent.

**AVERAGE RETURNS: THE HISTORICAL RECORD**

Table 12.2 shows the average returns for the investments we have discussed. As shown, in a typical year, the small-company stocks increased in value by **16.3 percent**. Notice also how much larger the returns are for stocks, compared to the returns on bonds.

These averages are, of course, nominal because we haven't worried about inflation. Notice that the average inflation rate was **2.9 percent** per year over this 94-year span. The nominal return on U.S. Treasury bills was **3.4 percent** per year. The average real return on

## CHAPTER SUMMARY AND CONCLUSIONS

Every chapter ends with a concise, but thorough, summary of the important ideas—helping students review the key points and providing closure to the chapter.

### CHAPTER REVIEW AND SELF-TEST PROBLEM

- 2.1 Cash Flow for Mara Corporation** This problem will give you some practice working with financial statements and figuring cash flow. Based on the following information for Mara Corporation, prepare an income statement for 2021 and balance sheets for 2020 and 2021. Next, following our U.S. Corporation examples in the chapter, calculate cash flow from assets, cash flow to creditors, and cash flow to stockholders for Mara for 2021. Use a 21 percent tax rate throughout. You can check your answers against ours, found in the following section.

	2020	2021
Sales	\$4,203	\$4,507
Cost of goods sold	2,422	2,633
Depreciation	785	952
Interest	180	196
Dividends	275	352
Current assets	2,205	2,429
Net fixed assets	7,344	7,650
Current liabilities	1,003	1,255
Long-term debt	3,106	2,085

### CHAPTER REVIEW AND SELF-TEST PROBLEMS

Appearing after the Summary and Conclusions, each chapter includes a Chapter Review and Self-Test Problem section. These questions and answers allow students to test their abilities in solving key problems related to the chapter content and provide instant reinforcement.

## CONCEPTS REVIEW AND CRITICAL THINKING QUESTIONS

This successful end-of-chapter section facilitates your students' knowledge of key principles, as well as their intuitive understanding of the chapter concepts. A number of the questions relate to the chapter-opening vignette—reinforcing student critical thinking skills and the learning of chapter material.

### CONCEPTS REVIEW AND CRITICAL THINKING QUESTIONS

- Liquidity [LO1]** What does liquidity measure? Explain the trade-off a firm faces between high liquidity and low liquidity levels.
- Accounting and Cash Flows [LO2]** Why might the revenue and cost figures shown on a standard income statement not be representative of the actual cash inflows and outflows that occurred during a period?
- Book Values versus Market Values [LO1]** In preparing a balance sheet, why do you think standard accounting practice focuses on historical cost rather than market value?
- Operating Cash Flow [LO2]** In comparing accounting net income and operating cash flow, name two items you typically find in net income that are not in operating cash flow. Explain what each is and why it is excluded in operating cash flow.
- Book Values versus Market Values [LO1]** Under standard accounting rules, it is possible for a company's liabilities to exceed its assets. When this occurs, the owners' equity is negative. Can this happen with market values? Why or why not?
- Cash Flow from Assets [LO4]** Suppose a company's cash flow from assets is negative for a particular period. Is this necessarily a good sign or a bad sign?
- Operating Cash Flow [LO4]** Suppose a company's operating cash flow has been negative for several years running. Is this necessarily a good sign or a bad sign?
- Net Working Capital and Capital Spending [LO4]** Could a company's change in NWC be negative in a given year? (*Hint:* Yes.) Explain how this might come about. What about net capital spending?
- Cash Flow to Stockholders and Creditors [LO4]** Could a company's cash flow to stockholders be negative in a given year? (*Hint:* Yes.) Explain how this might come about. What about cash flow to creditors?
- Firm Values [LO1]** Referring back to the Procter & Gamble example used at the beginning of the chapter, note that we suggested that Procter & Gamble's stockholders probably didn't suffer as a result of the reported loss. What do you think was the basis for our conclusion?

## END-OF-CHAPTER QUESTIONS AND PROBLEMS

Students learn better when they have plenty of opportunity to practice; therefore, *Fundamentals*, 13e, provides extensive end-of-chapter questions and problems. The end-of-chapter support greatly exceeds typical introductory textbooks. The questions and problems are separated into three learning levels: Basic, Intermediate, and Challenge. Answers to selected end-of-chapter material appear in Appendix C. Also, most problems are available in McGraw Hill's Connect—see page xxiv for details.

QUESTIONS AND PROBLEMS		McGraw Hill connect™
1. <b>Building a Balance Sheet [LO1]</b> Bing, Inc., has current assets of \$5,400, net fixed assets of \$28,100, current liabilities of \$4,100, and long-term debt of \$10,600. What is the value of the shareholders' equity account for this firm? How much is net working capital?		<b>BASIC</b> (Questions 1–11)
2. <b>Building an Income Statement [LO1]</b> Nataro, Inc., has sales of \$742,000, costs of \$316,000, depreciation expense of \$39,000, interest expense of \$34,000, and a tax rate of 21 percent. What is the net income for this firm?		✕
3. <b>Dividends and Retained Earnings [LO1]</b> Suppose the firm in Problem 2 paid out \$125,000 in cash dividends. What is the addition to retained earnings?		✕
4. <b>Per-Share Earnings and Dividends [LO1]</b> Suppose the firm in Problem 3 had 75,000 shares of common stock outstanding. What is the earnings per share, or EPS, figure? What is the dividends per share figure?		✕
5. <b>Calculating Taxes [LO3]</b> Timmy Tappan is single and had \$189,000 in taxable income. Using the rates from Table 2.3 in the chapter, calculate his income taxes. What is the average tax rate? What is the marginal tax rate?		✕
6. <b>Calculating OCF [LO4]</b> Graff, Inc., has sales of \$49,800, costs of \$23,700, depreciation expense of \$2,300, and interest expense of \$1,800. If the tax rate is 22 percent, what is the operating cash flow, or OCF?		✕

## END-OF-CHAPTER CASES

Located at the end of the book's chapters, these minicases focus on real-life company situations that embody important corporate finance topics. Each case presents a new scenario, data, and a dilemma. Several questions at the end of each case require students to analyze and focus on all of the material they learned from each chapter.

MINICASE																							
<h3>Bullock Gold Mining</h3> <p>Seth Bullock, the owner of Bullock Gold Mining, is evaluating a new gold mine in South Dakota. Dan Dority, the company's geologist, has just finished his analysis of the mine site. He has estimated that the mine would be productive for eight years, after which the gold would be completely mined. Dan has taken an estimate of the gold deposits to Alma Garrett, the company's financial officer. Alma has been asked by Seth to perform an analysis of the new mine and present her recommendation on whether the company should open the new mine.</p> <p>Alma has used the estimates provided by Dan to determine the revenues that could be expected from the mine. She has also projected the expense of opening the mine and the annual operating expenses. If the company opens the mine, it will cost \$745 million today, and it will have a cash outflow of \$55 million nine years from today in costs associated with closing the mine and reclaiming the area surrounding it. The expected cash flows each year from the mine are shown in the table. Bullock Mining has a required return of 12 percent on all of its gold mines.</p>																							
<table border="1"> <thead> <tr> <th>Year</th> <th>Cash Flow</th> </tr> </thead> <tbody> <tr><td>0</td><td>–\$745,000,000</td></tr> <tr><td>1</td><td>127,000,000</td></tr> <tr><td>2</td><td>135,000,000</td></tr> <tr><td>3</td><td>145,000,000</td></tr> <tr><td>4</td><td>185,000,000</td></tr> <tr><td>5</td><td>225,000,000</td></tr> <tr><td>6</td><td>165,000,000</td></tr> <tr><td>7</td><td>155,000,000</td></tr> <tr><td>8</td><td>134,000,000</td></tr> <tr><td>9</td><td>– 55,000,000</td></tr> </tbody> </table>	Year	Cash Flow	0	–\$745,000,000	1	127,000,000	2	135,000,000	3	145,000,000	4	185,000,000	5	225,000,000	6	165,000,000	7	155,000,000	8	134,000,000	9	– 55,000,000	<h3>QUESTIONS</h3> <ol style="list-style-type: none"> <li>Construct a spreadsheet to calculate the payback period, internal rate of return, modified internal rate of return, and net present value of the proposed mine.</li> <li>Based on your analysis, should the company open the mine?</li> <li>Bonus question: Most spreadsheets do not have a built-in formula to calculate the payback period. ## WEB EXERCISES (ONLINE ONLY)

For instructors interested in integrating even more online resources and problems into their course, these web activities show students how to learn from the vast amount of financial resources available on the internet. In the 13th edition of *Fundamentals*, these web exercises are available to students and instructors through Connect.

# Comprehensive Teaching and Learning Package

This edition of *Fundamentals* has several options in terms of the textbook, instructor supplements, student supplements, and multimedia products. Mix and match to create a package that is perfect for your course!

## TEXTBOOK

Customize your version of *Fundamentals*, 13e, through McGraw Hill's *Create* platform. Teach the chapters you want in the order you want—your rep can show you how!

## INSTRUCTOR RESOURCES

Keep all the supplements in one place! Your Connect Library contains all the necessary supplements—Teaching Resource Manual, Solutions, Test Bank, Computerized Test Bank, and PowerPoint—all in one easy-to-find, easy-to-use, integrated place: Your *Connect Finance* course.

- **Teaching Resource Manual (TRM)**

The TRM is a full-service implementation guide designed to support you in the delivery of your curriculum and assist you in integrating Connect.

- **Solutions Manual (SM)**

*Prepared by Brad Jordan, University of Florida, and Joe Smolira, Belmont University*

The *Fundamentals* Solutions Manual provides detailed solutions to the extensive end-of-chapter material, including concept review questions, quantitative problems, and cases.

- **Test Bank**

*Prepared by Heidi Toprac*

Over 100 questions and problems per chapter! Each chapter includes questions that test the understanding of key terms in the book; questions patterned after learning objectives, concept questions, chapter-opening vignettes, boxes, and highlighted phrases; multiple-choice problems patterned after end-of-chapter questions at a variety of skill levels; and essay questions to test problem-solving skills and more advanced understanding of concepts.

- **Excel Simulations**

Expanded for this edition! With 180 Excel simulation questions now included in Connect, RWJ is the unparalleled leader in offering students the opportunity to practice using the Excel functions they will use throughout their careers in finance.

- **Corporate Finance Videos**

These brief and engaging conceptual videos (and accompanying questions) help students to master the building blocks of the Corporate Finance course.

- **PowerPoint Presentations**

The PowerPoint slides for the 13th edition have been revised to include a wealth of instructor material, including lecture tips, real-world examples, and international notes. Each presentation also includes slides dedicated entirely to ethics notes that relate to the chapter topics.

- **Test Builder in Connect**

Available within Connect, Test Builder is a cloud-based tool that enables instructors to format tests that can be printed or administered within a LMS. Test Builder offers a modern, streamlined interface for easy content configuration that matches course needs, without requiring a download.

Test Builder allows you to:

- Access all test bank content from a particular title.
- Easily pinpoint the most relevant content through robust filtering options.
- Manipulate the order of questions or scramble questions and/or answers.
- Pin questions to a specific location within a test.
- Determine your preferred treatment of algorithmic questions.
- Choose the layout and spacing.
- Add instructions and configure default settings.

Test Builder provides a secure interface for better protection of content and allows for just-in-time updates to flow directly into assessments.

- **Tegrity: Lectures 24/7**

Tegrity in Connect is a tool that makes class time available 24/7 by automatically capturing every lecture. With a simple one-click start-and-stop process, you capture all computer screens and corresponding audio in a format that is easy to search, frame by frame. Students can replay any part of any class with easy-to-use, browser-based viewing on a PC, Mac, iPod, or other mobile device.

Educators know that the more students can see, hear, and experience class resources, the better they learn. In fact, studies prove it. Tegrity's unique search feature helps students efficiently find what they need, when they need it, across an entire semester of class recordings. Help turn your students' study time into learning moments immediately supported by your lecture. With Tegrity, you also increase intent listening and class participation by easing students' concerns about note-taking. Using Tegrity in Connect will make it more likely you will see students' faces, not the tops of their heads.

- **Remote Proctoring and Browser-Locking Capabilities**

New remote proctoring and browser-locking capabilities, hosted by Proctorio within Connect, provide control of the assessment environment by enabling security options and verifying the identity of the student.

Seamlessly integrated within Connect, these services allow instructors to control students' assessment experience by restricting browser activity, recording students' activity, and verifying students are doing their own work.

Instant and detailed reporting gives instructors an at-a-glance view of potential academic integrity concerns, thereby avoiding personal bias and supporting evidence-based claims.

## STUDENT RESOURCES

Student resources for this edition can be found through the Library tab in your *Connect Finance* course. If you aren't using Connect, visit us at [connect.mheducation.com](http://connect.mheducation.com) to learn more, and ask your professor about using it in your course for access to a great group of supplement resources!

- **Excel Resources**

For those seeking additional practice, students can access Excel template problems and Excel Master, designed by Brad Jordan and Joe Smolira.

- **Narrated Lecture Videos**

Updated for this edition, the Narrated Lecture videos provide real-world examples accompanied by step-by-step instructions and explanations for solving problems presented in the chapter. The Concept Checks from the text are also integrated into the slides to reinforce the key topics in the chapter. Designed specifically to appeal to the different learning methods of students, the slides provide a visual and audio explanation of topics and problems.

## TEACHING SUPPORT

Along with having access to all of the student resource materials through the Connect Library tab, you also have password-protected access to the Instructor's Manual, solutions to end-of-chapter problems and cases, Instructor's PowerPoint, Excel Template Solutions, video clips, and video projects and questions.

## HOW THE MARKET WORKS

Students receive free access to this web-based portfolio simulation with a hypothetical brokerage account to buy and sell stocks and mutual funds. Students can use the real data found at this site in conjunction with the chapters on investments. They can also compete against students in their class and around the United States to run the most successful portfolio. This site is powered by Stock-Trak, the leading provider of investment simulation services to the academic community.

### *FinGame Online 5.0*

*By LeRoy Brooks, John Carroll University*

(ISBN 10: 0077219880/ISBN 13: 9780077219888)

Just \$15.00 when packaged with this text. In this comprehensive simulation game, students control a hypothetical company over numerous periods of operation. The game is now tied to the text by exercises found on the Connect Student Library. As students make major financial and operating decisions for their company, they will develop and enhance their skills in financial management and financial accounting statement analysis.

## MCGRAW HILL CUSTOMER CARE CONTACT INFORMATION

At McGraw Hill, we understand that getting the most from new technology can be challenging. That's why our services don't stop after you purchase our products. You can chat with our Product Specialists 24 hours a day to get product training online. Or you can search our knowledge bank of Frequently Asked Questions on our support website. For Customer Support, call **800-331-5094**, or visit **mpss.mhhe.com**. One of our Technical Support Analysts will be able to assist you in a timely fashion.

### **Assurance of Learning Ready**

Assurance of Learning is an important element of many accreditation standards. *Fundamentals of Corporate Finance*, 13e, is designed specifically to support your assurance of learning initiatives. Each chapter in the book begins with a list of numbered learning

# connect<sup>®</sup>

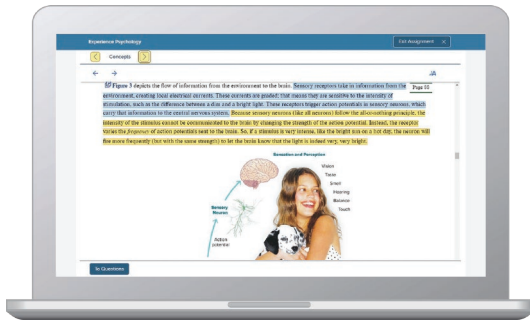

## Instructors: Student Success Starts with You

### Tools to enhance your unique voice

Want to build your own course? No problem. Prefer to use our turnkey, prebuilt course? Easy. Want to make changes throughout the semester? Sure. And you'll save time with Connect's auto-grading too.

## Students: Get Learning that Fits You

### Effective tools for efficient studying

Connect is designed to make you more productive with simple, flexible, intuitive tools that maximize your study time and meet your individual learning needs. Get learning that works for you with Connect.

### Study anytime, anywhere

Download the free ReadAnywhere app and access your online eBook or SmartBook 2.0 assignments when it's convenient, even if you're offline. And since the app automatically syncs with your eBook and SmartBook 2.0 assignments in Connect, all of your work is available every time you open it. Find out more at [www.mheducation.com/readanywhere](http://www.mheducation.com/readanywhere)

*"I really liked this app—it made it easy to study when you don't have your textbook in front of you."*

- Jordan Cunningham,  
Eastern Washington University

objectives that appear throughout the chapter, as well as in the end-of-chapter problems and exercises. Every test bank question is also linked to one of these objectives, in addition to level of difficulty, topic area, Bloom's Taxonomy level, and AACSB skill area. With Connect, McGraw Hill's online homework solution, and EZ Test, McGraw Hill's easy-to-use test bank software, you can search the test bank using these and other categories, providing an engine for targeted Assurance of Learning analysis and assessment.

### **AACSB Statement**

McGraw Hill is a proud corporate member of AACSB International. Understanding the importance and value of AACSB Accreditation, *Fundamentals of Corporate Finance*, 13e, has sought to recognize the curricula guidelines detailed in the AACSB standards for business accreditation by connecting selected questions in the test bank to the general knowledge and skill guidelines found in the AACSB standards.

The statements contained in *Fundamentals of Corporate Finance*, 13e, are provided only as a guide for the users of this text. The AACSB leaves content coverage and assessment within the purview of individual schools, the mission of the school, and the faculty. While *Fundamentals of Corporate Finance*, 13e, and the teaching package make no claim of any specific AACSB qualification or evaluation, we have, within the test bank, labeled selected questions according to the eight general knowledge and skills areas.

# Acknowledgments

To borrow a phrase, writing an introductory finance textbook is easy—all you do is sit down at a word processor and open a vein. We never would have completed this book without the incredible amount of help and support we received from literally hundreds of our colleagues, students, editors, family members, and friends. We would like to thank, without implicating, all of you.

Clearly, our greatest debt is to our many colleagues (and their students) who, like us, wanted to try an alternative to what they were using and made the decision to change. Needless to say, without this support, we would not be publishing a 13th edition!

A great many of our colleagues read the drafts of our first and subsequent editions. The fact that this book has so little in common with our earliest drafts, along with the many changes and improvements we have made over the years, is a reflection of the value we placed on the many comments and suggestions that we received. To the following reviewers, then, we are grateful for their many contributions:

**Ibrahim Affeneh**  
**Jan Ambrose**  
**Mike Anderson**

Several of our most respected colleagues contributed original essays for this edition, which are entitled “In Their Own Words,” and appear in selected chapters. To these individuals we extend a special thanks:

<b>Edward I. Altman</b> <i>New York University</i>	<b>Jay R. Ritter</b> <i>University of Florida</i>	<b>Bennett Stewart</b> <i>Stern Stewart &amp; Co.</i>
<b>Robert C. Higgins</b> <i>University of Washington</i>	<b>Richard Roll</b> <i>California Institute of Technology</i>	<b>Samuel C. Weaver</b> <i>Lehigh University</i>
<b>Roger Ibbotson</b> <i>Yale University, Ibbotson Associates</i>	<b>Fischer Black</b>	<b>Merton H. Miller</b>
<b>Erik Lie</b> <i>University of Iowa</i>	<b>Jeremy Siegel</b> <i>University of Pennsylvania</i>	
<b>Robert C. Merton</b> <i>Harvard University, Massachusetts Institute of Technology</i>	<b>Hersh Shefrin</b> <i>Santa Clara University</i>	

We are lucky to have had skilled and experienced instructors developing the supplement material for this edition. We greatly appreciate the contributions of online coauthor Joe Smolira, Belmont University, who worked closely with us to develop the Solutions Manual and the new and improved Instructor's Guide and to create Excel templates for many of the end-of-chapter problems. Thank you also to Heidi Toprac for thorough updating, revising, and tagging of every problem in the test bank.

The following proofers did outstanding work on this edition of *Fundamentals*: Emily Bello and Steve Hailey. To them fell the unenviable task of technical proofreading and, in particular, careful checking of each calculation throughout the text and Instructor's Manual.

Finally, in every phase of this project, we have been privileged to have had the complete and unwavering support of a great organization, McGraw Hill. We especially thank the sales group. The suggestions they provide, their professionalism in assisting potential adopters, and the service they provide to current users have been a major factor in our success.

We are deeply grateful to the select group of professionals who served as our development team on this edition: Chuck Synovec, Director; Allison McCabe-Carroll, Senior Product Developer; Trina Maurer, Senior Marketing Manager; Matt Diamond, Senior Designer; Susan Trentacosti, Lead Core Project Manager. Others at McGraw Hill, too numerous to list here, have improved the book in countless ways.

Throughout the development of this edition, we have taken great care to discover and eliminate errors. Our goal is to provide the best textbook available on the subject. To ensure that future editions are error-free, we gladly offer \$10 per arithmetic error to the first individual reporting it as a modest token of our appreciation. More than this, we would like to hear from instructors and students alike. Please write and tell us how to make this a better text. Forward your comments to Dr. Brad Jordan, c/o Editorial—Finance, McGraw Hill, 1120 S. Riverside Plaza, Chicago, IL 60606.

# Contents

## PART 1 Overview of Corporate Finance

### CHAPTER 1

#### INTRODUCTION TO CORPORATE FINANCE 1

- 1.1 Finance: A Quick Look 2**
  - Finance: The Five Main Areas 2
    - Corporate Finance 2
    - Investments 2
    - Financial Institutions 3
    - International Finance 3
    - Fintech 3
  - Why Study Finance? 3
    - Marketing and Finance 3
    - Accounting and Finance 3
    - Management and Finance 4
    - Technology and Finance 4
    - You and Finance 5
- 1.2 Corporate Finance and the Financial Manager 5**
  - What is Corporate Finance? 5
  - The Financial Manager 6
  - Financial Management Decisions 7
    - Capital Budgeting 7
    - Capital Structure 7
    - Working Capital Management 7
    - Conclusion 8
- 1.3 Forms of Business Organization 8**
  - Sole Proprietorship 8
  - Partnership 8
  - Corporation 9
  - A Corporation by Another Name . . . 10
  - Benefit Corporation 11
- 1.4 The Goal of Financial Management 11**
  - Possible Goals 12
  - The Goal of Financial Management 12
  - A More General Goal 13
  - Sarbanes-Oxley 13
- 1.5 The Agency Problem and Control of the Corporation 14**
  - Agency Relationships 14
  - Management Goals 14
  - Do Managers Act in the Stockholders' Interests? 15
    - Managerial Compensation 15
    - Control of the Firm 16
    - Conclusion 17
  - Stakeholders 17

- 1.6 Financial Markets and the Corporation 18**
  - Cash Flows to and from the Firm 18
  - Primary versus Secondary Markets 19
    - Primary Markets 19
    - Secondary Markets 19
  - Dealer versus Auction Markets 19
  - Trading in Corporate Securities 20
  - Listing 20
- 1.7 Summary and Conclusions 21**

### CHAPTER 2

#### FINANCIAL STATEMENTS, TAXES, AND CASH FLOW 24

- 2.1 The Balance Sheet 25**
  - Assets: The Left Side 25
  - Liabilities and Owners' Equity: The Right Side 25
  - Net Working Capital 26
  - Liquidity 27
  - Debt versus Equity 28
  - Market Value versus Book Value 28
- 2.2 The Income Statement 29**
  - GAAP and the Income Statement 30
  - Noncash Items 31
  - Time and Costs 31
- 2.3 Taxes 33**
  - Corporate Tax Rates 33
  - Average versus Marginal Tax Rates 33
- 2.4 Cash Flow 35**
  - Cash Flow from Assets 35
    - Operating Cash Flow 35
    - Capital Spending 36
    - Change in Net Working Capital 37
    - Conclusion 37
    - A Note about "Free" Cash Flow 37
  - Cash Flow to Creditors and Stockholders 38
    - Cash Flow to Creditors 38
    - Cash Flow to Stockholders 38
  - An Example: Cash Flows for Dole Cola 38
    - Operating Cash Flow 38
    - Net Capital Spending 40
    - Change in NWC and Cash Flow from Assets 40
    - Cash Flow to Stockholders and Creditors 40
- 2.5 Summary and Conclusions 41**

## PART 2 Financial Statements and Long-Term Financial Planning

### CHAPTER 3

#### WORKING WITH FINANCIAL STATEMENTS 51

- 3.1 Cash Flow and Financial Statements: A Closer Look 52**
  - Sources and Uses of Cash 52
  - The Statement of Cash Flows 54
- 3.2 Standardized Financial Statements 56**
  - Common-Size Statements 56
    - Common-Size Balance Sheets 56*
    - Common-Size Income Statements 57*
    - Common-Size Statements of Cash Flows 58*
  - Common-Base Year Financial Statements: Trend Analysis 58
  - Combined Common-Size and Base Year Analysis 58
- 3.3 Ratio Analysis 59**
  - Short-Term Solvency, or Liquidity, Measures 60
    - Current Ratio 60*
    - The Quick (or Acid-Test) Ratio 61*
    - Other Liquidity Ratios 62*
  - Long-Term Solvency Measures 62
    - Total Debt Ratio 63*
    - A Brief Digression: Total Capitalization versus Total Assets 63*
    - Times Interest Earned 64*
    - Cash Coverage 64*
  - Asset Management, or Turnover, Measures 64
    - Inventory Turnover and Days' Sales in Inventory 64*
    - Receivables Turnover and Days' Sales in Receivables 65*
    - Asset Turnover Ratios 66*
  - Profitability Measures 67
    - Profit Margin 67*
    - Return on Assets 67*
    - Return on Equity 68*
  - Market Value Measures 69
    - Price-Earnings Ratio 69*
    - Price-Sales Ratio 69*
    - Market-to-Book Ratio 70*
    - Enterprise Value-EBITDA Multiple 71*
    - A Note on Ratio Analysis 71*
  - Conclusion 71
- 3.4 The DuPont Identity 72**
  - A Closer Look at ROE 73
  - An Expanded DuPont Analysis 75
- 3.5 Using Financial Statement Information 76**
  - Why Evaluate Financial Statements? 76

- Internal Uses 77*
- External Uses 77*
- Choosing a Benchmark 77
  - Time Trend Analysis 77*
  - Peer Group Analysis 78*
- Problems with Financial Statement Analysis 83
- 3.6 Summary and Conclusions 84**

### CHAPTER 4

#### LONG-TERM FINANCIAL PLANNING AND GROWTH 96

- 4.1 What Is Financial Planning? 98**
  - Growth as a Financial Management Goal 98
  - Dimensions of Financial Planning 98
  - What Can Planning Accomplish? 99
    - Examining Interactions 99*
    - Exploring Options 99*
    - Avoiding Surprises 99*
    - Ensuring Feasibility and Internal Consistency 100*
    - Conclusion 100*
- 4.2 Financial Planning Models: A First Look 100**
  - A Financial Planning Model: The Ingredients 100
    - Sales Forecast 101*
    - Pro Forma Statements 101*
    - Asset Requirements 101*
    - Financial Requirements 101*
    - The Plug 101*
    - Economic Assumptions 102*
  - A Simple Financial Planning Model 102
- 4.3 The Percentage of Sales Approach 103**
  - The Income Statement 103
  - The Balance Sheet 104
  - A Particular Scenario 106
  - An Alternative Scenario 107
- 4.4 External Financing and Growth 109**
  - EFN and Growth 111
  - Financial Policy and Growth 113
    - The Internal Growth Rate 113*
    - The Sustainable Growth Rate 114*
    - Determinants of Growth 114*
  - A Note about Sustainable Growth Rate Calculations 116
- 4.5 Some Caveats Regarding Financial Planning Models 118**
- 4.6 Summary and Conclusions 119**

## PART 3 Valuation of Future Cash Flows

### CHAPTER 5

#### INTRODUCTION TO VALUATION: THE TIME VALUE OF MONEY 130

- 5.1 Future Value and Compounding 131**
  - Investing for a Single Period 131
  - Investing for More Than One Period 131
  - A Note about Compound Growth 137
- 5.2 Present Value and Discounting 138**
  - The Single-Period Case 138
  - Present Values for Multiple Periods 139
- 5.3 More about Present and Future Values 142**
  - Present versus Future Value 142
  - Determining the Discount Rate 143
  - Finding the Number of Periods 146
- 5.4 Summary and Conclusions 150**

### CHAPTER 6

#### DISCOUNTED CASH FLOW VALUATION 156

- 6.1 Future and Present Values of Multiple Cash Flows 157**
  - Future Value with Multiple Cash Flows 157
  - Present Value with Multiple Cash Flows 159
  - A Note about Cash Flow Timing 163
- 6.2 Valuing Level Cash Flows: Annuities and Perpetuities 164**
  - Present Value for Annuity Cash Flows 164
    - Annuity Tables 165
    - Finding the Payment 167
    - Finding the Rate 168
  - Future Value for Annuities 170
  - A Note about Annuities Due 171
  - Perpetuities 172
  - Growing Annuities and Perpetuities 174
- 6.3 Comparing Rates: The Effect of Compounding 174**
  - Effective Annual Rates and Compounding 175
  - Calculating and Comparing Effective Annual Rates 175
  - EARs and APRs 177
  - Taking It to the Limit: A Note about Continuous Compounding 178
- 6.4 Loan Types and Loan Amortization 180**
  - Pure Discount Loans 180
  - Interest-Only Loans 181
  - Amortized Loans 181
- 6.5 Summary and Conclusions 186**

### CHAPTER 7

#### INTEREST RATES AND BOND VALUATION 201

- 7.1 Bonds and Bond Valuation 202**

- Bond Features and Prices 202
- Bond Values and Yields 202
- Interest Rate Risk 206
- Finding the Yield to Maturity: More Trial and Error 207

#### **7.2 More about Bond Features 212**

- Is it Debt or Equity? 212
- Long-Term Debt: The Basics 212
- The Indenture 213
  - Terms of a Bond 214
  - Security 214
  - Seniority 215
  - Repayment 215
  - The Call Provision 215
  - Protective Covenants 216

#### **7.3 Bond Ratings 217**

#### **7.4 Some Different Types of Bonds 218**

- Government Bonds 218
- Zero Coupon Bonds 219
- Floating-Rate Bonds 220
- Other Types of Bonds 221
- Sukuk 222

#### **7.5 Bond Markets 224**

- How Bonds Are Bought and Sold 225
- Bond Price Reporting 225
- A Note about Bond Price Quotes 229

#### **7.6 Inflation and Interest Rates 229**

- Real versus Nominal Rates 229
- The Fisher Effect 230
- Inflation and Present Values 231

#### **7.7 Determinants of Bond Yields 232**

- The Term Structure of Interest Rates 232
- Bond Yields and the Yield Curve: Putting it all Together 235
- Conclusion 236

#### **7.8 Summary and Conclusions 236**

### CHAPTER 8

#### STOCK VALUATION 245

#### **8.1 Common Stock Valuation 246**

- Cash Flows 246
- Some Special Cases 248
  - Zero Growth 248
  - Constant Growth 248
  - Nonconstant Growth 251
  - Two-Stage Growth 253
- Components of the Required Return 254
- Stock Valuation Using Multiples 255

#### **8.2 Some Features of Common and Preferred Stocks 257**

- Common Stock Features 257
  - Shareholder Rights 257

Proxy Voting	258
Classes of Stock	258
Other Rights	259
Dividends	259
Preferred Stock Features	260
Stated Value	260
Cumulative and Noncumulative Dividends	260
Is Preferred Stock Really Debt?	260
<b>8.3 The Stock Markets</b>	<b>261</b>

Dealers and Brokers	261
Organization of the NYSE	262
Members	262
Operations	263
Floor Activity	263
Nasdaq Operations	264
ECNs	266
Stock Market Reporting	266
<b>8.4 Summary and Conclusions</b>	<b>268</b>

## PART 4 Capital Budgeting

### CHAPTER 9

#### NET PRESENT VALUE AND OTHER INVESTMENT CRITERIA 278

<b>9.1 Net Present Value</b>	<b>279</b>
The Basic Idea	279
Estimating Net Present Value	280
<b>9.2 The Payback Rule</b>	<b>283</b>
Defining the Rule	283
Analyzing the Rule	285
Redeeming Qualities of the Rule	285
Summary of the Rule	286
<b>9.3 The Discounted Payback</b>	<b>287</b>
<b>9.4 The Average Accounting Return</b>	<b>289</b>
<b>9.5 The Internal Rate of Return</b>	<b>291</b>
Problems with the IRR	295
Nonconventional Cash Flows	295
Mutually Exclusive Investments	297
Investing or Financing?	299
Redeeming Qualities of the IRR	300
The Modified Internal Rate of Return (MIRR)	301
Method 1: The Discounting Approach	301
Method 2: The Reinvestment Approach	301
Method 3: The Combination Approach	302
MIRR or IRR: Which Is Better?	302
<b>9.6 The Profitability Index</b>	<b>302</b>
<b>9.7 The Practice of Capital Budgeting</b>	<b>303</b>
<b>9.8 Summary and Conclusions</b>	<b>306</b>

### CHAPTER 10

#### MAKING CAPITAL INVESTMENT DECISIONS 318

<b>10.1 Project Cash Flows: A First Look</b>	<b>319</b>
Relevant Cash Flows	319
The Stand-Alone Principle	319
<b>10.2 Incremental Cash Flows</b>	<b>320</b>
Sunk Costs	320
Opportunity Costs	320
Side Effects	321
Net Working Capital	321

Financing Costs	321
Other Issues	322
<b>10.3 Pro Forma Financial Statements and Project Cash Flows</b>	<b>322</b>
Getting Started: Pro Forma Financial Statements	322
Project Cash Flows	323
Project Operating Cash Flow	323
Project Net Working Capital and Capital Spending	324
Projected Total Cash Flow and Value	324
<b>10.4 More about Project Cash Flow</b>	<b>325</b>
A Closer Look at Net Working Capital	325
Depreciation	328
Modified ACRS Depreciation (MACRS)	328
Bonus Depreciation	329
Book Value versus Market Value	330
An Example: The Majestic Mulch and Compost Company (MMCC)	331
Operating Cash Flows	332
Change in NWC	333
Capital Spending	334
Total Cash Flow and Value	334
Conclusion	334
<b>10.5 Alternative Definitions of Operating Cash Flow</b>	<b>335</b>
The Bottom-Up Approach	336
The Top-Down Approach	336
The Tax Shield Approach	336
Conclusion	337
<b>10.6 Some Special Cases of Discounted Cash Flow Analysis</b>	<b>337</b>
Evaluating Cost-Cutting Proposals	337
Setting the Bid Price	339
Evaluating Equipment Options with Different Lives	341
<b>10.7 Summary and Conclusions</b>	<b>343</b>

### CHAPTER 11

#### PROJECT ANALYSIS AND EVALUATION 356

<b>11.1 Evaluating NPV Estimates</b>	<b>357</b>
The Basic Problem	357

Projected versus Actual Cash Flows	357
Forecasting Risk	357
Sources of Value	358
<b>11.2 Scenario and Other What-If Analyses</b>	<b>359</b>
Getting Started	359
Scenario Analysis	360
Sensitivity Analysis	362
Simulation Analysis	364
<b>11.3 Break-Even Analysis</b>	<b>364</b>
Fixed and Variable Costs	365
Variable Costs	365
Fixed Costs	366
Total Costs	366
Accounting Break-Even	367
Accounting Break-Even: A Closer Look	369
Uses for the Accounting Break-Even	369
<b>11.4 Operating Cash Flow, Sales Volume, and Break-Even</b>	<b>370</b>
Accounting Break-Even and Cash Flow	370
The Base Case	371
Calculating the Break-Even Level	371
Payback and Break-Even	371
Sales Volume and Operating Cash Flow	372
Cash Flow, Accounting, and Financial Break-Even Points	372
Accounting Break-Even Revisited	373
Cash Break-Even	373
Financial Break-Even	373
Conclusion	374
<b>11.5 Operating Leverage</b>	<b>375</b>
The Basic Idea	375
Implications of Operating Leverage	375
Measuring Operating Leverage	375
Operating Leverage and Break-Even	377
<b>11.6 Capital Rationing</b>	<b>378</b>
Soft Rationing	378
Hard Rationing	378
<b>11.7 Summary and Conclusions</b>	<b>379</b>

## PART 5 Risk and Return

### CHAPTER 12

#### SOME LESSONS FROM CAPITAL MARKET HISTORY 388

<b>12.1 Returns</b>	<b>389</b>
Dollar Returns	389
Percentage Returns	391
<b>12.2 The Historical Record</b>	<b>393</b>
A First Look	393
A Closer Look	395
<b>12.3 Average Returns: The First Lesson</b>	<b>400</b>
Calculating Average Returns	400
Average Returns: The Historical Record	400
Risk Premiums	401
The First Lesson	401
<b>12.4 The Variability of Returns: The Second Lesson</b>	<b>402</b>
Frequency Distributions and Variability	402
The Historical Variance and Standard Deviation	403
The Historical Record	404
Normal Distribution	405
The Second Lesson	407
2008: A Year to Remember	407
Using Capital Market History	408
More on the Stock Market Risk Premium	409
<b>12.5 More about Average Returns</b>	<b>411</b>
Arithmetic versus Geometric Averages	411
Calculating Geometric Average Returns	411
Arithmetic Average Return or Geometric Average Return?	414
<b>12.6 Capital Market Efficiency</b>	<b>415</b>
Price Behavior in an Efficient Market	415
The Efficient Markets Hypothesis	416

Some Common Misconceptions about the EMH 417

The Forms of Market Efficiency 418

#### 12.7 Summary and Conclusions 419

### CHAPTER 13

#### RETURN, RISK, AND THE SECURITY MARKET LINE 427

<b>13.1 Expected Returns and Variances</b>	<b>428</b>
Expected Return	428
Calculating the Variance	430
<b>13.2 Portfolios</b>	<b>431</b>
Portfolio Weights	432
Portfolio Expected Returns	432
Portfolio Variance	433
<b>13.3 Announcements, Surprises, and Expected Returns</b>	<b>435</b>
Expected and Unexpected Returns	435
Announcements and News	435
<b>13.4 Risk: Systematic and Unsystematic</b>	<b>437</b>
Systematic and Unsystematic Risk	437
Systematic and Unsystematic Components of Return	437
<b>13.5 Diversification and Portfolio Risk</b>	<b>438</b>
The Effect of Diversification: Another Lesson from Market History	438
The Principle of Diversification	439
Diversification and Unsystematic Risk	440
Diversification and Systematic Risk	441
<b>13.6 Systematic Risk and Beta</b>	<b>441</b>
The Systematic Risk Principle	442

Measuring Systematic Risk	442	The Security Market Line	450
Portfolio Betas	444	<i>Market Portfolios</i>	450
<b>13.7 The Security Market Line</b>	<b>445</b>	<i>The Capital Asset Pricing Model</i>	450
Beta and the Risk Premium	445	<b>13.8 The SML and the Cost of Capital: A Preview</b>	<b>453</b>
<i>The Reward-to-Risk Ratio</i>	446	The Basic Idea	453
<i>The Basic Argument</i>	447	The Cost of Capital	453
<i>The Fundamental Result</i>	448	<b>13.9 Summary and Conclusions</b>	<b>454</b>

## PART 6 Cost of Capital and Long-Term Financial Policy

### CHAPTER 14

#### COST OF CAPITAL 465

<b>14.1 The Cost of Capital: Some Preliminaries</b>	<b>466</b>
Required Return versus Cost of Capital	466
Financial Policy and Cost of Capital	467
<b>14.2 The Cost of Equity</b>	<b>467</b>
The Dividend Growth Model Approach	467
<i>Implementing the Approach</i>	468
<i>Estimating g</i>	468
<i>Advantages and Disadvantages of the Approach</i>	469
The SML Approach	469
<i>Implementing the Approach</i>	470
<i>Advantages and Disadvantages of the Approach</i>	470
<b>14.3 The Costs of Debt and Preferred Stock</b>	<b>471</b>
The Cost of Debt	471
The Cost of Preferred Stock	471
<b>14.4 The Weighted Average Cost of Capital</b>	<b>472</b>
The Capital Structure Weights	472
Taxes and the Weighted Average Cost of Capital	473
Calculating the WACC for Eastman Chemical	474
<i>Eastman's Cost of Equity</i>	475
<i>Eastman's Cost of Debt</i>	477
<i>Eastman's WACC</i>	478
Solving the Warehouse Problem and Similar Capital Budgeting Problems	480
Performance Evaluation: Another Use of the WACC	482
<b>14.5 Divisional and Project Costs of Capital</b>	<b>483</b>
The SML and the WACC	483
Divisional Cost of Capital	484
The Pure Play Approach	484
The Subjective Approach	485
<b>14.6 Company Valuation with the WACC</b>	<b>486</b>
<b>14.7 Flotation Costs and the Average Cost of Capital</b>	<b>489</b>
The Basic Approach	489
Flotation Costs and NPV	490
Internal Equity and Flotation Costs	492
<b>14.8 Summary and Conclusions</b>	<b>492</b>

### CHAPTER 15

#### RAISING CAPITAL 502

<b>15.1 Entrepreneurship: Early-Stage Financing and Venture Capital</b>	<b>503</b>
Entrepreneurship	503
Venture Capital	503
Some Venture Capital Realities	505
Venture Capital Firms	506
Crowdfunding	507
Initial Coin Offerings (ICOS)	507
Conclusion	508
<b>15.2 Selling Securities to the Public: The Basic Procedure</b>	<b>508</b>
<b>15.3 Alternative Issue Methods</b>	<b>511</b>
<b>15.4 Underwriters</b>	<b>512</b>
Choosing an Underwriter	512
Types of Underwriting	512
<i>Firm Commitment Underwriting</i>	512
<i>Best Efforts Underwriting</i>	513
<i>Dutch Auction Underwriting</i>	513
The Aftermarket	514
The Green Shoe Provision	514
Lockup Agreements	514
The Quiet Period	515
Direct Listing	515
<b>15.5 IPOs and Underpricing</b>	<b>515</b>
IPO Underpricing: The 1999–2000 Experience	516
Evidence on Underpricing	519
The Partial Adjustment Phenomenon	520
Why Does Underpricing Exist?	521
<b>15.6 New Equity Sales and the Value of the Firm</b>	<b>522</b>
<b>15.7 The Costs of Issuing Securities</b>	<b>523</b>
The Costs of Selling Stock to the Public	523
The Costs of Going Public: A Case Study	524
<b>15.8 Rights</b>	<b>525</b>
The Mechanics of a Rights Offering	525
Number of Rights Needed to Purchase a Share	526
The Value of a Right	527
Ex Rights	528
The Underwriting Arrangements	530
Effects on Shareholders	530

- 15.9 Dilution** 531
  - Dilution of Proportionate Ownership 531
  - Dilution of Value: Book versus Market Values 531
    - A Misconception* 532
    - The Correct Arguments* 532
- 15.10 Issuing Long-Term Debt** 533
- 15.11 Shelf Registration** 534
- 15.12 Summary and Conclusions** 535

## CHAPTER 16

### FINANCIAL LEVERAGE AND CAPITAL STRUCTURE POLICY 541

- 16.1 The Capital Structure Question** 542
  - Firm Value and Stock Value: An Example 542
  - Capital Structure and the Cost of Capital 543
- 16.2 The Effect of Financial Leverage** 544
  - The Basics of Financial Leverage 544
    - Financial Leverage, EPS, and ROE: An Example* 544
    - EPS versus EBIT* 545
  - Corporate Borrowing and Homemade Leverage 547
- 16.3 Capital Structure and the Cost of Equity Capital** 548
  - M&M Proposition I: The Pie Model 548
  - The Cost of Equity and Financial Leverage: M&M Proposition II 549
  - Business and Financial Risk 551
- 16.4 M&M Propositions I and II with Corporate Taxes** 552
  - The Interest Tax Shield 553
  - Taxes and M&M Proposition I 553
  - Taxes, the WACC, and Proposition II 554
  - Conclusion 555
- 16.5 Bankruptcy Costs** 557
  - Direct Bankruptcy Costs 558
  - Indirect Bankruptcy Costs 558
- 16.6 Optimal Capital Structure** 559
  - The Static Theory of Capital Structure 559
  - Optimal Capital Structure and the Cost of Capital 560
  - Optimal Capital Structure: A Recap 561
  - Capital Structure: Some Managerial Recommendations 563
    - Taxes* 563
    - Financial Distress* 563
- 16.7 The Pie Again** 563
  - The Extended Pie Model 564
  - Marketed Claims versus Nonmarketed Claims 565
- 16.8 The Pecking-Order Theory** 565
  - Internal Financing and the Pecking Order 565
  - Implications of the Pecking Order 566
- 16.9 Observed Capital Structures** 567
- 16.10 A Quick Look at the Bankruptcy Process** 569
  - Liquidation and Reorganization 569
    - Bankruptcy Liquidation* 569
    - Bankruptcy Reorganization* 570
  - Financial Management and the Bankruptcy Process 571

- Agreements to Avoid Bankruptcy 572
- 16.11 Summary and Conclusions** 572

## CHAPTER 17

### DIVIDENDS AND PAYOUT POLICY 580

- 17.1 Cash Dividends and Dividend Payment** 581
  - Cash Dividends 581
  - Standard Method of Cash Dividend Payment 581
  - Dividend Payment: A Chronology 582
  - More about the Ex-dividend Date 582
- 17.2 Does Dividend Policy Matter?** 584
  - An Illustration of the Irrelevance of Dividend Policy 584
    - Current Policy: Dividends Set Equal to Cash Flow* 584
    - Alternative Policy: Initial Dividend Greater Than Cash Flow* 585
  - Homemade Dividends 585
  - A Test 586
- 17.3 Real-World Factors Favoring a Low Dividend Payout** 587
  - Taxes 587
  - Flotation Costs 587
  - Dividend Restrictions 587
- 17.4 Real-World Factors Favoring a High Dividend Payout** 588
  - Desire for Current Income 588
  - Tax and Other Benefits from High Dividends 589
    - Corporate Investors* 589
    - Tax-Exempt Investors* 589
  - Conclusion 589
- 17.5 A Resolution of Real-World Factors?** 589
  - Information Content of Dividends 590
  - The Clientele Effect 591
- 17.6 Stock Repurchases: An Alternative to Cash Dividends** 591
  - Cash Dividends versus Repurchase 592
  - Real-World Considerations in a Repurchase 594
  - Share Repurchase and EPS 594
- 17.7 What We Know and Do Not Know about Dividend and Payout Policies** 595
  - Dividends and Dividend Payers 595
  - Corporations Smooth Dividends 597
  - Putting It All Together 598
  - Some Survey Evidence on Dividends 600
- 17.8 Stock Dividends and Stock Splits** 602
  - Some Details about Stock Splits and Stock Dividends 602
    - Example of a Small Stock Dividend* 602
    - Example of a Stock Split* 603
    - Example of a Large Stock Dividend* 603
  - Value of Stock Splits and Stock Dividends 603
    - The Benchmark Case* 603
    - Popular Trading Range* 604
  - Reverse Splits 604
- 17.9 Summary and Conclusions** 605

## PART 7 Short-Term Financial Planning and Management

### CHAPTER 18

#### SHORT-TERM FINANCE AND PLANNING 612

##### 18.1 Tracing Cash and Net Working Capital 613

##### 18.2 The Operating Cycle and the Cash Cycle 614

Defining the Operating and Cash Cycles 615

*The Operating Cycle* 615

*The Cash Cycle* 615

The Operating Cycle and the Firm's Organizational Chart 616

Calculating the Operating and Cash Cycles 617

*The Operating Cycle* 617

*The Cash Cycle* 618

Interpreting the Cash Cycle 619

##### 18.3 Some Aspects of Short-Term Financial Policy 620

The Size of the Firm's Investment in Current Assets 620

Alternative Financing Policies for Current Assets 621

*An Ideal Case* 623

*Different Policies for Financing Current Assets* 623

Which Financing Policy Is Best? 625

Current Assets and Liabilities in Practice 626

##### 18.4 The Cash Budget 627

Sales and Cash Collections 627

Cash Outflows 628

The Cash Balance 628

##### 18.5 Short-Term Borrowing 630

Unsecured Loans 630

*Compensating Balances* 630

*Cost of a Compensating Balance* 630

*Letters of Credit* 631

Secured Loans 631

*Accounts Receivable Financing* 631

*Inventory Loans* 632

Other Sources 633

##### 18.6 A Short-Term Financial Plan 633

##### 18.7 Summary and Conclusions 634

### CHAPTER 19

#### CASH AND LIQUIDITY MANAGEMENT 646

##### 19.1 Reasons for Holding Cash 647

The Speculative and Precautionary Motives 647

The Transaction Motive 647

Compensating Balances 647

Costs of Holding Cash 647

Cash Management versus Liquidity Management 648

##### 19.2 Understanding Float 648

Disbursement Float 648

Collection Float and Net Float 649

Float Management 650

*Measuring Float* 650

*Some Details* 651

*Cost of the Float* 652

*Ethical and Legal Questions* 653

Electronic Data Interchange and Check 21: The End of Float? 654

##### 19.3 Cash Collection and Concentration 655

Components of Collection Time 655

Cash Collection 655

Lockboxes 655

Cash Concentration 657

Accelerating Collections: An Example 658

##### 19.4 Managing Cash Disbursements 659

Increasing Disbursement Float 660

Controlling Disbursements 660

*Zero-Balance Accounts* 660

*Controlled Disbursement Accounts* 661

##### 19.5 Investing Idle Cash 661

Temporary Cash Surpluses 661

*Seasonal or Cyclical Activities* 661

*Planned or Possible Expenditures* 661

Characteristics of Short-Term Securities 662

*Maturity* 662

*Default Risk* 662

*Marketability* 662

*Taxes* 663

Some Different Types of Money Market Securities 663

##### 19.6 Summary and Conclusions 664

### CHAPTER 20

#### CREDIT AND INVENTORY MANAGEMENT 679

##### 20.1 Credit and Receivables 679

Components of Credit Policy 680

The Cash Flows from Granting Credit 680

The Investment in Receivables 681

##### 20.2 Terms of the Sale 681

The Basic Form 681

The Credit Period 682

*The Invoice Date* 682

*Length of the Credit Period* 682

Cash Discounts 683

*Cost of the Credit* 684

*Trade Discounts* 684

*The Cash Discount and the ACP* 684

Credit Instruments 685

##### 20.3 Analyzing Credit Policy 685

Credit Policy Effects 685

Evaluating a Proposed Credit Policy 686

*NPV of Switching Policies* 686

*A Break-Even Application* 688

- 20.4 Optimal Credit Policy** 688
  - The Total Credit Cost Curve 688
  - Organizing the Credit Function 689
- 20.5 Credit Analysis** 690
  - When Should Credit Be Granted? 690
    - A One-Time Sale* 690
    - Repeat Business* 691
  - Credit Information 692
  - Credit Evaluation and Scoring 692
- 20.6 Collection Policy** 693
  - Monitoring Receivables 693
  - Collection Effort 694
- 20.7 Inventory Management** 694
  - The Financial Manager and Inventory Policy 694
  - Inventory Types 695
- Inventory Costs 695
- 20.8 Inventory Management Techniques** 696
  - The ABC Approach 696
  - The Economic Order Quantity Model 696
    - Inventory Depletion* 698
    - The Carrying Costs* 698
    - The Restocking Costs* 698
    - The Total Costs* 699
  - Extensions to the EOQ Model 701
    - Safety Stocks* 701
    - Reorder Points* 701
  - Managing Derived-Demand Inventories 701
    - Materials Requirements Planning* 701
    - Just-in-Time Inventory* 703
- 20.9 Summary and Conclusions** 703

## PART 8 Topics in Corporate Finance

### CHAPTER 21

- INTERNATIONAL CORPORATE FINANCE** 717
- 21.1 Terminology** 718
- 21.2 Foreign Exchange Markets and Exchange Rates** 719
  - Exchange Rates 720
    - Exchange Rate Quotations* 720
    - Cross-Rates and Triangle Arbitrage* 720
    - Types of Transactions* 723
- 21.3 Purchasing Power Parity** 724
  - Absolute Purchasing Power Parity 724
  - Relative Purchasing Power Parity 726
    - The Basic Idea* 726
    - The Result* 726
    - Currency Appreciation and Depreciation* 727
- 21.4 Interest Rate Parity, Unbiased Forward Rates, and the International Fisher Effect** 728
  - Covered Interest Arbitrage 728
  - Interest Rate Parity 729
  - Forward Rates and Future Spot Rates 730
  - Putting It All Together 730
    - Uncovered Interest Parity* 731
    - The International Fisher Effect* 731
- 21.5 International Capital Budgeting** 732
  - Method 1: The Home Currency Approach 732
  - Method 2: The Foreign Currency Approach 733
  - Unremitted Cash Flows 734
- 21.6 Exchange Rate Risk** 734
  - Short-Run Exposure 734
  - Long-Run Exposure 735
  - Translation Exposure 736
  - Managing Exchange Rate Risk 737
- 21.7 Political Risk** 737
  - The Tax Cuts and Jobs Act of 2017 737
  - Managing Political Risk 738
- 21.8 Summary and Conclusions** 739

### CHAPTER 22

- BEHAVIORAL FINANCE: IMPLICATIONS FOR FINANCIAL MANAGEMENT** 746
- 22.1 Introduction to Behavioral Finance** 747
- 22.2 Biases** 747
  - Overconfidence 747
  - Overoptimism 748
  - Confirmation Bias 748
- 22.3 Framing Effects** 749
  - Loss Aversion 749
  - House Money 750
- 22.4 Heuristics** 752
  - The Affect Heuristic 752
  - The Representativeness Heuristic 753
  - Representativeness and Randomness 753
  - The Gambler's Fallacy 754
- 22.5 Behavioral Finance and Market Efficiency** 755
  - Limits to Arbitrage 756
    - The 3Com/Palm Mispricing* 756
    - The Royal Dutch/Shell Price Ratio* 757
  - Bubbles and Crashes 758
    - The Crash of 1929* 758
    - The Crash of October 1987* 759
    - The Nikkei Crash* 761
    - The "Dot-Com" Bubble and Crash* 761
- 22.6 Market Efficiency and the Performance of Professional Money Managers** 763
- 22.7 Summary and Conclusions** 766

### CHAPTER 23

- ENTERPRISE RISK MANAGEMENT** 769
- 23.1 Insurance** 770
- 23.2 Managing Financial Risk** 772

The Risk Profile	772
Reducing Risk Exposure	772
Hedging Short-Run Exposure	774
Cash Flow Hedging: A Cautionary Note	774
Hedging Long-Term Exposure	775
Conclusion	775
<b>23.3 Hedging with Forward Contracts</b>	<b>776</b>
Forward Contracts: The Basics	776
The Payoff Profile	776
Hedging with Forwards	777
<i>A Caveat</i>	777
<i>Credit Risk</i>	778
<i>Forward Contracts in Practice</i>	778
<b>23.4 Hedging with Futures Contracts</b>	<b>778</b>
Trading in Futures	779
Futures Exchanges	779
Hedging with Futures	779
<b>23.5 Hedging with Swap Contracts</b>	<b>782</b>
Currency Swaps	782
Interest Rate Swaps	783
Commodity Swaps	783
The Swap Dealer	783
Interest Rate Swaps: An Example	784
<b>23.6 Hedging with Option Contracts</b>	<b>785</b>
Option Terminology	785
Options versus Forwards	785
Option Payoff Profiles	785
Option Hedging	786
Hedging Commodity Price Risk with Options	787
Hedging Exchange Rate Risk with Options	788
Hedging Interest Rate Risk with Options	788
<i>A Preliminary Note</i>	788
<i>Interest Rate Caps</i>	789
<i>Other Interest Rate Options</i>	789
Actual Use of Derivatives	789
<b>23.7 Summary and Conclusions</b>	<b>791</b>

## CHAPTER 24

### OPTIONS AND CORPORATE FINANCE 796

<b>24.1 Options: The Basics</b>	<b>797</b>
Puts and Calls	797
Stock Option Quotations	798
Option Payoffs	799
<b>24.2 Fundamentals of Option Valuation</b>	<b>802</b>
Value of a Call Option at Expiration	802
The Upper and Lower Bounds on a Call Option's Value	803
<i>The Upper Bound</i>	803
<i>The Lower Bound</i>	803
A Simple Model: Part I	805
<i>The Basic Approach</i>	805
<i>A More Complicated Case</i>	805
Four Factors Determining Option Values	806

<b>24.3 Valuing a Call Option</b>	<b>807</b>
A Simple Model: Part II	807
The Fifth Factor	808
A Closer Look	809
<b>24.4 Employee Stock Options</b>	<b>810</b>
ESO Features	811
ESO Repricing	811
ESO Backdating	812
<b>24.5 Equity as a Call Option on the Firm's Assets</b>	<b>813</b>
Case I: The Debt Is Risk-Free	813
Case II: The Debt Is Risky	814
<b>24.6 Options and Capital Budgeting</b>	<b>815</b>
The Investment Timing Decision	816
Managerial Options	817
<i>Contingency Planning</i>	818
<i>Options in Capital Budgeting: An Example</i>	819
<i>Strategic Options</i>	820
<i>Conclusion</i>	820
<b>24.7 Options and Corporate Securities</b>	<b>820</b>
Warrants	821
<i>The Difference between Warrants and Call Options</i>	821
<i>Earnings Dilution</i>	821
Convertible Bonds	822
<i>Features of a Convertible Bond</i>	822
<i>Value of a Convertible Bond</i>	822
Other Options	824
<i>The Call Provision on a Bond</i>	824
<i>Put Bonds</i>	824
<i>Insurance and Loan Guarantees</i>	825
<b>24.8 Summary and Conclusions</b>	<b>826</b>

## CHAPTER 25

### OPTION VALUATION 835

<b>25.1 Put-Call Parity</b>	<b>836</b>
Protective Puts	836
An Alternative Strategy	836
The Result	837
Continuous Compounding: A Refresher Course	838
<b>25.2 The Black-Scholes Option Pricing Model</b>	<b>841</b>
The Call Option Pricing Formula	841
Put Option Valuation	844
A Cautionary Note	845
<b>25.3 More about Black-Scholes</b>	<b>846</b>
Varying the Stock Price	846
Varying the Time to Expiration	849
Varying the Standard Deviation	851
Varying the Risk-Free Rate	851
Implied Standard Deviations	851

# Pedagogical Use of Color

Throughout the 13th edition of *Fundamentals of Corporate Finance*, we make color a functional dimension of the discussion. In almost every chapter, color plays an extensive and largely self-evident role. Color in these chapters alerts students to the relationship between numbers in a discussion and an accompanying table or figure.

## CHAPTER 2

**Blue:** Identifies net capital spending and change in net working capital

**Green:** Identifies cash flow numbers

## CHAPTERS 3 AND 4

*Throughout the chapter*

**Blue:** Identifies income statements

**Green:** Identifies balance sheets (Also see all 23 ratios in Chapter 3)

## CHAPTER 7

*Section 7.4*

**Blue:** Identifies the implicit interest expense

**Green:** Identifies the straight-line interest expense

## CHAPTER 9

*Section 9.5*

**Blue:** Identifies Project A

**Green:** Identifies Project B

## CHAPTER 13

*Sections 13.1 and 13.2*

**Blue:** Identifies Stock L

**Green:** Identifies Stock U

*Section 13.7*

**Blue:** Identifies Asset B

**Green:** Identifies Asset A

## CHAPTER 14

*Section 14.2*

**Blue:** Identifies dollar and percentage changes in dividends

**Green:** Identifies dividends

## CHAPTER 15

*Section 15.9*

**Blue:** Identifies values of shares with and without dilution

**Green:** Identifies original values of shares

## CHAPTER 16

*Section 16.2*

**Blue:** Identifies the proposed capital structure

**Green:** Identifies the current capital structure

*Section 16.4*

**Blue:** Identifies Firm L

**Green:** Identifies Firm U

## CHAPTER 18

*Section 18.4*

**Blue:** Identifies total cash collections

**Green:** Identifies total cash disbursements

**Bold Black:** Identifies the net cash inflows

## CHAPTER 19

*Section 19.2*

**Blue:** Receipts and deposits

**Green:** Total float

*End-of-chapter Appendix*

**Blue:** Identifies contributing costs

**Green:** Identifies the opportunity, trading, and total costs

## CHAPTER 20

*Section 20.8*

**Blue:** Identifies numbers exceeding the cost-minimizing restock quantity

**Green:** Identifies numbers falling below the cost-minimizing restock quantity

**Bold Black:** Identifies cost-minimizing quantity

## CHAPTER 21

*Section 21.5*

**Blue:** Identifies cash flows

**Green:** Identifies expected exchange rates

## CHAPTER 23

*Sections 23.2, 23.3, and 23.6*

**Blue:** Identifies the payoff profile

**Green:** Identifies the risk profile

**Magenta:** Identifies the hedge position

## CHAPTER 24

*Section 24.1*

**Blue:** Identifies puts

**Green:** Identifies calls

*Section 24.2*

**Blue:** Identifies stock value

**Green:** Identifies portfolio value

## CHAPTER 26

*Sections 26.3 and 26.5 (See Tables 26.1 and 26.2)*

**Blue:** Identifies Firm A and Global Resources

**Green:** Identifies Firm B and Regional Enterprises

**Bold Black:** Identifies the merged firm, Firm AB, and the merged identity of Global Resources

## CHAPTER 27

*Tables 27.2 and 27.3*

**Blue:** Identifies cash flow components

**Green:** Identifies total cash flow

# Introduction to Corporate Finance

**IN 2009**, Adam Neumann and a business partner opened the first WeWork space in New York's Little Italy. WeWork provided shared office space for businesses, who would rent space as needed, sometimes only for a day. By 2019, WeWork operated in more than 111 cities in 29 countries. Revenues had grown to about \$3 billion, but the company was still losing money. Early in 2019, the giant tech investor SoftBank made a major bet on WeWork, which valued the company at \$47 billion.

Unfortunately, everything was not rosy at WeWork. In the middle of 2019, the company filed to go public in an IPO, but then changed its mind. In late 2019, Softbank agreed to another major investment, but it pulled the deal in 2020. What happened? Among other things, the COVID-19 pandemic hit, calling into question the company's entire business model of shared, face-to-face meeting spaces.

Understanding WeWork's story as it progressed from a start-up to a multi-billion dollar enterprise and its subsequent struggles takes us into issues involving the corporate form of organization, corporate goals, and corporate control, all of which we discuss in this chapter.

## LEARNING OBJECTIVES

**After studying this chapter, you should be able to:**

- |   |  |
|---|--|
| <p><b>L01</b> Define the basic types of financial management decisions and the role of the financial manager.</p> <p><b>L02</b> Explain the goal of financial management.</p> | <p><b>L03</b> Articulate the financial implications of the different forms of business organization.</p> <p><b>L04</b> Explain the conflicts of interest that can arise between managers and owners.</p> |
|---|--|

For updates on the latest happenings in finance, visit [fundamentalsofcorporatefinance.blogspot.com](http://fundamentalsofcorporatefinance.blogspot.com).

To begin our study of modern corporate finance and financial management, we need to address two central issues. First, what is corporate finance and what is the role of the financial manager in the corporation? Second, what is the goal of financial management? To describe the financial management environment, we consider the corporate form of organization and discuss some conflicts that can arise within the corporation. We also take a brief look at financial markets in the United States.

## 1.1 Finance: A Quick Look

Before we plunge into our study of “corp fin,” we think a quick overview of the finance field might be a good idea. Our goal is to clue you in on some of the most important areas in finance and some of the career opportunities available in each. We also want to illustrate some of the ways finance fits in with other areas such as marketing, management, accounting, and technology.

### FINANCE: THE FIVE MAIN AREAS

Financial topics are usually grouped into five main areas:

1. Corporate finance
2. Investments
3. Financial institutions
4. International finance
5. Fintech

We discuss each of these next.

**Corporate Finance** The first of these five areas, corporate finance, is the main subject of this book. We begin covering this subject in our next section, so we will wait until then to get into any details. One thing we should note is that the term *corporate finance* seems to imply that what we cover is only relevant to corporations, but almost all of the topics we consider are broader than that. Maybe *business finance* would be more descriptive, but even this is too narrow because at least half of the subjects we discuss in the pages ahead are basic financial ideas and principles applicable across all the various areas of finance and beyond.

**Investments** Broadly speaking, the investments area deals with financial assets such as stocks and bonds. Some of the more important questions include:

1. What determines the price of a financial asset, such as a share of stock?
2. What are the potential risks and rewards associated with investing in financial assets?
3. What is the best mixture of financial assets to hold?

Students who specialize in the investments area have various career opportunities. Being a financial advisor is one of the most common. Advisors often work for large companies such as Merrill Lynch, advising customers on what types of investments to consider and helping them make buy and sell decisions.

Portfolio management is a second investments-related career path. Portfolio managers, as the name suggests, manage money for investors. For example, individual investors frequently buy into mutual funds. Such funds are a means of pooling money that is then invested by a portfolio manager. Portfolio managers also invest and manage money for pension funds, insurance companies, and many other types of institutions.

Security analysis is a third area. A security analyst researches individual investments, such as stock in a particular company, and makes a determination as to whether the price is right. To do so, an analyst delves deeply into company and industry reports, along with a variety of other information sources. Frequently, financial advisors and portfolio managers rely on security analysts for information and recommendations.

These investments-related areas, like many areas in finance, share an interesting feature. If they are done well, they can be very rewarding financially (translation: You can make a lot of money). The bad news, of course, is that they can be demanding and competitive, so they are not for everybody.

For job descriptions in finance and other areas, visit [www.careers-in-business.com](http://www.careers-in-business.com).

**Financial Institutions** Financial institutions are businesses that deal primarily in financial matters. Banks and insurance companies would probably be the most familiar to you. Institutions such as these employ people to perform a variety of finance-related tasks. For example, a commercial loan officer at a bank would evaluate whether a particular business has a strong enough financial position to warrant extending a loan. At an insurance company, an analyst would decide whether a particular risk was suitable for insuring and what the premium should be.

**International Finance** International finance isn't so much an area as it is a specialization within one of the main areas we described earlier. In other words, careers in international finance generally involve international aspects of either corporate finance, investments, or financial institutions. For example, some portfolio managers and security analysts specialize in non-U.S. companies. Similarly, many U.S. businesses have extensive overseas operations and need employees familiar with such international topics as exchange rates and political risks. Banks frequently are asked to make loans across country lines, so international specialists are needed there as well.

**Fintech** Finance has always been an early adopter of faster, cheaper technologies. The combination of technology and finance is called *fintech*. Fintech is a broad term for a company that uses the internet, mobile phones, software, and/or cloud services to provide a financial service. We discuss fintech in more detail in the next section.

## WHY STUDY FINANCE?

Who needs to know finance? In a word, you. In fact, there are many reasons you need a working knowledge of finance even if you are not planning a finance career. We explore some of these reasons next.

**Marketing and Finance** If you are interested in marketing, you need to know finance because, for example, marketers constantly work with budgets, and they need to understand how to get the greatest payoff from marketing expenditures and programs. Analyzing costs and benefits of projects of all types is one of the most important aspects of finance, so the tools you learn in finance are vital in marketing research, the design of marketing and distribution channels, and product pricing, to name a few areas.

Financial analysts rely heavily on marketing analysts, and the two frequently work together to evaluate the profitability of proposed projects and products. As we will see in a later chapter, sales projections are a key input in almost every type of new product analysis, and such projections are often developed jointly between marketing and finance.

Beyond this, the finance industry employs marketers to help sell financial products such as bank accounts, insurance policies, and mutual funds. Financial services marketing is one of the most rapidly growing types of marketing, and successful financial services marketers are very well compensated. To work in this area, you obviously need to understand financial products.

**Accounting and Finance** For accountants, finance is required reading. In smaller businesses in particular, accountants often are required to make financial decisions as well as perform traditional accounting duties. Further, as the financial world continues to grow more complex, accountants have to know finance to understand the implications of many of the newer types of financial contracts and the impact they have on financial statements. Beyond this, cost accounting and business finance are particularly closely related, sharing many of the same subjects and concerns.

Financial analysts make extensive use of accounting information; they are some of the most important end users. Understanding finance helps accountants recognize what types

of information are particularly valuable and, more generally, how accounting information is actually used (and abused) in practice.

**Management and Finance** One of the most important areas in management is strategy. Thinking about business strategy without simultaneously thinking about financial strategy is an excellent recipe for disaster, and, as a result, management strategists must have a very clear understanding of the financial implications of business plans.

In broader terms, management employees of all types are expected to have a strong understanding of how their jobs affect profitability, and they also are expected to be able to work within their areas to improve profitability. This is precisely what studying finance teaches you: What are the characteristics of activities that create value?

**Technology and Finance** STEM (Science, Technology, Engineering, and Math) classes have become more important in recent years. Finance is considered a STEM discipline, especially at the graduate level. As we discussed, fintech is the area in finance that focuses on the STEM side of things. We'll consider a few examples next. As we'll see, fintech companies can often provide cheaper, faster, and more convenient services than brick-and-mortar setups.

**Banking Fintech** Fintech companies are beginning to compete with traditional bank roles. Mobile payments are a fast-growing form of fintech. Companies such as Venmo and PayPal permit users to transfer money directly from one person to another. These companies have reduced the need for more traditional payment methods, such as checks. In 2019, more than \$1 trillion was transferred by mobile payment companies.

Crowdfunding companies like Kickstarter and GoFundMe allow users to raise money directly from other people. Variations exist in these crowdfunding companies: Kickstarter participants are often buying a product before it comes to market, while GoFundMe is used to raise money for a cause.

Fintechs such as Kabbage, Lendio, and Accion have been created to establish marketplaces to provide companies with working capital. These companies have a more streamlined process compared to banks and are willing to fund working capital for start-ups, which are often unable to find funding through more traditional means.

Other fintech companies, such as Upstart and Prosper, have become marketplaces for direct lending to consumers. Customers of these companies apply for loans, which are funded directly by other participants, usually individuals. In a traditional bank loan, much of the decision is determined by a credit score and previous credit history. These marketplaces allow for loans to be funded based off other factors.

**Blockchain and Cryptocurrency** Blockchain is at the heart of many new fintech services. Blockchain is a list of records, called blocks, that are used to record transactions. Each block contains a cryptographic hash of the previous block, a time stamp, and transaction data. By design, blockchain is resistant to alteration and thus provides an accurate record of transactions.

Cryptocurrency is a digital asset designed to act like currency but is not controlled by any centralized monetary authority. Bitcoin, the first cryptocurrency, was released in 2009. Since then, more than 4,000 variations have been released.

**Insurance** Insurance technology, or *insurtech*, allows customers to research, compare, and purchase insurance online without physically visiting an insurance agent. Insurtech has streamlined the processes of claims management and evaluating and pricing risks, driving down costs. Insurtech companies are expanding into all areas of insurance, from Lemonade, which offers homeowners and renters insurance, and Oscar Health, which specializes in

health insurance, to Trōv, which allows you to insure a single item for any time period right from your mobile phone.

**Robo-advising and Stock Trading** Traditionally, if you invested through a broker, the broker would advise you on a good asset allocation. Robo-advisors provide investment advice based on mathematical rules or algorithms. This means there is minimal human interaction between the investor and an advisor.

Stock trading apps, such as Robinhood, allow investors to trade stocks commission free. Other apps, like Acorns, allow investors to invest small amounts, often as low as \$1. These apps allow small investors to participate in the stock market much more easily (and cheaply).

**Budgeting Apps** Perhaps the most common use of fintech is through budgeting apps used by consumers. Budgeting apps allow people to keep track of income, monthly payments, expenditures, and more, right on a mobile phone. These apps allow people more insight into their finances and help with creating financial plans for the future.

**You and Finance** Perhaps the most important reason to know finance is that you will have to make financial decisions that will be important to you personally. Today, for example, when you go to work for almost any type of company, you will be asked to decide how you want to invest your retirement funds. We'll see in a later chapter that what you choose to do can make an enormous difference in your future financial well-being.

On a different note, is it your dream to start your own business? Good luck if you don't understand basic finance before you start; you'll end up learning it the hard way. Want to know how big your student loan payments are going to be before you take out that next loan? Maybe not, but we'll show you how to calculate them anyway.

These are just a few of the ways that finance will affect your personal and business lives. Whether you want to or not, you are going to have to examine and understand financial issues, and you are going to have to make financial decisions. We want you to do so wisely, so keep reading.

### Concept Questions

- 1.1a** What are the major areas in finance?  
**1.1b** Besides wanting to pass this class, why do you need to understand finance?

## Corporate Finance and the Financial Manager 1.2

In this section, we discuss where the financial manager fits in the corporation. We start by defining *corporate finance* and the financial manager's job.

### WHAT IS CORPORATE FINANCE?

Imagine that you were to start your own business. No matter what type you started, you would have to answer the following three questions in some form or another:

1. What long-term investments should you take on? That is, what lines of business will you be in and what sorts of buildings, machinery, and equipment will you need?
2. Where will you get the long-term financing to pay for your investment? Will you bring in other owners or will you borrow the money?
3. How will you manage your everyday financial activities such as collecting from customers and paying suppliers?

These are not the only questions by any means, but they are among the most important. Corporate finance, broadly speaking, is the study of ways to answer these three questions. Accordingly, we'll be looking at each of them in the chapters ahead.

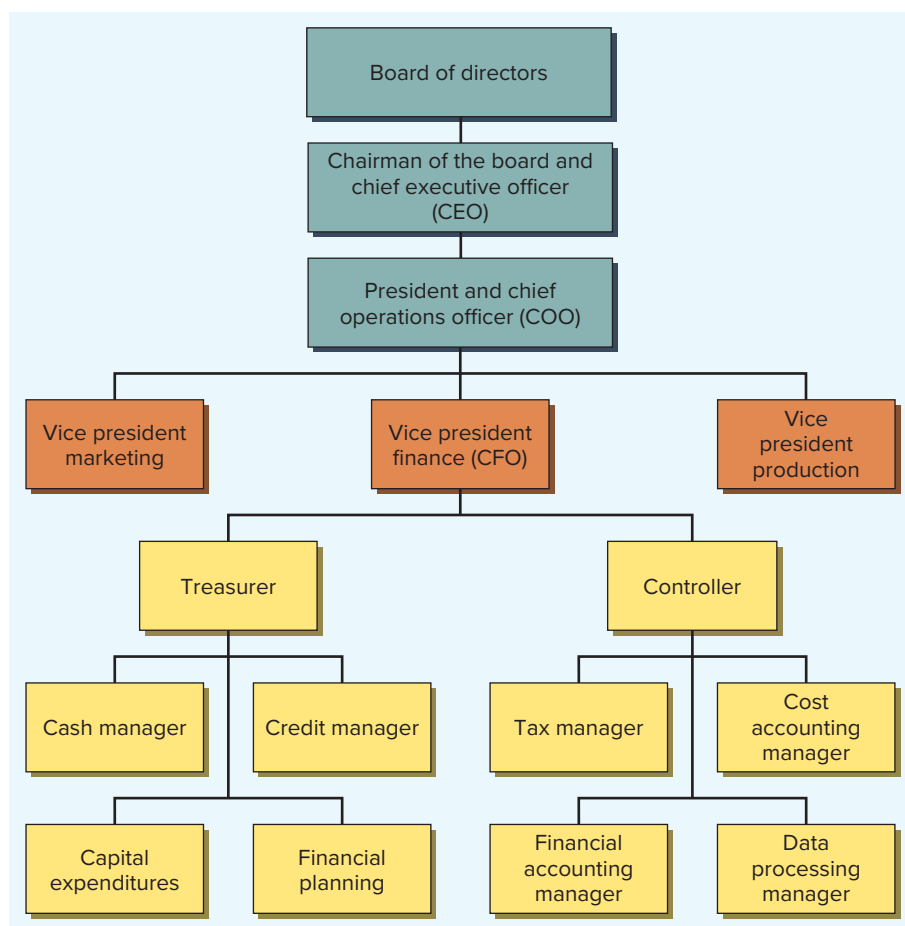

## THE FINANCIAL MANAGER

A striking feature of large corporations is that the owners (the stockholders) are usually not directly involved in making business decisions, particularly on a day-to-day basis. Instead, the corporation employs managers to represent the owners' interests and make decisions on their behalf. In a large corporation, the financial manager would be in charge of answering the three questions we raised in the preceding section.

The financial management function is usually associated with a top officer of the firm, such as a vice president of finance or the chief financial officer (CFO). Figure 1.1 is a simplified organizational chart that highlights the finance activity in a large firm. As shown, the vice president of finance coordinates the activities of the treasurer and the controller. The controller's office handles cost and financial accounting, tax payments, and management information systems. The treasurer's office is responsible for managing the firm's cash and credit, financial planning, and capital expenditures. These treasury activities are all related to the three general questions raised earlier, and the chapters ahead deal primarily with these issues. Our study thus bears mostly on activities usually associated with the treasurer's office.

For current issues facing CFOs, see [ww2.cfo.com](http://ww2.cfo.com).

**FIGURE 1.1**

**A Sample Simplified Organizational Chart**

## FINANCIAL MANAGEMENT DECISIONS

As the preceding discussion suggests, the financial manager must be concerned with three basic types of questions. We consider these in greater detail next.

**Capital Budgeting** The first question concerns the firm's long-term investments. The process of planning and managing a firm's long-term investments is called **capital budgeting**. In capital budgeting, the financial manager tries to identify investment opportunities that are worth more to the firm than they cost to acquire. Loosely speaking, this means that the value of the cash flow generated by an asset exceeds the cost of that asset.

The types of investment opportunities that would typically be considered depend in part on the nature of the firm's business. For a large retailer such as Walmart, deciding whether to open another store would be an important capital budgeting decision. Similarly, for a software company such as Oracle or Microsoft, the decision to develop and market a new spreadsheet program would be a major capital budgeting decision. Some decisions, such as what type of computer system to purchase, might not depend so much on a particular line of business.

Regardless of the specific nature of an opportunity under consideration, financial managers must be concerned not only with how much cash they expect to receive, but also with when they expect to receive it and how likely they are to receive it. Evaluating the *size*, *timing*, and *risk* of future cash flows is the essence of capital budgeting. In fact, as we will see in the chapters ahead, whenever we evaluate a business decision, the size, timing, and risk of the cash flows will be by far the most important things we will consider.

**Capital Structure** The second question for the financial manager concerns ways in which the firm obtains and manages the long-term financing it needs to support its long-term investments. A firm's **capital structure** (or financial structure) is the specific mixture of long-term debt and equity the firm uses to finance its operations. The financial manager has two concerns in this area. First, how much should the firm borrow? That is, what mixture of debt and equity is best? The mixture chosen will affect both the risk and the value of the firm. Second, what are the least expensive sources of funds for the firm?

If we picture the firm as a pie, then the firm's capital structure determines how that pie is sliced—in other words, what percentage of the firm's cash flow goes to creditors and what percentage goes to shareholders. Firms have a great deal of flexibility in choosing a financial structure. The question of whether one structure is better than any other for a particular firm is the heart of the capital structure issue.

In addition to deciding on the financing mix, the financial manager has to decide exactly how and where to raise the money. The expenses associated with raising long-term financing can be considerable, so different possibilities must be carefully evaluated. Also, corporations borrow money from a variety of lenders in a number of different, and sometimes exotic, ways. Choosing among lenders and among loan types is another job handled by the financial manager.

**Working Capital Management** The third question concerns **working capital** management. The term *working capital* refers to a firm's short-term assets, such as inventory, and its short-term liabilities, such as money owed to suppliers. Managing the firm's working capital is a day-to-day activity that ensures that the firm has sufficient resources to continue its operations and avoid costly interruptions. This involves a number of activities related to the firm's receipt and disbursement of cash.

Some questions about working capital that must be answered are the following: (1) How much cash and inventory should we keep on hand? (2) Should we sell on credit? If so, what terms will we offer, and to whom will we extend them? (3) How will we obtain any needed

### capital budgeting

The process of planning and managing a firm's long-term investments.

### capital structure

The mixture of debt and equity maintained by a firm.

### working capital

A firm's short-term assets and liabilities.

short-term financing? Will we purchase on credit, or will we borrow in the short term and pay cash? If we borrow in the short term, how and where should we do it? These are just a small sample of the issues that arise in managing a firm's working capital.

**Conclusion** The three areas of corporate financial management we have described—capital budgeting, capital structure, and working capital management—are very broad categories. Each includes a rich variety of topics, and we have indicated only a few questions that arise in the different areas. The chapters ahead contain greater detail.

### Concept Questions

- 1.2a** What is the capital budgeting decision?
- 1.2b** What do you call the specific mixture of long-term debt and equity that a firm chooses to use?
- 1.2c** Into what category of financial management does cash management fall?

## 1.3 Forms of Business Organization

Large firms in the United States, such as Ford and Microsoft, are almost all organized as corporations. We examine the three different legal forms of business organization—sole proprietorship, partnership, and corporation—to see why this is so. Each form has distinct advantages and disadvantages for the life of the business, the ability of the business to raise cash, and taxes. A key observation is that as a firm grows, the advantages of the corporate form may come to outweigh the disadvantages.

### SOLE PROPRIETORSHIP

#### sole proprietorship

A business owned by a single individual.

A **sole proprietorship** is a business owned by one person. This is the simplest type of business to start and is the least regulated form of organization. Depending on where you live, you might be able to start a proprietorship by doing little more than getting a business license and opening your doors. For this reason, there are more proprietorships than any other type of business, and many businesses that later become large corporations start out as small proprietorships.

The owner of a sole proprietorship keeps all the profits. That's the good news. The bad news is that the owner has *unlimited liability* for business debts. This means that creditors can look beyond business assets to the proprietor's personal assets for payment. Similarly, there is no distinction between personal and business income, so all business income is taxed as personal income. However, with the passage of the Tax Cuts and Jobs Act of 2017, up to 20 percent of business income may be exempt from taxation (the specific rules are too complex to cover here).

The life of a sole proprietorship is limited to the owner's life span, and the amount of equity that can be raised is limited to the amount of the proprietor's personal wealth. This limitation often means that the business is unable to exploit new opportunities because of insufficient capital. Ownership of a sole proprietorship may be difficult to transfer because this transfer requires the sale of the entire business to a new owner.

### PARTNERSHIP

#### partnership

A business formed by two or more individuals or entities.

A **partnership** is similar to a proprietorship except that there are two or more owners (partners). In a *general partnership*, all the partners share in gains or losses, and all have unlimited liability for *all* partnership debts, not just some particular share. The way partnership gains

(and losses) are divided is described in the *partnership agreement*. This agreement can be an informal oral agreement, such as “let’s start a lawn mowing business,” or a lengthy, formal written document.

In a *limited partnership*, one or more *general partners* will run the business and have unlimited liability, but there will be one or more *limited partners* who will not actively participate in the business. A limited partner’s liability for business debts is limited to the amount that partner contributes to the partnership. This form of organization is common in real estate ventures, for example.

The advantages and disadvantages of a partnership are basically the same as those of a proprietorship. Partnerships based on a relatively informal agreement are easy and inexpensive to form. General partners have unlimited liability for partnership debts, and the partnership terminates when a general partner wishes to sell out or dies. Ownership of a general partnership is not easily transferred because a transfer requires that a new partnership be formed. A limited partner’s interest can be sold without dissolving the partnership, but finding a buyer may be difficult. All income is taxed as personal income to the partners, and the amount of equity that can be raised is limited to the partners’ combined wealth. As with sole proprietorships, beginning in 2018, up to 20 percent of a partner’s income may be exempt depending on various rules spelled out in the Tax Cuts and Jobs Act of 2017.

Because a partner in a general partnership can be held responsible for all partnership debts, having a written agreement is very important. Failure to spell out the rights and duties of the partners frequently leads to misunderstandings later on. Also, if you are a limited partner, you must not become deeply involved in business decisions unless you are willing to assume the obligations of a general partner. The reason is that if things go badly, you may be deemed to be a general partner even though you say you are a limited partner.

Based on our discussion, the primary disadvantages of sole proprietorships and partnerships as forms of business organization are (1) unlimited liability for business debts on the part of the owners, (2) limited life of the business, and (3) difficulty of transferring ownership. These three disadvantages add up to a single, central problem: The ability of such businesses to grow can be seriously limited by an inability to raise cash for investment.

## CORPORATION

The **corporation** is the most important form (in terms of size) of business organization in the United States. A corporation is a legal “person,” separate and distinct from its owners, and it has many of the rights, duties, and privileges of an actual person. Corporations can borrow money and own property, sue and be sued, and enter into contracts. A corporation can even be a general partner or a limited partner in a partnership, and a corporation can own stock in another corporation.

Not surprisingly, starting a corporation is somewhat more complicated than starting the other forms of business organizations. Forming a corporation involves preparing *articles of incorporation* (or a charter) and a set of *bylaws*. The articles of incorporation must contain a number of things, including the corporation’s name, its intended life (which can be forever), its business purpose, and the number of shares that can be issued. This information must normally be supplied to the state in which the firm will be incorporated. For most legal purposes, the corporation is a “resident” of that state.

The bylaws are rules describing how the corporation regulates its existence. For example, the bylaws describe how directors are elected. These bylaws may be a simple statement of a few rules and procedures, or they may be quite extensive for a large corporation. The bylaws may be amended or extended from time to time by the stockholders.

In a large corporation, the stockholders and the managers are usually separate groups. The stockholders elect the board of directors, who then select the managers. Managers are charged with running the corporation’s affairs in the stockholders’ interests. In principle, stockholders control the corporation because they elect the directors.

### corporation

A business created as a distinct legal entity composed of one or more individuals or entities.
