Contents

Preface x

Chapter 1 The Importance of Leadership: Setting the Stage 1

- What Is Leadership? 2
- The Importance of Leadership 2
- Three Types of Leaders 3
- How Many Leaders Are There? 4
- How Qualities of the Individual and Environmental Factors Influence the Leadership Process 4
 - Qualities of the Individual 4
 - Environmental Factors 5
 - Interaction between the Individual and the Environment 5
- Where Leaders Learn to Lead and What People Want in a Leader 6
- Exercise 1–1: Personalizing Leadership 7
- Satisfactions and Frustrations of Leaders 9
 - Satisfactions of Leaders 9
 - Frustrations of Leaders 9
- Caring Leadership 10
- Leadership in the Work Setting 11
- Nine Key Areas of Leadership 12

- Chapter One Summary 13
- Answer Key for Chapter One Summary 13

Part 1 Leadership Variables 15

- Chapter 2** The Leadership Equation 16
 - Leadership Trait Theory 16
 - Exercise 2–1: Six Traits of Leadership 19
 - Trait Theory Applied 21
 - Leadership Behavior Theory 21
 - Exercise 2–2: Two Dimensions of Leadership 25
 - Behavior Theory Applied 27
 - Leadership Contingency Theory 27
 - Matching Qualities of Leaders, Characteristics of Followers, and the Nature of the Situation 27
 - Case Study: Mr. Black, Ms. Blue, and Mr. White 28
 - Transformational Leadership 29

Chapter 3 Leadership Qualities, Characteristics of Followers, and Situational Factors 32

- Exercise 3–1: Ten Leadership Qualities—How Do You Rate? 37
- “Negative” Leadership 39
- Characteristics of Followers 40
- The Importance of Trust 40
- Exercise 3–2: Interpersonal Trust Scale 43
- Situational Factors 47
- Different Kinds of Intelligence 47
- Exercise 3–3: Indicator of Multiple Intelligences 49
- Styles of Leading 55
- Exercise 3–4: What Is Your Leadership Style? 57
- Leadership Case in the Public Sector 60
- Leadership Effectiveness Today 61
- Political Leadership 62

- Part One Summary 63
- Answer Key for Part One Summary 63
- Reflection Points 64
- Part One Video Case 65
- Action Assignment 66

Part 2 The Power of Vision 67

Chapter 4 The Importance of Vision and the Motive to Lead 68

- Examples of Powerful Visions 68
- Vision as an Ideal 69
- Leader as Visionary and Motivator of People 70
- Leadership Effectiveness 72
- Exercise 4–1: Leadership Assessment 73
- The Concept of Visioning 75
 - Visioning Process Principles 75
 - Visioning Content Principles 75
 - Visioning Application Principles 76
- The Importance of Alignment, Prioritization, and Execution 77
 - Alignment 77
 - Prioritization 77
 - Execution 78
- Why Create a Vision? 78
- Requirements for an Effective Vision 79
- Social Motives to Lead 80
- Exercise 4–2: Social Motives in the Work Setting 81

Chapter 5 Organizational Climate 85

- Exercise 5–1: Organizational Climate Questionnaire 87
- Patterns of Leadership 89
 - Pattern I Leadership (Exploitive) 89
 - Pattern II Leadership (Impoverished) 89
 - Pattern III Leadership (Supportive) 90
 - Pattern IV Leadership (Enlightened) 90
- The Power of Stories 91
- Building Community in the Workplace 91
 - Community Building and the Role of the Leader 92
 - The Mouse and the Web 94
- The Struggle to Stay Flat 94
- Part Two Summary 95
- Answer Key for Part Two Summary 95
- Reflection Points 95
- Part Two Video Case 97
- Action Assignment 98

Part 3 The Importance of Ethics 99**Chapter 6 Leadership Ethics 100**

- Exercise 6–1: Moral Dilemmas 103
- No Easy Subject 105
- The Roots of Ethics 105
 - The Secular Tradition 105
 - The Religious Tradition 106
- Ethics, Humankind, and Other Animals 107
- Moral Development 107
- Levels of Morality 109
- Lessons in Obedience 111
- Virtue: The Nature of Level III, Stage 6 Morality 113
- Ethics and the Legal Department 116

Chapter 7 The Role of Values and Ethics at Work 117

- The Starbucks Story 118
- Values and the Importance of Courage 119
- Traditional Definitions of Good 119
 - Power 120
 - Personal Integrity 120
 - Natural Simplicity 120
 - Will of God 121
 - Pleasure 121
 - Greatest Good for the Greatest Number 121
 - Pragmatism 121
 - Duty and Right Action 121
- Honesty as a Leadership Value 122
- Full-Swing Values 122
- Leadership and Values 123
- How Leader Behavior Influences Employee Conduct and Organizational Reputation 124
- Personal Values 126
- Exercise 7–1: Personal Values—What Is Important to You? 127

- Exercise 7–2: Values Auction 137
- Organizational Ethics 141
- Why Are Ethics at Work Important to Leaders? 142
- Ethical Climates of Organizations 143
- Exercise 7–3: Organizational Ethics 145
- The Tylenol Story 147
- The WorldCom Case 148
- Case Study: Wendy Kopp—The Recruiter 150
- Exercise 7–4 Values Flag 153
- Part Three Summary 155
- Answer Key for Part Three Summary 155
- Reflection Points 155
- Part Three Video Case 157
- Action Assignment 158

Part 4 The Empowerment of People 159**Chapter 8 Leadership Authority 160**

- Servant Leadership 161
 - Access, Communication, and Support 162
 - A Case of Servant Leadership 163
- Authentic Leadership 164
- Military Leadership 165
- Participative Leadership Philosophy 165
 - An Open-Book Example 165
- The Leadership Position 167
 - Negative Consequences in the Use of Power 167
 - Sources of Leadership Power 167
- Exercise 8–1: What Type of Power Does Your Supervisor Use? 169
- Leadership, Psychological Size, and Two-Way Communication 171
 - Lessons from Gandhi 174

Chapter 9 Empowerment in the Workplace and the Quality Imperative 175

- Principles of an Empowered Workplace 177
- Characteristics of an Empowered Workplace 177
- The Importance of Communication 178
- Managing the Grapevine 179
- Filling the “Need to Know” Gap 180
- Communication Problems and Solutions 180
 - Distance 180
 - Distortion 180
 - Fear 180
 - Trust 180
 - Size 180
 - Complexes 181
 - Structure 182
 - Conflict 182
- The High-Performance Workplace 182
- Leadership Challenge 184
- The Quality Movement 184
- W. Edwards Deming 185
 - The Deming Way 187

Preface

Welcome to today's world of leadership where personal values and interpersonal skills are as important as formal position and command and control structure. The word *leader* first appeared in the English language in the 1300s, coming from the root word *leden* meaning "to travel" or "show the way." The term *leadership* followed some five centuries later. Today the study of leadership is multidisciplinary with contributions from history, philosophy, psychology, political science, business, and education.

The fifth edition of *The Art of Leadership* combines behavior theory with business practice to teach central concepts and skills in leadership. The book is made more valuable and the impact greater by the self-evaluation questionnaires and practical exercises that are used for personal development and class involvement. *The Art of Leadership*, fifth edition, is more than a textbook; it is a "learning" book that actively involves the reader in the learning process.

The fifth edition teaches leadership in a way that is appropriate for both new and experienced leaders, as well as for the everyday person who must influence others to get things done. Our goal is for you to use this book to develop your full potential as a leader, to *become the kind of leader you always wanted to have*, and to help you become a good, and perhaps even a great leader.

Many principles of leadership are timeless. Examples from Socrates to Gandhi are used in the book. In addition, the fifth edition of *The Art of Leadership* adds theoretical foundation, new information, and learning exercises to personalize the subject. The book covers the topics most management and leadership instructors expect and students need to know about. These include leadership trait and behavior theories, charismatic and transformational leadership, leadership ethics and values, human relations and the empowerment of people, the team concept and group dynamics, leader as coach and developer of people, cultural diversity and the global economy, stress in the workplace and adaptive capacity, and performance management and organizational success.

We have revised each part of the book based on comments provided by students and colleagues who used the first four editions and on formal reviews submitted by a cross-section of instructors from community colleges, four-year schools, and universities with graduate programs in leadership. We have attempted to tighten up the writing, expand on real-world examples, and broaden coverage to areas that have emerged more recently on the leadership scene. Using an evidence-based management approach, the book is thoroughly referenced with classic and current citations. The number of references has increased from 840 to 1,050 in the fifth edition.

We have retained the most popular features from previous editions and have added new material in the following areas:

- Part 1: analysis of the dark side of leadership; destructive patterns of leadership behavior; and multiple intelligences
- Part 2: transformational leadership; achieving vision, alignment, prioritization, and execution for organizational success; the importance of culture; and creating a psychologically healthy workplace
- Part 3: moral dilemmas; value orientations; and levels of morality in leadership ethics
- Part 4: servant leadership; the power of persuasion in the leadership process, including psychological size and two-way communication

- Part 5: virtual world communication; leading teams; tools for team building and problem-solving; handling conflict; and employee retention
- Part 6: global and cross-cultural leadership; women in leadership; and valuing diversity as a strength
- Part 7: the psychology of leadership, including the role of personality, employee motivation, and dealing with difficult people
- Part 8: the self-fulfilling prophecy and the leader as coach and mentor; leading change, including adaptive capacity, work-life balance, and the importance of attitude
- Part 9: high performance leadership practices; managing for results; and the wisdom of Peter Drucker for contemporary leaders, including responsibilities of a leader, addressing deficiencies, and coaching for success

Video cases with questions for discussion are included to enhance each part of the text. Web sites are identified for additional information.

Central Ideas of This Book

This book is based on two ideas. The first is that leadership will take place to the extent the leader cares about the work to be done. Equally important, the leader must care about people. Neither of these qualities is sufficient without the other, and neither can be false. People know when the leader cares. When the leader is committed to the task and is concerned about people, these qualities serve as magnets and motivators to followers, and their potential for achievement becomes enormous.

The second premise of the book is that leadership is an art that can be developed through mastery of nine key areas of success. The successful leader must possess knowledge and skills in the following areas: understanding leadership variables, the power of vision, the importance of ethics, the empowerment of people, leadership principles, understanding people, multiplying effectiveness, developing others, and performance management.

Who Should Read This Book?

The fifth edition of *The Art of Leadership* is written for students in leadership development and other management-related courses, such as leadership principles, contemporary leadership, and managerial skills. It is appropriate for leadership courses in business, education, psychology, communication, health care, criminal justice, military, and public administration.

The Art of Leadership, fifth edition, is appropriate for use at the university level as well as in corporate university programs. It is ideally suited for undergraduate degree-completion students and organization-based education, where there is an emphasis on developing leadership competency. *The Art of Leadership*, fifth edition, is popular with students and instructors in both classroom and online courses. No prior coursework in business or management is required.

The level of material is appropriate for both emerging and experienced leaders. Emerging leaders can use this book to prepare themselves to meet the demands of being a leader. Having a vision of what should be done, effectively using authority, motivating people to perform at their best, and solving tough personnel problems—discussed in Parts 2, 4, 6, and 9—are challenges all leaders must face.

Experienced leaders can use this book to address workplace issues, taking leadership skills to new levels of effectiveness. Matching leadership style with the needs of

followers, leading by values and ethical principles, raising employee morale, delegating work effectively, and helping people through change—discussed in Parts 1, 3, 5, 7, and 8—are important areas for leaders to address.

The Art of Leadership, fifth edition, is scholarly, stimulating, and useful for anyone who seeks to better understand the dynamics of leadership, and to improve his or her own leadership effectiveness. By understanding leadership and its challenges, appreciating the importance of caring leadership, and developing the skills required for effective leadership, readers will (1) be more effective at work, (2) gain knowledge and skills, and (3) have the ability to lead others when the opportunity occurs.

Approach and Style of the Book

The difference between most other leadership texts and *The Art of Leadership*, fifth edition, can be compared to the difference between a lecture and a seminar. Although both are good educational vehicles, the lecture is better for conveying large amounts of information, while the seminar is better for developing skills and attitudes. A good lecture is interesting and builds knowledge, while a good seminar is stimulating and builds competency. Without sacrificing either theoretical foundation or important content, the fifth edition of *The Art of Leadership* emphasizes the interactive, seminar approach to learning.

Reviewers of the book identify its major strengths to be clarity of writing and user-friendly exercises. The writing style is personal and conversational, with minimal professional jargon. True-life examples clarify points under consideration. Concepts are supported by facts and figures, as well as by stories and anecdotes that are meaningful and easy to remember. Each part includes cases and learning activities to bridge the gap between theory and on-the-job practice. Useful suggestions are provided, including the leader's use of power, managing conflict, leading teams, and professional resilience. Our goal has been to include material that is interesting to read, practical to use, and personalized to the reader's own concerns.

Supplemental Information and Instructional Aids

The suggestions of users and reviewers of the previous four editions have been incorporated in the fifth edition of *The Art of Leadership*. We have added timely references, new illustrations, and new learning activities. Instructional aids significantly enhance *The Art of Leadership*, fifth edition. The **Online Learning Center (OLC)** at www.mhhe.com/manning5e includes password-protected instructor and student supplements. The instructor's center includes a revised and robust Instructor's Guide that contains learning objectives, discussion questions, PowerPoint presentations, notes and anecdotes, suggested films and videos (annotated), extensive bibliography, suggested articles, interactive cases, applications and exercises, and suggested Web sites. All chapters have updated testbank questions, answer keys, and PowerPoint slides.

Student content includes learning objectives and premium content. **Premium Content** (printed card ISBN 0077424646 or for eCommerce purchase from the OLC) includes Test Your Knowledge, Self-Assessments, and Manager's Hot Seat exercises. Manager's Hot Seat is an interactive, video-based software that puts students in the manager's hot seat where they have to apply their knowledge to make decisions on hot issues such as ethics, diversity, working in teams, and the virtual workplace.

The **Organizational Behavior Video DVD Vol. 1** (ISBN 0073337285) contains a collection of videos featuring interesting issues, companies, and people related to organizational behavior and leadership.

How to Use This Book

The fifth edition of *The Art of Leadership* integrates current knowledge, skill development, and personal insight about leadership. It can be used as a textbook for teaching others, a workbook for personal development, and a desk book for ready reference in the area of leadership. The material is arranged in a logical sequence for learning. The best approach is to *interact* with the material. Read the narrative, complete the questionnaires, examine the interpretations, and review the principles and techniques. Then ask: How does this apply to me? How can I use this concept or information to improve my leadership effectiveness? Then *take action*.

To increase interest and improve overall learning, try the following:

1. Use the Learning Objectives and Reflection Points included in each part of the book to focus your reading, improve comprehension, and increase retention of the material.
2. Share questionnaires and exercises with family, friends, and co-workers, especially those who are interested in leadership development. In this way, you can make tangible use of what you learn and may even help others.
3. Think of the best leader you have ever had. What qualities did this individual possess? In what ways did he or she demonstrate the art of leadership? Use the material in this book to develop your own leadership effectiveness.
4. Write in the book. Follow the advice of Yale professor William Phelps: “Books are for use, not for show; you should own no book that you are afraid to mark up.” You may want to use two markers to highlight information—one for personal development and one to help others. Use the margins, underline, write your own ideas. Personalize the material.
5. Visit the text’s online Web site for more information: www.mhhe.com/manning5e.

Good luck in your learning!

We want your suggestions. If you have questions or see a way to improve this book, please write. Thank you.

Acknowledgments

The last words written in a book are the acknowledgments, and they are placed in the beginning, as they should be.

Special thanks go to Lindsey Walker, Mary Curtis, Jessica Dyer, and Barbara Thomes for their tireless efforts in researching, editing, and preparing the multiple manuscript revisions for publication.

We are especially grateful to those whose work has helped shape and guide our ideas. Many of these prominent thinkers are mentioned in this book. Although the others are too numerous to list, we are no less indebted to them for their contributions to the field. Every effort has been made to locate the sources of the numerous quotes and references we cite, with an eye toward keeping the book both historically rich

and up to date. From time to time, such information may shift. We welcome any corrections or changes.

We would like to thank the many reviewers and adopters who have helped shape the five editions of this text. Special appreciation goes to the following colleagues and supporters who have provided substantive help in manuscript review and research:

Shamima Ahmed, Northern Kentucky University	Gail George, Great American Insurance Company
William Attenweiler, Northern Kentucky University	Fred Gilliam, Capital Metro
Mark Berry, Delta Airlines	Kerry Gillihan, Cardinal Hill Healthcare System
Melanie Bingham, Perfetti-Van Melle, USA	Sharon Glazer, San Jose State University
Anthony Blair, Eastern University	Wade Graves, Grayson County College
Mendy Blair, Baptist Healthcare System	Ronald Green, Johnson & Johnson
Bruce Blaylock, Radford University	Dan Gregorie, V2E Consulting
Coulter R. Boyle, American Electric Power	David Hall, Saginaw Valley State University
Kimberley Breitenbecher, Northern Kentucky University	William Harbour, Longwood University
Rick Brockmeier, Northern Kentucky University	Loretta Harper, University of Utah
Timothy Burt, University of Durham (England)	Ray Henschen, SMG, Limited
Alan Burton, Cianbro Companies	Chuck Hewett, The Jackson Laboratory
Mike Campbell, American Electric Power	Pat Hinckley, State of Maine
Bob Caplon, IBM	Larry Hitch, Ford Motor Company
Margaret Casarez, Unbound Consulting	Martha Hunt, NH Technical Institute
Ruth Cash-Smith, Ottawa University	Terri Iacobucci, Northern Kentucky University
Dennis Chandler, Measured Progress	Jill Isaacs, Western & Southern Financial Group
Jeanetta Chrystie, Southwest Minnesota State University	Deloris James, University of Maryland
Virginia Russell Curley, Nebraska Methodist College	Ray Jones, The Citadel
Mike Daly, Ft. Thomas City Government	Peter Jordan, Radisson Hotels
Mary Deville, Pulaski Technical College	Dan Keefe, Great American Insurance Companies
Jeanne Dexter, Southwestern College	Justin Kendrick, Universal Health Services
Mark Donaghy, RTA	Anne Kilpatrick, Medical University of South Carolina
Jim Drake, Lake Superior College	Chris Kleymeyer, Kentucky Department of Corrections
Charles Drubel, Muskingum College	Michael Koshuta, Purdue University
David Duby, Liberty University	Cathy Kramer, Association for Quality and Participation
Mark Fulford, University of Central Missouri	Denny Krause, Great American Insurance Company

David Krings, Hamilton County Government	Vince Schulte, Northern Kentucky University
Dennis Kripp, Roosevelt University	Angel Scott, University of Durham (England)
Mae Landesman, The Jackson Laboratory	William Shadle, Robert Morris University
Niaz Latif, Purdue University	Matthew Shank, University of Dayton
Charles Leffler, North Carolina State University	Art Shriberg, Xavier University
Catherlyn Lewis-Brim, Warner Southern College	Jennifer Skinner, TriHealth
Bill Lindsay, Northern Kentucky University	Jeffrey Smith, Northern Kentucky University
Kathleen Magee, Anna Maria College	Betty Jo Sproull, Ohio Valley Medical Center
Charles Mambula, Langston University	Carl W. Stenberg, University of North Carolina at Chapel Hill
Steve Martin, The Huber Company	Terri Stewart, Just the Basics
Barbara Mathews, Baptist Healthcare System	Christian Strong, La Rosa's Inc.
Steve McMillen, Tennessee Valley Authority	Robert Thomas, Georgia Institute of Technology
William McQueen, University of Mississippi	Marius Van Melle, Van Melle, Inc.
Laban Miller, Cardinal Hill Healthcare System	Dennis Veit, University of Texas–Arlington
Atul Mitra, University of Northern Iowa	Claus Von Zychlin, Mt. Carmel Health Care System
Philip Moberg, Northern Kentucky University	James C. Votruba, Northern Kentucky University
Nassar Nassar, Bethel College	Jeff Walter, Great American Insurance Companies
Joe Ohren, Eastern Michigan University	John Waltman, Eastern Michigan University
Rhonda Palladi, Georgia State University	Earl Walz, The Urology Group
Joe Petrick, Wright State University	Beverly Watts, Tennessee Commission on Human Rights
Paul Quealy, Cincinnati Milacron	Susan Wehrspann, University of Colorado Hospital
Melody Rawling, Northern Kentucky University	Angela Woodward, University of Kentucky
David Richeson, Mannesmann-Stabilus, USA	Nancy Yates, Butler County Community College
Dan Ronay, Indiana Department of Corrections	Jim Youngquist, Arkansas State University
Tony Ross, Fidelity	Jeff Zimmerman, Northern Kentucky University
Joseph Santora, Essex County College	
Kraig Schell, Angelo State University	

With deep appreciation, we would like to thank the talented and dedicated book publishing team of McGraw-Hill/Irwin: Brand Manager—Michael Ablasmeir; Managing Developmental Editor—Laura Hurst Spell; Marketing Manager—Elizabeth Trepkowski; Senior Account Manager—John Douglass; Content Project Manager—Heather Ervolino, Manish Sharma/Aptara; Copyeditor—Rich Wright; Proofreader—Susan Higgins; Buyer—Nichole Birkenholz; Media Project Manager—Shawn Coenen. Each of you has made the writing of this book enjoyable and the quality of the book immeasurably better.

Most of all, we would like to thank our wives, Nancy and Mary, for their love, encouragement, and never-ending support.

About the Authors

George Manning is professor of psychology at Northern Kentucky University. He is a consultant to business, industry, and government, serving such clients as the AMA, AT&T, General Electric, IBM, the United Auto Workers, Young Presidents' Organization, the U.S. Navy, and the National Institutes of Health. He lectures on economic and social issues, including quality of work life, workforce values, and business ethics. He maintains an active program of research and writing in organizational psychology. His current studies and interests include the changing meaning of work, leadership ethics, and coping skills for personal and social change.

Kent Curtis is professor of organizational leadership at Northern Kentucky University. He has examined the collegiate tutorial system as a visiting Fellow at the University of Durham in England, and has designed numerous employee and management development programs serving such clients as Texas Medical Center, Wendy's International, Procter & Gamble, and American Electric Power. He developed the Northern Kentucky University online organizational leadership degree. His current research includes leading teams, the leader as coach, and teaching leadership via distance learning.

The Art of Leadership

art (ärt), noun. 1. Skill acquired by experience or study. 2. a system of rules to facilitate performance; the use of skill and imagination in applying such rules (the art of building, the art of persuasion). 3. endeavor requiring special knowledge and ability (fine arts, practical arts). 4. the product or result of artistic faculty (body of work).

leadership (lēd-er-ship), noun. 1. Showing the way or direction; the course of action. 2. influencing or causing to follow by words and deeds. 3. guiding the behavior of others through ideas, strength, or heroic feats. 4. the position or function of one who leads (the king led his people). 5. the ability to lead (she displayed leadership skill).

The Importance of Leadership: Setting the Stage

ALL OVER THE WORLD in corporations and government agencies, there are millions of executives who imagine their place on the organization chart has given them a body of followers. And of course it hasn't. It has given them subordinates. Whether the subordinates become followers depends on whether the executives act like leaders.

—John Gardner

Learning Objectives

After studying Chapter One, you will be able to:

- Define *leadership* and discuss its importance.
- Know where leaders learn to lead and what people want in a leader.
- Identify the satisfactions and frustrations of leadership.
- Describe the elements of caring leadership.

Leadership is a concept that is both current and timeless. In one form or another, the leadership process has been central to human interaction since the dawn of society. Excellence in leadership requires the ability to attract capable people, motivate them to put forth their best efforts, and solve problems that arise. These are difficult tasks, which help explain why effective leadership is rare and why we respect those who excel.

To personalize the subject, consider these questions: Have you ever been the victim of a poor leader? How do you feel about the good leaders you have known? If you have experienced both types of leaders, you know firsthand the importance of good leadership. No other factor is more important for work morale and job performance.

There are millions of people who know what it is like to work for a leader who

- Takes all the credit for work done by others.
- Is selfish and rude.

- Makes mistakes and blames others.
- Is tyrannical and cruel.
- Cares only about self-preservation.
- Is threatened by competence.
- Is dishonest and unfair.

All these examples are real, all these factors diminish people's lives at work, and none is necessary. The sad fact is, the percentage of leaders people would be willing to work for again is less than 40 percent. This means that most people would not want to work for the majority of leaders they have had.¹

We are convinced that the weakest link in business, industry, and government today is leadership. It is not technology; it is not tools or equipment; it is not facilities; it is not the skills of employees; it is not systems and procedures. It is leadership. Leadership failure rates range from 40 percent to 60 percent, costing organizations millions of dollars each year.²

What Is Leadership?

Leadership is social influence. It means leaving a mark. It is initiating and guiding, and the result is change. The product is a new character or direction that otherwise would never be. By their **ideas** and **deeds**, leaders show the way and influence the behavior of others.³

To understand the importance of ideas, consider the legend of King Arthur, who led the Knights of the Round Table with his vision of chivalry:

My teacher Merlyn, who always remembered things that haven't happened better than things that have, told me once that a few hundred years from now it will be discovered that the world is round—round like the table at which we sat with such high hope and noble purpose. If you do what I ask, perhaps people will remember how we of Camelot went questing for right and honor and justice. Perhaps one day men will sit around this world as we did once at our table, and go questing once more . . . for right . . . honor . . . and justice.⁴

To understand the importance of deeds, consider the storyteller Homer's account of Achilles, who led Greek warriors by his heroic feats:

So saying, he plunged once more into the fight and man after man fell before his sword and before his spear. He raged among the Trojans like a whirlwind that drives the flames this way and that when there is a forest fire along the dry slopes of the mountains.⁵

History holds countless examples of ideas and acts that have determined human destiny. Consider the events put in motion and the impact on the world when 56 leaders signed the Declaration of Independence, a Unanimous Declaration of the Thirteen United States of America, in Congress July 4, 1776.⁶

The Importance of Leadership

Upon every wave of political history has been a Caesar, an Elizabeth, a Napoleon, or a Saladin. In every lull, leadership has been absent. Consider the period of approximately AD 800 to 1000:

Europe lapsed into utter decentralization, and lost for centuries the administrative unity that the reign of Charlemagne promised. A heavy blow was dealt at the slowly developing culture that the eighth century produced. It was not without justice that the ninth and tenth centuries have been called "the Dark Ages." The internal history of continental Europe became a dismal record of tiresome local feuds and private wars.⁷

Leadership is important not only in government, but in other areas of life as well. Social conscience and conduct have been influenced by reformers such as Martin Luther King and Susan B. Anthony:

Susan B. Anthony was a passionate advocate, who saw “the vote” as the symbol of women’s emancipation and independence as well as the indispensable condition of a true government. . . . Although still voteless, she declared, “The world has never witnessed a greater revolution than in the status of women during the past half century.”⁸

The fates of nations have been determined by military figures such as Alexander the Great and Joan of Arc:

Alexander the Great opened a new era in the history of the world and, by his life’s work, determined its development for many centuries. The permanent result of his life was the development of Greek civilization into a civilization that was worldwide.⁹

Civilization has been shaped by philosophers such as John Stuart Mill and Adam Smith:

John Stuart Mill was one of England’s greatest philosophers, hardly surpassed by thinkers of the highest order. Mill taught that a popular representative government (democracy) inevitably makes for progress.¹⁰

The initiative of leaders has a formative place in history. At times their eloquence, like Churchill’s, may be worth a thousand regiments; their skill, like Napoleon’s, may win battles and establish states. If they are teachers or prophets, like Muhammad, wise in insight, their words may inspire good deeds.

Three Types of Leaders

There are many ways to lead, and indeed, we are influenced by some people even centuries after they are gone. Some leaders are **teachers**, who are rule breakers and value creators; some are **heroes**, responsible for great causes and noble works; and some are **rulers**, motivated principally to dominate others and exercise power. Consider how the ideas and deeds of the teachers, heroes, and rulers in Table 1–1 have influenced the world.¹¹

Table 1–1
Types of Leaders in History

Teacher	Hero	Ruler
Aquinas	Beethoven	Akbar
Aristotle	Columbus	Alexander
Augustine	Curie	Charlemagne
Buddha	da Vinci	Elizabeth I
Confucius	Darwin	Frederick II
Gandhi	Edison	Genghis Khan
Jesus	Einstein	Hitler
Lao-tzu	Ford	Isabella I
Luther	Galileo	Julius Caesar
Marx	Gutenberg	Louis XIV
Moses	Hippocrates	Mao Tse-tung
Muhammad	Michelangelo	Napoleon
Paul	Newton	Ramses II
Plato	Pasteur	Saladin
Rumi	Shakespeare	Washington
Socrates	Watt	Yoritomo

How Many Leaders Are There?

Are we led by a few, or are there many who lead? Words such as *emperor*, *king*, and *chief* differentiated leaders from others in earlier times. There were few powerful positions, books were rare, and mass education was unknown. Today information is everywhere, ideas are free, and self-expression is encouraged. It is a different world, as evidenced by the 66th edition of *Who's Who in America, 2012*, which contains entries for more than 96,000 people. Each of these individuals, by ideas or deeds, has influenced the lives of others; each has been a teacher, hero, or ruler.

There is a changing perception of who can be a leader today. The response is heard over and over: Everyone can be a leader. Leadership is shifting from an autocratic, hierarchical model toward an empowering, participatory model. The new definition recognizes the potential and unique contributions of everyone. As former secretary of labor Robert Reich says, "Everyone has a leader inside." No longer is leadership viewed as a combination of charisma and expertise possessed by only a few people at the top of an organizational pyramid. Today it is viewed as the challenge and responsibility of every individual with potential to make a difference.¹²

Consider the example of Rosa Parks, whose courage helped determine the course of civil rights in American society:

It was December 1, 1955, when a white passenger aboard a Montgomery, Alabama, bus asked Rosa Parks to yield her seat. Her refusal to move to the back of the bus ended in her arrest, but began the nonviolent protest movement for civil rights in the United States. A year-long boycott of the Montgomery bus system, led by Martin Luther King, forced the issue of the South's Jim Crow laws to the forefront of America's consciousness. The Supreme Court's 1956 decision to declare segregation laws unconstitutional signaled a victory for Parks, of whom King said "she had been tracked down by the *Zeitgeist*—the spirit of time."¹³

In meaningful ways, leadership is provided by the multitude of people who influence their families, friends, work groups, and organizations. Responding to situations in work and life that require leadership, "episodic" leaders include parents, supervisors, officers, and other leadership figures. Think of your own experiences. Have you not at some time provided leadership to others, either by your ideas or by the example you set?

How Qualities of the Individual and Environmental Factors Influence the Leadership Process

The leadership scholar James MacGregor Burns once called leadership one of the most observed and least understood phenomena on earth. Questions frequently asked are, Which is more important—the individual or the environment? Are leaders born or made? In his book *Leadership*, Burns concludes that leadership is fired in the forge of both personal ambition and social opportunity.¹⁴

Historically, leadership has been attributed to the individual. This view is sometimes called the "great man theory." Reflecting this view, the Scottish philosopher and historian Thomas Carlyle believed that among the undistinguished masses are people of light and learning, individuals superior in power, courage, and understanding. Carlyle saw the history of the human race as the biographies of these leaders, its great men and women: "Their moral character may be something less than perfect; their courage may not be the essential ingredient; yet they are superior. They are followed, admired, and obeyed to the point of worship."¹⁵

Ralph M. Stogdill, one of the most distinguished scholars on leadership, has found certain traits of the individual that correlate positively with leadership:

The leader is characterized by: a strong drive for responsibility and task completion; vigor and persistence in pursuit of goals; venturesomeness and originality in problem-solving; drive to exercise initiative in social situations; self-confidence and sense of personal identity; willingness to accept consequences of decision and action; readiness to absorb interpersonal stress; willingness to tolerate frustration and delay; ability to influence other persons' behavior; and capacity to structure social interaction systems to the purpose at hand.

It can be concluded that the cluster of characteristics listed above differentiate leaders from followers, effective from ineffective leaders, and higher echelon from lower echelon leaders. In other words, different strata of leaders and followers can be described in terms of the extent to which they exhibit these characteristics. These characteristics considered individually hold little diagnostic or predictive significance. In combination, it would appear that they interact to generate personality dynamics advantageous to the person seeking the responsibilities of leadership.¹⁶

Environmental Factors

More recently, leadership has been viewed as an acquired competency, the product of many forces, not the least of which are environment and circumstance. In this sense, leadership is seen as a social phenomenon, not an individual trait. This school of thought helps explain why leaders who are successful in one situation (for example, building a bridge) may not be successful in another (such as directing a play or a research team).¹⁷ The same individual may exert leadership in one time and place and not in another. Stogdill explains:

It should be noted that to a large extent our conceptions of characteristics of leadership are culturally determined. The ancient Egyptians attributed three qualities of divinity to their king. They said of him, "Authoritative utterance is in thy mouth, perception is in thy heart, and thy tongue is the shrine of justice." This statement would suggest that the Egyptians were demanding of their leader the qualities of authority, discrimination, and just behavior.

An analysis of Greek concepts of leadership, as exemplified by different leaders in Homer's *Iliad*, showed four aspects were valued: (1) justice and judgment—Agamemnon; (2) wisdom and counsel—Nestor; (3) shrewdness and cunning—Odysseus; and (4) valor and action—Achilles. All of these qualities were admired by the Greeks. Shrewdness and cunning are not as highly regarded in our contemporary society as they once were (although justice, judgment, wisdom, valor, and action remain in high esteem).¹⁸

The patterns of behavior regarded as acceptable in leaders differ from time to time and from one culture to another; thus, the establishment of educational institutions and curricula to impart and reinforce knowledge, skills, and attitudes deemed to be important by a society or group.¹⁹

Probably the most convincing support for leadership as a social phenomenon is the fact that throughout history, male leaders have outnumbered female leaders to a significant degree. Even the definition of the word *leader* is a social phenomenon. Consider the case of "President" Edith Wilson, leader in all but name during the incapacitating illness of her husband, President Woodrow Wilson. It is Woodrow, however, whom history credits as leader, as president, even during the period of his inability to govern. Public recognition of Mrs. Wilson's influence would not have been in line with the norms of the times.

Interaction between the Individual and the Environment

A student showed his father his report card containing 5 F's. He said, "Dad, it's either heredity or environment. What do you think?" Evidence shows that both the **qualities of the individual and environmental factors** are important elements in the leadership equation. Leadership results from the inextricable interaction between the two. Findings from sociobiological studies of other animal species support this view. For example, biologist Richard Borowsky has discovered spontaneous growth among male fish. Young males remain small and sexually underdeveloped until the adult population in the group is reduced. Then, size and sexual maturation accelerate dramatically. Clearly, biological and sociological systems are closely related.²⁰

Similar signs of sudden maturation are found in human beings. Leaders may emerge spontaneously in social crises after filling essentially anonymous roles for years. Consider the transformation of Poland's Lech Walesa from shipyard worker to national labor leader during the 1980s. Some people seem to have innate abilities that unfold under certain conditions—external circumstances and internal qualities interact to create a sudden and dramatic spurt of performance. Before becoming president, the biggest staff Abraham Lincoln managed was a law office of one junior partner and several clerks. Lincoln grew in office as if destiny required him, as he put it, to “rise to the occasion.”²¹

Where Leaders Learn to Lead and What People Want in a Leader

In the most extensive study ever done on leadership, the U.S. Chamber of Commerce sought to answer two questions: (1) Where do leaders learn to lead? and (2) What do people want in a leader?²²

The number one place people say they learn to lead is from **experience**. They are thrown in the water and expected to sink or swim. Common Cause founder John W. Gardner identifies his arduous experience as a Marine during World War II as the “learning crucible” in which his own leadership abilities emerged.²³ Ask yourself how much of your leadership approach and skill you have learned from experience.

The second most-cited place people learn to lead is from **examples** or models. They watch Bill or Jill lead and it seems to work out, so they do the same. They watch Sarah or Sam lead and it doesn't work out, so they resolve never to use those methods or techniques. Who have been your models or examples in the practice of leadership?

The third most-cited place people say they learn to lead is from **books and school**. Formal education, learning seminars, and professional reading can provide valuable information and insight. What book, theory, or class has helped in the development of your leadership skills?

Even more interesting, especially for leaders, is to know what people want in a leader. Desired qualities change across culture and time, but what people say they want most in American society is **integrity**. When people are asked to define *integrity*, the word they mention most frequently is *honesty*. The leader with integrity always tells the truth as he or she believes it to be. Think about the best leader you have ever had; she or he probably had integrity. First and foremost, people want a leader they can trust. Ask yourself whether you have a reputation for integrity.

The second most-cited quality people want in a leader is **job knowledge**. This quality ranges from knowing what direction to take (abstract visioning) to knowing how to solve problems (practical ability). Again, think about the best leader you have ever had; it is likely that this person had a purpose, a plan, and the skill to succeed. Moreover, truly great leaders keep job knowledge current. They know what it takes to be effective in the leadership position—they are good but not complacent, and they continually strive to improve. How do you currently rate on the job knowledge scale?

The third most-cited quality people want in a leader can be summarized as **people-building skills**. This quality includes the ability to assemble and develop a winning team, and it involves a variety of important skills: performance planning, performance coaching, and correcting poor performance; effective delegation; effective discipline; and the ability to motivate. People want an empowering leader who will be a mentor and developer of others. Do you have the interest, ability, and patience required to motivate and develop others?²⁴ (See Exercise 1–1.)

Exercise 1–1 Personalizing Leadership

1. Where have you learned your leadership skills? Describe each pertinent learning area.

■ Personal experience _____

■ Examples or models _____

■ Books, school, and online learning _____

2. Do you possess the qualities people want in a leader? Support your response.

■ Integrity (honesty)—resulting in trust _____

■ Job knowledge—resulting in confidence _____

■ People-building skills—resulting in motivation and teamwork _____

Satisfactions and Frustrations of Leaders

Approximately 1 out of every 10 people in the American workplace is classified as a supervisor, administrator, or manager.²⁵ Management author Andrew DuBrin identifies seven satisfactions and seven frustrations that individuals in leadership roles typically experience. If you are a leader, make note of the ones that relate to you.

Satisfactions of Leaders

1. *A feeling of power and prestige.* Being a leader typically grants one power and a sense of importance.
2. *A chance to help others.* A leader works directly with people, often teaching them job skills, serving as a mentor and an advisor.
3. *High income.* Leaders, in general, receive higher pay than nonleaders, and executive leaders typically earn substantial incomes.
4. *Respect and status.* A leader is typically respected by group members and enjoys a higher status than people who are not occupying leadership roles.
5. *Opportunities for advancement.* Once one becomes a leader, advancement opportunities usually increase.
6. *A feeling of being in a position of knowledge.* A leader typically receives more information than do nonleaders.
7. *An opportunity to control money and other resources.* A leader is typically in the position of determining budgets and authorizing expenses.

Frustrations of Leaders

1. *Too much uncompensated work time.* People in leadership positions typically work longer hours than nonleaders. During periods of high demand, working hours can surge to 80 hours per week and more.
2. *Too many problems.* A leader is subject to the universe of problems involving people and things. The leader is expected to address problems and get them solved.
3. *Not enough authority to carry out responsibility.* People in leadership positions may be held responsible for outcomes over which they have little control.
4. *Loneliness.* The higher one rises as a leader, the more lonely it can be. Leadership limits the number of people in whom one can confide.
5. *Too many problems involving people.* A frustration facing a leader is the number of people problems requiring action. The more employees one has, the more problems one is likely to face.
6. *Organizational politics.* The leader must engage in political byplay from three directions: below, sideways, and above. Although tactics such as forming alliances and coalitions are a necessary part of a leader's role, it can be particularly frustrating if people purposefully work against each other within an organization.
7. *The pursuit of conflicting goals.* A major challenge facing leaders is navigating among conflicting goals. The central issue of such dilemmas is attempting to grant others the authority to act independently, yet still get them aligned and pulling together for a common purpose.²⁶

At this time, do the satisfactions of leadership outweigh the frustrations you may have, or is the opposite the case? Consider the pros and cons of your leadership position.
