Names: Martin-Gay, K. Elayn, - author.

Title: Basic college mathematics / by Elayn Martin-Gay, University of New Orleans.

Description: Sixth edition. | New York, NY : Pearson, [2019]

Identifiers: LCCN 2017042909 | ISBN 9780134840420 (se : alk. paper) | ISBN 9780134844886 (aie) | ISBN 9780134844930 (alc) | ISBN 9780134850498 (epub)

Subjects: LCSH: Mathematics--Textbooks.

Classification: LCC QA39.3 .M37 2019 | DDC 510--dc23

LC record available at <https://lcn.loc.gov/2017042909>

This book is dedicated to students everywhere—
and we should all be students. After all, is there anyone among
us who truly knows too much? Take that hint and continue
to learn something new every day of your life.

Best wishes from a fellow student:
Elayn Martin-Gay

Contents

Preface xiii

Applications Index xxiii

1 The Whole Numbers 1

- 1.1** Study Skill Tips for Success in Mathematics 2
- 1.2** Place Value, Names for Numbers, and Reading Tables 8
- 1.3** Adding Whole Numbers and Perimeter 17
- 1.4** Subtracting Whole Numbers 28
- 1.5** Rounding and Estimating 39
- 1.6** Multiplying Whole Numbers and Area 48
- 1.7** Dividing Whole Numbers 61
 - Integrated Review—Operations on Whole Numbers** 75
- 1.8** An Introduction to Problem Solving 77
- 1.9** Exponents, Square Roots, and Order of Operations 87
 - Group Activity 96
 - Vocabulary Check 97
 - Chapter Highlights 97
 - Chapter Review 101
 - Getting Ready for the Test 108
 - Chapter Test 109

2 Multiplying and Dividing Fractions 111

- 2.1** Introduction to Fractions and Mixed Numbers 112
- 2.2** Factors and Prime Factorization 124
- 2.3** Simplest Form of a Fraction 131
 - Integrated Review—Summary on Fractions, Mixed Numbers, and Factors** 141
- 2.4** Multiplying Fractions and Mixed Numbers 143
- 2.5** Dividing Fractions and Mixed Numbers 154
 - Group Activity 162
 - Vocabulary Check 163
 - Chapter Highlights 163
 - Chapter Review 166
 - Getting Ready for the Test 169
 - Chapter Test 170
 - Cumulative Review 172

3 Adding and Subtracting Fractions 175

- 3.1** Adding and Subtracting Like Fractions 176
- 3.2** Least Common Multiple 185
- 3.3** Adding and Subtracting Unlike Fractions 192
 - Integrated Review—Operations on Fractions and Mixed Numbers** 203
- 3.4** Adding and Subtracting Mixed Numbers 205
- 3.5** Order, Exponents, and the Order of Operations 216
- 3.6** Fractions and Problem Solving 223
 - Group Activity 233
 - Vocabulary Check 234
 - Chapter Highlights 234
 - Chapter Review 237
 - Getting Ready for the Test 242
 - Chapter Test 243
 - Cumulative Review 245

4 Decimals 248

- 4.1** Introduction to Decimals 249
- 4.2** Order and Rounding 256
- 4.3** Adding and Subtracting Decimals 265
- 4.4** Multiplying Decimals and Circumference of a Circle 276
 - Integrated Review—Operations on Decimals** 286
- 4.5** Dividing Decimals and Order of Operations 288
- 4.6** Fractions and Decimals 299
 - Group Activity 307
 - Vocabulary Check 308
 - Chapter Highlights 308
 - Chapter Review 310
 - Getting Ready for the Test 315
 - Chapter Test 316
 - Cumulative Review 318

5 Ratio and Proportion 321

- 5.1** Ratios 322
- 5.2** Rates 329
 - Integrated Review—Ratio and Rate** 336
- 5.3** Proportions 338
- 5.4** Proportions and Problem Solving 346
 - Group Activity 356
 - Vocabulary Check 357
 - Chapter Highlights 357
 - Chapter Review 359

Getting Ready for the Test	363
Chapter Test	364
Cumulative Review	366

6 Percent 369

6.1	Introduction to Percent	370
6.2	Percents and Fractions	377
6.3	Solving Percent Problems Using Equations	384
6.4	Solving Percent Problems Using Proportions	392
	Integrated Review—Percent and Percent Problems	400
6.5	Applications of Percent	402
6.6	Percent and Problem Solving: Sales Tax, Commission, and Discount	413
6.7	Percent and Problem Solving: Interest	420
	Group Activity	427
	Vocabulary Check	427
	Chapter Highlights	428
	Chapter Review	431
	Getting Ready for the Test	435
	Chapter Test	436
	Cumulative Review	438

7 Measurement 440

7.1	Length: U.S. and Metric Systems of Measurement	441
7.2	Weight and Mass: U.S. and Metric Systems of Measurement	454
7.3	Capacity: U.S. and Metric Systems of Measurement	464
	Integrated Review—Length, Weight, and Capacity	473
7.4	Conversions Between the U.S. and Metric Systems	475
7.5	Temperature: U.S. and Metric Systems of Measurement	480
7.6	Energy: U.S. and Metric Systems of Measurement	485
	Group Activity	490
	Vocabulary Check	491
	Chapter Highlights	491
	Chapter Review	494
	Getting Ready for the Test	499
	Chapter Test	500
	Cumulative Review	502

8 Geometry 504

8.1	Lines and Angles	505
8.2	Plane Figures and Solids	516
8.3	Perimeter	525
8.4	Area	535

- 8.5** Volume **545**
 - Integrated Review—Geometry Concepts** **553**
- 8.6** Square Roots and the Pythagorean Theorem **554**
- 8.7** Congruent and Similar Triangles **561**
 - Group Activity **570**
 - Vocabulary Check **571**
 - Chapter Highlights **571**
 - Chapter Review **575**
 - Getting Ready for the Test **582**
 - Chapter Test **583**
 - Cumulative Review **585**

9 Reading Graphs and Introduction to Statistics and Probability **587**

- 9.1** Pictographs, Bar Graphs, Histograms, and Line Graphs **588**
- 9.2** Circle Graphs **602**
 - Integrated Review—Reading Graphs** **610**
- 9.3** Mean, Median, Mode, and Range **612**
- 9.4** Counting and Introduction to Probability **623**
 - Group Activity **630**
 - Vocabulary Check **630**
 - Chapter Highlights **631**
 - Chapter Review **633**
 - Getting Ready for the Test **639**
 - Chapter Test **641**
 - Cumulative Review **646**

10 Signed Numbers **649**

- 10.1** Signed Numbers **650**
- 10.2** Adding Signed Numbers **659**
- 10.3** Subtracting Signed Numbers **668**
 - Integrated Review—Signed Numbers** **675**
- 10.4** Multiplying and Dividing Signed Numbers **677**
- 10.5** Order of Operations **685**
 - Group Activity **691**
 - Vocabulary Check **692**
 - Chapter Highlights **692**
 - Chapter Review **694**
 - Getting Ready for the Test **697**
 - Chapter Test **698**
 - Cumulative Review **700**

11 Introduction to Algebra 703

- 11.1** Introduction to Variables 704
- 11.2** Solving Equations: The Addition Property 716
- 11.3** Solving Equations: The Multiplication Property 722
 - Integrated Review—Expressions and Equations** 730
- 11.4** Solving Equations Using Addition and Multiplication Properties 732
- 11.5** Equations and Problem Solving 741
 - Group Activity 751
 - Vocabulary Check 752
 - Chapter Highlights 752
 - Chapter Review 755
 - Getting Ready for the Test 760
 - Chapter Test 761
 - Cumulative Review 763

Appendices

Appendix A Tables 766

- A.1** Addition Table and One Hundred Addition Facts 766
- A.2** Multiplication Table and One Hundred Multiplication Facts 768
- A.3** Table of Geometric Figures 770
- A.4** Table of Percents, Decimals, and Fraction Equivalents 772
- A.5** Table on Finding Common Percents of a Number 773
- A.6** Table of Squares and Square Roots 774
- A.7** Compound Interest Table 775

Appendix B Unit Analysis 776

Preface

Basic College Mathematics, Sixth Edition, was written to provide students with a solid foundation in the basics of college mathematics, including the topics of whole numbers, fractions, decimals, ratio and proportion, percent, and measurement as well as introductions to geometry, statistics and probability, and algebra topics. To help students accomplish this solid foundation, my goals for this text are:

- Most importantly, to write an organized, student-friendly text that is keyed to objectives and contains many worked-out examples.
- To introduce operations on whole numbers in the first chapter and repeat these operations in each subsequent chapter while different sets of numbers are introduced, thus providing students with a solid foundation of the basics of college mathematics.
- To include a later chapter of introduction to algebra, thus laying the groundwork for the next algebra course your students will take.
- To show students the relevancy of mathematics in everyday life and in the workplace by emphasizing and integrating the following throughout this text: real-life and real-data applications, data interpretation, conceptual understanding, problem solving, writing, cooperative learning, number sense, estimation, critical thinking and geometric concepts.

The many factors that contributed to the success of the previous editions have been retained. In preparing the Sixth Edition, I considered comments and suggestions of colleagues, students, and many users of the prior edition throughout the country.

What's New in the Sixth Edition?

- **The Martin-Gay Program** has been revised and enhanced with a new design in the text and MyLab Math to actively encourage students to use the text, video program, and Video Organizer as an integrated learning system.
- **New Getting Ready for the Test** can be found before each Chapter Test. These exercises can increase student success by helping students prepare for their Chapter Test. The purpose of these exercises is to check students' conceptual understanding of the topics in the chapter as well as common student errors. It is suggested that students complete and check these exercises before taking a practice Chapter Test. All Getting Ready for the Test exercises are either Multiple Choice or Matching, and all answers can be found in the answer section of this text.

Video Solutions of all exercises can be found in MyLab Math. These video solutions contain brief explanations and reminders of material in the chapter. Where applicable, incorrect choices contain explanations.

Getting Ready for the Test exercise numbers marked in blue indicate that the exercise is available in **Learning Catalytics**. **LC**

- **New Learning Catalytics** is an interactive student response tool that uses students' smartphones, tablets, or laptops to engage them in more sophisticated tasks and thinking. Generate class discussion, guide your lecture, and promote peer-to-peer learning with real-time analytics. Accessible through MyLab Math, instructors can use Learning Catalytics to:
 - Pose a variety of open-ended questions that help your students develop critical thinking skills.
 - Monitor responses to find out where students are struggling.
 - Use real-time data to adjust your instructional strategy and try other ways of engaging your students during class.
 - Manage student interactions by automatically grouping students for discussion, teamwork, and peer-to-peer learning.

- Pearson-created questions for developmental math topics are available to allow you to take advantage of this exciting technology. Additionally, “Getting Ready for the Test” exercises (marked in blue) are available in Learning Catalytics. Search the question library for “MGBCM” and the chapter number, for example, MGBCM7 would be the questions from Chapter 7.
- **Revised and updated Key Concept Activity Lab Workbook** includes Extension Exercises, Exploration Activities, Conceptual Exercises, and Group Activities. These activities are a great way to engage students in conceptual projects and exploration as well as group work. This workbook is available in MyLab Math, or can be packaged with a text or MyLab code.
- **Exercise Sets** have been carefully examined and revised. Special focus was placed on making sure that even- and odd-numbered exercises are carefully paired and that real-life applications are updated.
- **The Martin-Gay MyLab Math** course has been updated and revised to provide more exercise coverage, including assignable Video Check questions and an expanded video program. There are Lecture Videos for every section, which students can also access at the specific objective level; Student Success Tips videos; and an increased number of video clips at the exercise level to help students while doing homework in MyLab Math. Suggested homework assignments have been premade for assignment at the instructor’s discretion.

Key Continuing Resources and Pedagogical Features

- **Vocabulary, Readiness & Video Check Questions** continue to be available in the text and for assignment in MyLab Math. The **Readiness** exercises center on a student’s understanding of a concept that is necessary in order to continue to the exercise set. The **Video Check questions** are included in every section for every learning objective. These exercises are a great way to assess whether students have viewed and understood the key concepts presented in the videos. Answers to all Video Check questions are available in an answer section at the back of the text.
- **Interactive Lecture Series in MyLab Math**, featuring author Elayn Martin-Gay, provides students with active learning at their own pace. The videos offer the following resources and more:
 - **A complete lecture for each section of the text** highlights key examples and exercises from the text. Pop-ups reinforce key terms, definitions, and concepts.
 - **An interface with menu navigation features** allows students to quickly find and focus on the examples and exercises they need to review.
 - **Interactive Concept Check** exercises measure students’ understanding of key concepts and common trouble spots.
 - **Student Success Tips Videos** are 3-5 minute videos designed to be daily reminders to students to continue practicing and maintaining good organizational and study habits. They include student success tips for general college success, tips specific to success in math courses, and content-specific tips to avoid common mathematical mistakes.
- **The Interactive Lecture Series** also includes the following resources for test prep:
 - **New Getting Ready for the Test Videos**
 - **The Chapter Test Prep Videos** help students during their most teachable moment—when they are preparing for a test. This innovation provides step-by-step solutions for the exercises found in each Chapter Test. For the Sixth Edition, the Chapter Test Prep Videos are also available on YouTube™. The videos are captioned in English and Spanish.
 - **The Practice Final Exam Videos** help students prepare for an end-of-course final. Students can watch full video solutions to each exercise in the Practice Final Exam at the end of this text.

- **The Video Organizer** helps students take notes and work practice exercises while watching the Interactive Lecture Series videos in their MyLab Math course. All content in the Video Organizer is presented in the same order as it is presented in the videos, making it easy for students to create a course notebook and build good study habits.
 - Covers all of the video examples in order.
 - Provides prompts with ample space for students to write down key definitions and properties.
 - Includes Play and Pause button icons to prompt students to follow along with the author for some exercises while they try others on their own.

The Video Organizer is available in a loose-leaf, notebook-ready format. It is also available for download in MyLab Math.

Key Pedagogical Features

The following key features have been retained and/or updated for the Sixth Edition of the text:

- **Problem-Solving Process** This is formally introduced in Chapter 1 with a four-step process that is integrated throughout the text. The four steps are **Understand, Translate, Solve, and Interpret**. The repeated use of these steps in a variety of examples shows their wide applicability. Reinforcing the steps can increase students' comfort level and confidence in tackling problems.
- **Exercise Sets Revised and Updated** The exercise sets have been carefully examined and extensively revised. Special focus was placed on making sure that even- and odd-numbered exercises are paired and that real-life applications were updated.
- **Examples** Detailed, step-by-step examples were added, deleted, replaced, or updated as needed. Many examples reflect real life. Additional instructional support is provided in the annotated examples.
- **Practice Exercises** Throughout the text, each worked-out example has a parallel Practice exercise. These invite students to be actively involved in the learning process. Students should try each Practice exercise after finishing the corresponding example. Learning by doing will help students grasp ideas before moving on to other concepts. Answers to the Practice exercises are provided at the bottom of each page.
- **Helpful Hints** Helpful Hints contain practical advice on applying mathematical concepts. Strategically placed where students are most likely to need immediate reinforcement, Helpful Hints help students avoid common trouble areas and mistakes.
- **Concept Checks** This feature allows students to gauge their grasp of an idea as it is being presented in the text. Concept Checks stress conceptual understanding at the point-of-use and help suppress misconceived notions before they start. Answers appear at the bottom of the page. Exercises related to Concept Checks are included in the exercise sets.
- **Mixed Practice Exercises** In the section exercise sets, these exercises require students to determine the problem type and strategy needed to solve it just as they would need to do on a test.
- **Integrated Reviews** This unique, mid-chapter exercise set helps students assimilate new skills and concepts that they have learned separately over several sections. These reviews provide yet another opportunity for students to work with “mixed” exercises as they master the topics.
- **Vocabulary Check** This feature provides an opportunity for students to become more familiar with the use of mathematical terms as they strengthen their verbal skills. These appear at the end of each chapter before the Chapter Highlights. Vocabulary, Readiness & Video exercises provide practice at the section level.

- **Chapter Highlights** Found at the end of every chapter, these contain key definitions and concepts with examples to help students understand and retain what they have learned and help them organize their notes and study for tests.
- **Chapter Review** The end of every chapter contains a comprehensive review of topics introduced in the chapter. The Chapter Review offers exercises keyed to every section in the chapter, as well as Mixed Review exercises that are not keyed to sections.
- **Chapter Test and Chapter Test Prep Videos** The Chapter Test is structured to include those problems that involve common student errors. The **Chapter Test Prep Videos** gives students instant access to a step-by-step video solution of each exercise in the Chapter Test.
- **Cumulative Review** This review follows every chapter in the text (except Chapter 1). Each odd-numbered exercise contained in the Cumulative Review is an earlier worked example in the text that is referenced in the back of the book along with the answer.
- **Writing Exercises**  These exercises occur in almost every exercise set and require students to provide a written response to explain concepts or justify their thinking.
- **Applications** Real-world and real-data applications have been thoroughly updated, and many new applications are included. These exercises occur in almost every exercise set and show the relevance of mathematics and help students gradually and continuously develop their problem-solving skills.
- **Review Exercises** These exercises occur in each exercise set (except in Chapter 1) and are keyed to earlier sections. They review concepts learned earlier in the text that will be needed in the next section or chapter.
- **Exercise Set Resource Icons** Located at the opening of each exercise set, these icons remind students of the resources available for extra practice and support:

MyLab Math

See Student Resources descriptions on page xvii for details on the individual resources available.

Exercise Icons These icons facilitate the assignment of specialized exercises and let students know what resources can support them.

-  Video icon: exercise worked in the Interactive Lecture Series found in MyLab Math.
-  Triangle icon: identifies exercises involving geometric concepts.
-  Pencil icon: indicates a written response is needed.
-  Calculator icon: optional exercises intended to be solved using a scientific or graphing calculator.

Group Activities Found at the end of each chapter, these activities are for individual or group completion, and are usually hands-on or data-based activities that extend the concepts found in the chapter, allowing students to make decisions and interpretations and to think and write about algebra.

Optional: Calculator Exploration Boxes and Calculator Exercises The optional Calculator Explorations provide keystrokes and exercises at appropriate places to give students an opportunity to become familiar with these tools. Section exercises that are best completed by using a calculator are identified by  for ease of assignment.

Student and Instructor Resources

STUDENT RESOURCES

Video Organizer

Designed to help students take notes and work practice exercises while watching the Interactive Lecture Series videos.

- Covers all of the video examples in order.
- Provides prompts with ample space for students to write down key definitions and rules.
- Includes “Play” and “Pause” button icons to prompt students to follow along with the author for some exercises while they try others on their own.
- Includes Student Success Tips Outline and Questions

Available in loose-leaf, notebook-ready format and in MyLab Math.

Key Concept Activity Lab Workbook

Includes Extension Exercises, Exploration Activities, Conceptual Exercises, and Group Activities. This workbook is available in MyLab Math, or can be packaged in printed form with a text or MyLab Math code.

Student Solutions Manual

Provides completely worked-out solutions to the odd-numbered section exercises; all exercises in the Integrated Reviews, Chapter Reviews, Chapter Tests, and Cumulative Reviews.

INSTRUCTOR RESOURCES

Annotated Instructor’s Edition

Contains all the content found in the student edition, plus the following:

- Answers to even and odd exercises on the same text page
- Teaching Tips throughout the text placed at key points

Instructor’s Resource Manual with Tests and Mini-Lectures

This resource includes:

- Mini-lectures for each text section
- Additional practice worksheets for each section
- Several forms of tests per chapter—free response and multiple choice
- Answers to all items

Instructor’s Solutions Manual TestGen[®]

(These resources are available for download from MyLab Math or from the Instructor’s Resource Center on pearson.com.)

Instructor-to-Instructor Videos—available in the Instructor Resources section of the MyLab Math course.

Resources for Success

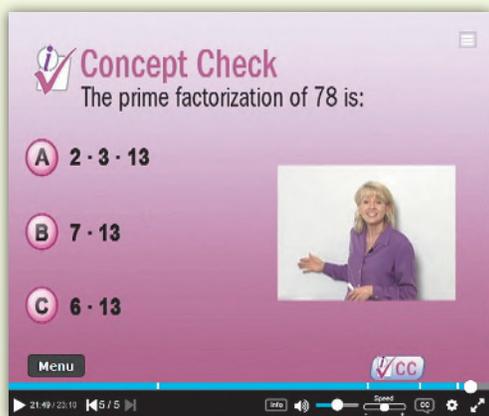

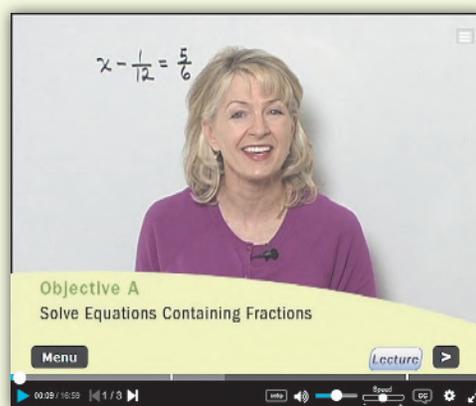

Get the Most Out of MyLab Math for *Basic College Mathematics*, Sixth Edition

by Elayn Martin-Gay

Elayn Martin-Gay believes that every student can succeed, and each MyLab course that accompanies her texts is infused with her student-centric approach. The seamless integration of Elayn’s award-winning content with the #1 choice in digital learning for developmental math gives students a completely consistent experience from print to MyLab.

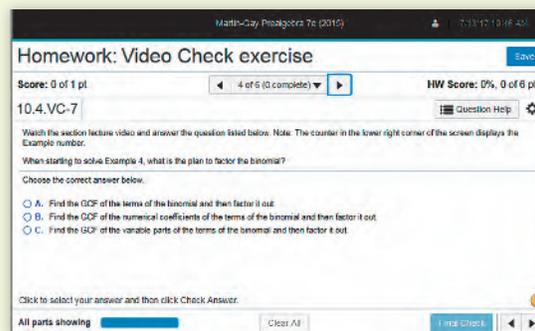

A Comprehensive and Dynamic Video Program

The **Martin-Gay video program** is 100% presented by Elayn Martin-Gay to ensure consistency with the text. The video program includes full section lectures and shorter objective level videos, and an intuitive navigation menu and pop-ups that reinforce key definitions.

Within the section lecture videos, **Interactive Concept Checks** measure a student’s understanding of key concepts and common trouble spots. Concept Checks ask students to try a question on their own within the video, after which Elayn Martin-Gay explains why they were correct or incorrect.

All videos can be assigned as a **media assignment** in the Assignment Manager, to ensure that students are getting the most out of their MyLab resources. Additionally, **Video Check questions** ensure that students have viewed and understood the key concepts from the section lecture videos.

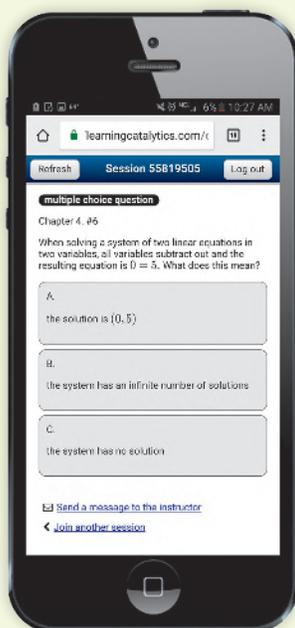

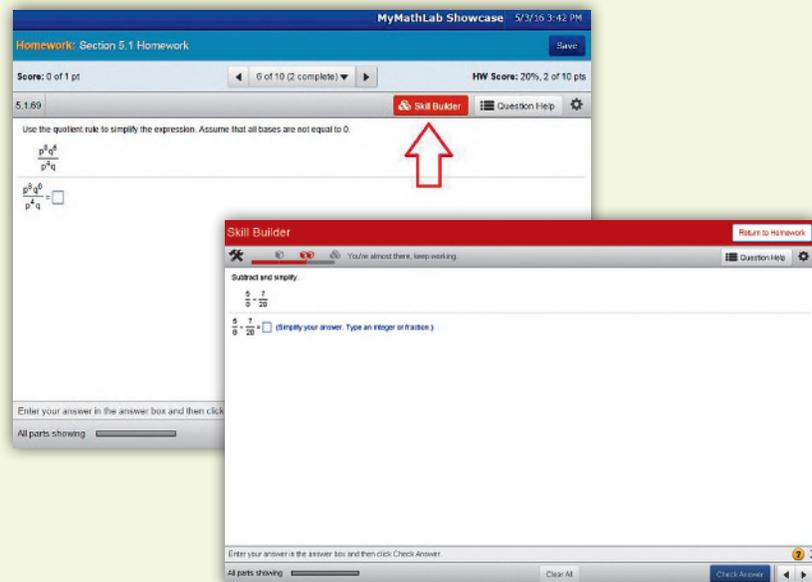

Additional hallmark Martin-Gay video types include Student Success Tip videos and Chapter Test Prep videos. **Student Success Tip videos** are in short segments designed to be daily reminders to stay organized and to study. **Chapter Test Prep videos**, a Martin-Gay innovation, help students during their most teachable moment—when they are preparing for a test—with step-by-step solutions for the exercises in the Chapter Test.

New Tools Improve Preparedness and Personalize Learning

New! Getting Ready for the Test video solutions cover every Getting Ready for the Test exercise. These come at the end of each chapter to give students an opportunity to assess if they understand the big picture concepts of the chapter, and help them focus on avoiding common errors.

New! Skill Builder exercises offer just-in-time additional adaptive practice. The adaptive engine tracks student performance and delivers questions to each individual that adapt to his or her level of understanding. This new feature allows instructors to assign fewer questions for homework, allowing students to complete as many or as few questions needed.

New Ways to Engage Students

New! Learning Catalytics

Martin-Gay-specific questions are pre-built and available through MyLab Math. Learning Catalytics is an interactive student response tool that uses students' smartphones, tablets, or laptops to engage them in more sophisticated tasks and thinking. **Getting Ready for the Test** exercises marked in blue in the text are pre-built in Learning Catalytics to use in class. These questions can be found in Learning Catalytics by searching for "MGBCM".

New! Vocab and Readiness questions in MyLab Math have been expanded to 100% coverage, and are now available with a new **Drag and Drop functionality!** Drag and Drop exercises allow students to manually select elements of the question, such as expressions, words, graphs, or images, and place them into a designated target area.

Easier Start-Up for Instructors

Enhanced Sample Assignments make course set-up easier by giving instructors a starting point for each section. Each assignment has been carefully curated for this specific text, and includes a thoughtful mix of question types.

Acknowledgments

There are many people who helped me develop this text, and I will attempt to thank some of them here. Cindy Trimble was *invaluable* for contributing to the overall accuracy of the text. Gina Linko and Patty Bergin provided guidance throughout the production process and Suellen Robinson provided many suggestions for updating applications during the writing of this Sixth Edition.

A very special thank you goes to my editor, Mary Beckwith, for being there 24/7/365, as my students say. And, my thanks to the staff at Pearson for all their support: Barbara Atkinson, Alicia Frankel, Michael Hirsch, Chris Hoag, Paul Corey, Michelle Renda, Jenny Crum and Lauren Schur among many others.

I would like to thank the following reviewers for their input and suggestions that have affected this and previous editions:

Anita Aikman, <i>Collin County Community College</i>	Sonya Johnson, <i>Central Piedmont Community College</i>
Sheila Anderson, <i>Housatonic Community College</i>	Deborah Jones, <i>High Tech College</i>
Adrienne Arata, <i>College of the Siskiyous</i>	Nancy Lange, <i>Inver Hills Community College</i>
Cedric Atkins, <i>Mott Community College</i>	Jean McArthur, <i>Joliet Junior College</i>
Laurel Berry, <i>Bryant & Stratton College</i>	Carole Shapero, <i>Oakton Community College</i>
Connie Buller, <i>Metropolitan Community College</i>	Jennifer Strehler, <i>Oakton Community College</i>
Lisa Feintech, <i>Cabrillo College</i>	Tanomo Taguchi, <i>Fullerton College</i>
Chris Ford, <i>Shasta College</i>	Leigh Ann Wheeler, <i>Greenville Technical Community College</i>
Cindy Fowler, <i>Central Piedmont Community College</i>	Valerie Wright, <i>Central Piedmont Community College</i>
Pam Gerszewski, <i>College of the Albemarle</i>	
Doug Harley, <i>Del Mar College</i>	

I would also like to thank the following dedicated group of instructors who participated in our focus groups, Martin-Gay Summits, and our design review for the series. Their feedback and insights have helped to strengthen this edition of the text. These instructors include:

Billie Anderson, <i>Tyler Junior College</i>	Pauline Hall, <i>Iowa State College</i>
Cedric Atkins, <i>Mott Community College</i>	Pat Hussey, <i>Triton College</i>
Lois Beardon, <i>Schoolcraft College</i>	Dorothy Johnson, <i>Lorain County Community College</i>
Laurel Berry, <i>Bryant & Stratton</i>	Sonya Johnson, <i>Central Piedmont Community College</i>
John Beyers, <i>University of Maryland</i>	Irene Jones, <i>Fullerton College</i>

A special thank you to those students who participated in our design review: Katherine Browne, Mike Bulfin, Nancy Canipe, Ashley Carpenter, Jeff Chojnachi, Roxanne Davis, Mike Dieter, Amy Dombrowski, Kay Herring, Todd Jaycox, Kaleena Levan, Matt Montgomery, Tony Plese, Abigail Polkinghorn, Harley Price, Eli Robinson, Avery Rosen, Robyn Schott, Cynthia Thomas, and Sherry Ward.

Elayn Martin-Gay

Personal Acknowledgements

I would like to personally thank my extended family. Although this list has grown throughout the years, it still warrants mentioning in my texts as each of these family members has contributed to my work in one way or another – from suggesting application exercises with data and updating/upgrading my computer to understanding that I usually work on “Vacations.” I am deeply grateful to them all:

Clayton, Bryan (in heaven), Eric, Celeste, and Tové Gay; Leo and Barbara Miller; Mark and Madison Martin and Carrie Howard; Stuart and Earline Martin; Karen Martin Callac Pasch (in heaven); Michael, Christopher, Matthew, Nicole, and Jessica Callac; Dan Kirk; Keith, Mandy, Erin, and Clayton McQueen, Bailey Martin, Ethan, Avery, and Mia Barnes; Melissa and Belle Landrum.

About the Author

Elayn Martin-Gay has taught mathematics at the University of New Orleans for more than 25 years. Her numerous teaching awards include the local University Alumni Association’s Award for Excellence in Teaching, and Outstanding Developmental Educator at University of New Orleans, presented by the Louisiana Association of Developmental Educators.

Prior to writing textbooks, Elayn Martin-Gay developed an acclaimed series of lecture videos to support developmental mathematics students in their quest for success. These highly successful videos originally served as the foundation material for her texts. Today, the videos are specific to each book in the Martin-Gay series. The author has also created Chapter Test Prep Videos to help students during their most “teachable moment” — as they prepare for a test — along with Instructor-to-Instructor videos that provide teaching tips, hints, and suggestions for each developmental mathematics course, including basic mathematics, prealgebra, beginning algebra, and intermediate algebra.

Elayn is the author of 12 published textbooks as well as multimedia, interactive mathematics, all specializing in developmental mathematics courses. She has also published series in Algebra 1, Algebra 2, and Geometry. She has participated as an author across the broadest range of educational materials: textbooks, videos, tutorial software, and courseware. This provides an opportunity of various combinations for an integrated teaching and learning package offering great consistency for the student.

Applications Index

Advertising/marketing

advertising expenditures, 47, 656
banner measurements, 569
billboard painting requirements, 280
billboard proportions, 327
Coca-Cola sign measurement, 453
television advertising expenditures, 105

Agriculture

apple exports from U.S., 374
apple types grown in Washington State, 607
bamboo growth height, 35, 452, 758
cherry production in Michigan, 374
corn production, 45
crop values, 437
farm size, 412
farms in U.S., 412
fencing requirements, 526
flowering plants native to U.S., 162
garden measurements, 173, 706, 710, 714
gas-to-oil engine mixture, 472
kelp growth height, 35, 758
peach production, 21
sequoia tree diameter, 478
tractor and plow value, 750
tree heights, 500, 560, 564–565, 568, 569, 764
tree trunk areas, 715
tree trunk girths, 209
wheat production in selected states, 596, 601

Animals

bat wingbeats, 332
birdhouse entrance holes, 212
cattle lot fencing needed, 714
cheetah speed, 779
chimpanzee life expectancy, 748
cockroach speed, 262, 778
condor population increase, 37, 683
crocodile measurements, 448
dog households, 282
eagle incubation period, 754
elephant life expectancy, 748
endangered species, 764
falcon speed, 748
fish per tank, 569
flea dip solution, 151
Gentoo penguin speed, 779
giraffe measurements, 448
grain consumption by cows, 59
hummingbird incubation period, 754
hummingbird wingbeats, 332, 778
kennel volumes, 552
killer bee and honey bee chasing behaviors, 200
legal lobster size, 209
lobster weights, 233
medicine dosage for dogs, 365
Monarch butterfly migration, 478
mosquito larvae elimination, 353
mourning dove population decline, 683
National Zoo annual budget, 333
pelican beak measurements, 442
pet food costs, 353
pheasant speed, 748
sheep population, 26
sloth travel time, 200
termite nest height, 478
threatened mammal species in selected countries, 172
threatened species estimation, 21–22
trout weights, 208, 213
volume of Giant Ocean Tank, 552
wasp nest diameter, 524
whale weights, 326
wire needed for horse corral, 298

Astronomy/space

Adler Museum planetarium volume, 552

Apollo launch gantry height, 569
astronaut James A. Lovell spaceflight information, 274
comet tails, 312
commercial space launches worldwide, 598
distance between Earth and Moon, 14, 276
distance between Earth and Sun, 285
distance of planets from Sun, 114, 285, 312, 317
Hayden Planetarium dome volume, 552
Hubble mirror defect, 304
moon crater diameter, 478
ozone hole growth, 35
planet day lengths, 120, 263
planet orbits, 44, 263, 354
planet radius/diameter calculations, 32, 284, 524
planet surface temperatures, 483, 654, 674
planets with moons, 240
solar eclipse durations, 214, 230
space shuttle cargo compartment volume, 714
Space Station orbit altitude, 14
weight of person on Earth, 72

Automotive/motor vehicles

auto thefts, 379
car color, 167, 168, 370, 585
car mileage by categories, 324
car ownership costs, 268, 272, 283
car price increases, 410
car rental unit price, 330
cars manufactured in Germany and U.S., 749
gas mileage calculations, 32, 168, 171, 229, 244, 255, 296, 334, 351, 361
gasoline mixtures, 347
motorcycle exports, 374
motorcycle sales, 26
purchase price covered by trade-in, 139
race car speeds and gas mileage, 255
SUV sales in U.S., 354
truck hauling rates, 72
truck sales, 26, 172, 318

Aviation

aircraft in FedEx air fleet, 162
airport arrivals/departures, 38
Boeing 747 cruising speed, 478
flight time calculations, 197, 367
flying distance between cities, 748
fuel used per hour, 795
helium content of Goodyear blimps, 14, 83
passenger cost to travel by plane, 333

Business

Amazon's net income calculations, 666
assembly-line defective products, 333
best-buy prices, 439
better-buy prices, 360, 364, 543, 795
billable hours, 410
bolts inspected, 407
brand values, 44
Burger King restaurants worldwide, 44
commission calculations, 415, 418, 419, 433, 434, 437, 647
consumer price index, 356
correctional officers employed, 412
customers ordering lunch at restaurant, 233
defective pantyhose in batches, 328
discount amount, 379, 416–417, 419, 420, 433, 437, 503, 795
earning per unit, 777
earnings before deductions, 778
employee reduction, 411, 503
estimated total costs, 46
food-and-beverage sales in restaurants, 375
furniture costs, 262
furniture production per month, 408
Gap Inc. stores worldwide, 27
Hallmark employees in Kansas City, 139

hourly pay, 84, 432
hours worked at furniture store, 634
IKEA employees by region, 123
jewelry prices, 160
markup, 751
McDonald's restaurants in U.S., 408
mean salary of staff, 613–614
newspaper circulation, 748
number of CVS Pharmacies in states, 27
online sales, 191, 222
percent off stereo system, 379
PetSmart employee numbers, 84
price after discount, 102
price difference between items, 46
production numbers, 408
purchase price before tax, 418
quarterly losses in sales, 683
restaurant industry food expenditures, 382
Safeway-owned store locations, 139
salary increases, 410
sale price, 32, 36, 419, 433, 437, 503, 795
sales decrease, 412
sales tax calculations, 382, 414–415, 417–418, 420, 432, 434, 437, 647
separate cost calculations, 745
shared earnings, 68
smart phone users, 45
Target revenues for year, 722
Target sales categories, 183
Target store locations, 84, 328
tipping calculations, 420
total cost before taxes, 107
total cost of several items, 85, 86, 105, 110
total earnings, 102
total price, 417–418, 420, 432, 437, 647
total revenue for Kohl's stores, 722
total revenue formula, 722
T-shirt costs by size, 59
Uber's revenue losses, 656
unit rate/price, 331, 337, 360, 362, 364, 586
U.S. trade balance, 674
work hours required to complete order, 160, 365, 795
work shifts at McDonald's, 138
Yahoo's revenue losses, 656

Chemistry/physics

alloy composition, 437, 795
boiling temperatures of elements, 658
calories burned/needed during activities, 486–487, 488, 489, 497, 501
carbon subnitride burning temperature, 486
container capacity conversion, 501
converting BTUs to foot-pounds, 486, 497, 501
decibel levels of common sounds, 37
energy required for lifting, 485, 497
melting points of elements, 683
oxygen supply rates provided by lawns, 353
radio wave travel distance, 285
room temperature, 483
saline solution amounts, 496, 778, 779
water measurements, 472
weight conversions, 455–456, 795

Demographics/populations

armed forces population, 604
employees in service-industry jobs, 354
executives age 40, 371
fraction of employees who are men/women, 120
growth occupations, 375, 376, 427, 610
hospital beds per population, 778
Iceland's population, 13
male/female veterinarians, 382
Maori population of New Zealand, 153
movie/television business with 10 or fewer employees, 408
Native American population, 749

Demographics/populations (*continued*)

population by age groups, 643
 population increases/decreases/densities, 44, 102, 263, 406, 409, 437
 population of largest cities, 597
 population of sheep vs. people in New Zealand, 26
 population over age 65, 60, 411
 population projections/estimates, 25, 36, 37, 102, 279, 332, 411, 599
 state retirement ages, 617
 states with federal Indian reservations, 121
 tourist numbers projected for China and Spain, 749
 unemployed population in U.S., 375
 U.S. city and state populations, 153
 U.S. states designated as “commonwealths,” 328
 veterinarians focusing on horses, 382
 violent crime decreases, 432
 visitors to U.S. by region, 602–603
 world population by continent, 383

Education

associate degrees awarded, 411
 bachelor degrees awarded, 411
 book costs at college, 408
 book measurements, 453
 class enrollment, 72
 classroom floor space per student, 351
 college enrollment, 44, 46, 402, 408
 college library reading promotion, 39
 college majors, 140, 150
 college students’ Internet use, 374
 college students’ living arrangements, 606
 college students living at home, 700
 college students’ spending categories, 223
 college students’ use of time, 182, 272
 computer lab equipment costs, 79, 86, 366
 course registrations, 609
 daycare attendance, 407
 exercises completed in 30 minutes, 586
 faculty percent increase, 503
 favorite subjects of students ages 13 to 17, 201
 freshmen in high school, 403–404
 full and associate professor salaries, 336
 grade point averages, 614–615, 620, 636, 644
 Head Start enrollment decrease, 46
 hours students sleep, 636
 law school applications, 350
 library books available, 332
 math enrollments, 432
 math quiz scores, 611, 621
 maze completion experiment, 613
 number of freshman students, 14, 120, 403, 586
 number of sophomore students, 121
 number of students on bus, 153
 percent of students who are freshmen, 370
 persons completing 4 or more years of college, 634
 public school enrollment, 335
 scholarship applicants to Yale, 406
 student government fund-raiser, 38
 student government presidential elections, 38
 teacher salaries, 79–80
 teachers employed in U.S., 412
 teachers’ taxable income, 260
 test scores, 46, 138, 643–644
 textbook costs, 58, 262
 time spent on homework/studying, 237, 241
 total semester bill, 86
 tuition costs, 104, 411
 universities with largest enrollments, 748

Electronics/computers

Apple computer sales, 354
 Apple MacBook thinness, 262
 cable TV system percent decrease, 411
 CD center hole, 475–476
 CD diameter, 478
 cell phone towers in U.S., 412
 characters per line of print on computer, 59
 computer board assembly rates, 334

computer disk storage capacity, 296
 defective components, 410
 digital camera measurements, 152
 diskette width, 478
 DVD storage capacity, 318
 equal shares of purchased CDs, 68
 Facebook usage, 101
 Great Internet Mersenne Prime Number Search, 14
 height of stack of CDs, 497
 Internet usage, 85–86, 101, 374, 750
 iPad Mini measurements, 272, 285
 iPod measurements, 272, 285
 megabytes of information held by CDs and DVDs, 54, 59
 patents granted to Apple Inc., 130
 pixel calculations, 59
 printer cartridge weights, 319
 printer pages per minute, 54
 printer paper amounts, 352
 printer shipments, 69
 smartphone measurements, 273, 284
 smartphone ownership, 153
 text messages sent monthly, 273
 video games costs, 748
 volume of Space Cube, 551
 word processor speed, 350
 Xbox 360 costs, 748

Finance, general

bank costs, 105
 coin values, 275–276
 compound interest, 423, 426, 433, 437
 interest rates, 214
 investment interest, 422, 423, 425, 433, 434
 monthly payment calculations, 424, 426
 national debt of France, 16
 simple interest, 421, 425, 426, 433, 434, 437, 503, 647, 701, 714, 755
 stock market losses, 683
 stock prices, 171
 tax return preparation times, 213
 tipping calculations, 420
 U.S. annual inflation rate, 642

Finance, personal

car payments, 362
 change back from purchase, 271
 checking account balance, 85, 307, 600, 673, 695, 699
 credit card balance, 298, 673
 dividend received, 408
 electronically filed tax returns per year, 739
 investment yield, 362
 loan payments, 85, 313, 696
 monthly budget, 635
 online spending per month, 609
 pay calculations, 410
 property taxes, 361
 savings account balances, 36, 103, 701

Food/nutrition

apple usage, 233
 bruised tomatoes in shipment, 328
 bushels of oranges, 639
 calories from fat, 150, 409–410
 calories in food items, 59, 84, 332
 calories in milk types, 411
 calories in tea, 352
 candy weight, 215, 495, 501
 canned foods packing calculations, 105, 438
 canned ham in cartons, 463
 cheese in recipe, 228
 cheese pallet packing calculations, 58
 cheesecake calories, 84
 chocolate-consuming countries, 274–275
 cholesterol in food, 354
 cilantro in recipe, 241
 cocoa bean storage, 282
 cocoa box weights, 463
 coffee drinking rate of adults, 365
 cola liter-to-quarts conversion, 497
 combined weight of ground round, 319

cookies mailing weight, 457
 cost of each of several items, 314
 dried fruit preservative amounts, 463
 drink mixtures, 472
 fat content, 58, 59, 104, 160, 167, 283
 fiber content of selected foods, 598
 flour amount ordered/received, 496
 flour in recipe, 151, 230, 352, 355, 503, 778
 food order cost comparisons, 85
 food sales in U.S. annually, 598
 Girl Scout cookie sales, 201
 hamburger meat calculations, 160, 208, 463
 homemade ice cream brine solution, 354
 honey amounts in recipe, 178–179
 hot dogs consumed in U.S., 84
 hot dogs eaten per minute, 334
 ice cream amounts eaten per year, 327
 ice cream cone volume, 551
 ice cream cones sold, 406
 iced tea remaining at party, 496
 Jell-O in dessert dishes, 472
 M&Ms color distribution, 607
 maple syrup weights, 496
 milk beverage types consumed, 611
 milk in recipe, 355
 nacho chips unit price, 331
 oatmeal box/carton weights, 463
 olive oil calories, 58
 ounces of soda in case, 318
 oven setting conversion, 497
 peaches (canned) weight, 238
 picante sauce unit price, 330
 pineapples in cartons, 463
 pizza measurements, 714
 pizza toppings, 609
 preference rate for Coke and Pepsi, 352
 punch ingredients, 241
 rice weights, 463
 smoked tobacco products, 375
 soft drink can/bottle weights, 463
 soft drink consumption by teenage males, 76
 soft drink in 2-liter bottle, 471
 soft drink sales, 434
 soup can circumference, 529
 soup sales in containers, 472
 soup stock recipe amounts, 496
 sugar calories, 110
 sugar in candy bar, 311
 sugar in recipe, 182, 228, 354, 778
 sunflower serving weights, 463
 thermometer use in recipe, 483
 tortillas made per minute, 779
 tuna (canned) calories, 84
 turkey price per pound, 296
 unit prices for food items, 334–335
 vitamin A content in cherries, 375

Geography/geology

age of Yellowstone National Park, 83
 alternative energy, 382
 aluminum prices, 160
 Black Canyon depth/width, 452
 Colorado area calculations, 54
 common city names in U.S., 83
 countries with small land areas, 326
 creek sediment, 452
 dam heights, 36, 610
 dams by continent, 608
 Deep Space Network antenna, 478
 Deep Space Network overhead view, 514
 deep-sea diving depths, 655, 656, 665, 683, 695, 699
 depths below Earth’s surface, 694
 desert grassland spots, 544
 elevation changes, 699
 elevation differences, 673, 696, 699
 freshwater from ice sheets, 374
 government land management, 608
 Grand Canyon depth/width, 452
 highest point in selected states, 14
 highest/lowest elevations, 655, 667, 670

lake elevations, 657, 673, 695, 699
 land area of Belize, 13
 land area of continents, 606
 Meteor Crater, Arizona, distance around, 533
 Mississippi River Basin drainage, 35
 Monk's Mound angles, 515
 mountain heights, 15, 25, 36, 46, 73, 304, 327, 655, 675, 694
 national monuments, 138
 national parks, 136, 140, 202, 223, 282
 ocean measurements/depths, 201, 452, 608, 655, 667, 675, 699
 pond ice thickness, 452
 river lengths, 77–78, 245, 621
 silver mine depths, 655
 states adjacent to other states, 142
 surface areas of continents, 183
 temperature of Earth's core, 483
 tornadoes for a single day in U.S., 334
 uranium production in Canada, 383
 U.S. boundary calculations, 84
 Utah area calculations, 543
 volume of volcano, 551
 water pumped per minutes, 469
 wildfires in U.S., 596–597, 728
 Wyoming area calculations, 54

Geometry

angle measurements, 575–576, 580, 583, 701, 763, 795
 area of circle, 538–539, 702, 714
 area of geometric figures, 76, 231, 232, 244, 534–535, 537–540, 543, 578, 580, 715, 731, 761
 area of parallelogram, 702
 area of rectangle, 54, 57, 58, 82, 86, 104, 105, 110, 152, 167, 168, 171, 173, 284, 305, 438, 480, 495, 502, 706, 715, 756, 761, 794
 area of square, 86, 91, 94, 106, 110, 318, 715, 731
 area of triangle, 302, 305, 313, 317, 764
 Chichen Itza Pyramid angles, 515
 circle measurements, 240
 circumference of circle, 280, 283, 285, 312, 317, 529, 532, 533, 534, 542
 congruent triangles, 556
 diameter of circle, 151, 576, 583, 763
 diameter of sphere, 524, 583
 Fahrenheit/Celsius temperature conversion, 503
 inner diameter measurements, 201
 inner diameter of circle, 230
 Khafre's Pyramid angles, 515
 magic squares, 691
 outer diameter of circle, 230
 partial lengths and widths, 201
 perimeter of geometric figures, 20, 24–25, 76, 95, 102, 172, 181, 200, 214, 231, 232, 238, 245, 484, 525–528, 530–532, 535, 542–543, 544, 553, 577, 580, 713, 763
 perimeter of parallelogram, 200, 690
 perimeter of pentagon, 426, 484
 perimeter of quadrilateral, 200
 perimeter of rectangle, 25, 27, 47, 57, 82, 110, 160, 178, 181, 200, 231, 237, 238, 240, 244, 426, 438, 484, 525, 586, 690, 794
 perimeter of square, 27, 94, 110, 161, 178, 181, 231, 272, 312, 318, 426, 484, 526, 584, 690, 701, 710, 731, 756
 perimeter of triangle, 20, 47, 181, 200, 238, 272, 312, 426, 484, 526–527, 690, 710, 714
 radius of circle, 151, 576
 radius of sphere, 524
 ratio calculations, 324, 326–328, 337, 362, 363, 586, 763, 794
 side lengths of geometric figures, 240, 298
 unknown lengths, 225–226, 558, 567, 581
 Vietnam Veterans Memorial wall angles, 515
 volume conversion, 795
 volume of ball, 546–547, 702
 volume of birdbath, 550
 volume of block of ice, 550

volume of box, 224–225, 230, 480, 546, 550, 581, 702, 714
 volume of circular cylinder, 547–548, 550, 552, 578
 volume of cone, 548, 550
 volume of cube, 551, 755
 volume of ice chest, 550
 volume of snow globe, 551
 volume of solid figures, 549–550, 552, 577, 578, 581, 584
 volume of sphere, 550
 volume of square-based pyramid, 548, 550, 551, 553
 volume of waffle ice cream cone, 551
 volume of watch, 230
 volume of wooden crate, 755

Home improvement

area of wall, 541
 baseboard around room, 584
 board length measurements, 185, 197, 213, 230, 241, 244, 444, 453
 bookcase shelving, 231
 bricks needed for building, 542
 carpet needed for room, 543, 578
 cleaning solution ingredients, 230
 copper tubing requirements, 231
 deck post depth to be buried, 151
 deck railing measurements, 274
 doorway height, 284
 driveway sealant needed, 578
 dust and dirt trapped by lawns, 333
 fencing requirements, 25, 237, 526, 531
 fertilizer needed, 280, 292, 296, 314, 348–349, 351, 503
 floor tiles needed, 453
 garden length, 80–81
 garden wall/border measurement, 228, 274
 gas/oil ratio for equipment, 354
 grass seed needed, 542
 gutter measurements and costs, 25, 532
 house cleaning, 238
 insecticide needed for lawn, 317, 584
 insulation for attic floor, 541
 irrigation device circumference, 529
 land dimensions, 560
 lawn dimensions, 762
 metal strip around workbench, 531
 paint costs, 110, 795
 paint needed for walls, 292, 295, 348
 perimeter of room, 527–528
 perimeter of square tabletop, 526
 pesticide coverage of garden, 361
 pipe length, 230
 room perimeter, 714
 screw depth, 150
 sheetrock stacks, 231
 shelf paper measurements, 238
 shingles needed for trapezoid-shaped roof, 542
 sidewalk measurements, 151, 196, 557
 spa circumference, 529
 triangular deck, 570
 unit rate of bricks laid, 334
 volume of 3 drawers in chest, 579
 volume of air in room, 581
 wallpaper border/strip costs, 528, 532

Medicine/health

allergy shot reaction times, 69
 area of human pupil, 544
 aspirin usage, 183, 374
 blood cholesterol levels, 36
 blood type calculations, 139–140, 304, 327, 376, 642
 body surface area calculations, 479
 body temperature conversion, 482, 483, 501, 701
 bone components, 376
 cases of preventable diseases, 43
 crutch adjustments, 213
 drug testing results, 628
 drug/medicine dosage calculations, 160, 296, 347–348, 354, 355, 469, 480, 647

eyeglass cost, 272
 fluid intake measurements, 26
 height measurements for adults, 269, 284, 452, 480, 643, 796
 height measurements for children, 448, 478
 home health aide earnings, 83
 hospital beds per population, 778
 human index finger length, 353
 human organ weights, 476, 478
 ibuprofen tablet weights, 477
 medication amounts for purchase, 479
 medications per emergency room visit, 354
 muscles used to smile and frown, 84
 nurse shortages, 749
 nurses employed in U.S., 412
 occupational therapy assistants employed, 408
 organ transplant patients in U.S., 13
 pulse rates, 620
 rehabilitation using treadmill, 160
 skin weight, 478
 sneeze speed, 478
 sodium recommendation per week, 86
 Sudafed strength measurements, 463
 veterinarians in private practice, 408
 vitamin C tablet weights, 477
 waist measurement, 151
 weight measurements for adults, 463, 480
 weight measurements for children, 457
 wrist measurement, 151

Miscellaneous

antenna height, 560
 apartments in building calculations, 58
 area covered by house on lot, 80
 area of concrete block, 541
 area of double roll of wallpaper, 541
 area of page in book, 541
 area of table mat, 541
 area of watch face, 541
 art dealer inventory, 121
 bar soap unit price, 331
 books in stack, 231
 boxes for books used, 295
 boxes of crayons used, 296
 building heights, 564, 568, 579
 card suit choosing outcomes, 629
 cement weight per bag, 460
 charity fund drive collections, 432
 choosing colored marbles from a bag, 121
 choosing numbers from a bag, 645
 circular rug area, 714
 city block diagonal length, 560
 clothing design material requirements, 157
 coal delivery amounts, 463
 coin production by U.S. Mint, 123
 coin production times, 233
 coin toss outcomes, 623, 624, 645, 648
 coins metal composition, 229, 382
 conducting surveys, 630
 consumer spending categories, 244
 crayon usage, 333
 Crazy Horse sculpture dimensions, 451
 die rolling outcomes, 623–624, 625, 629, 638, 702
 digital camera preferences, 585
 drinking glass packing calculations, 107
 elevator allowable weight per person, 460
 elevator speed, 352
 Empire State Building height, 354
 fabric material measurements, 229
 fabric on bolt of cloth, 494
 feet per rod, 73
 female/male meeting attendance, 327
 flagpole height, 453
 fountain height, 568
 fraction of days in March, 120
 framing material needed, 494
 frayed sash cord lengths, 453
 frequency distribution tables, 621, 636–637, 644
 fund-raiser collections, 641
 gift paper measurements, 238
 glass needed in picture frame, 541
 grain waste in American homes, 383

Miscellaneous (*continued*)

grocery scanning rate, 334
 Habitat for Humanity home cost, 333
 Heifer International locations, 123
 households with cell phones only, 374
 installation of gutters on building, 95
 Internet searches about restaurant foods, 375
 land measurements, 542, 560
 legal fireworks in states, 121
 letter choosing outcomes, 626
 mail volume, 46, 223
 mail weight, 241
 marble color choosing outcomes, 625, 628, 638, 639, 648
 material needed for drapery panels, 541
 material needed for scarves, 501, 795
 metal strip lengths, 157
 microwave oven ownership, 432
 mural measurements, 326
 Nobel Prize winners per country, 74
 number-then-vowel choosing outcomes, 626
 oil gallons in drum, 466, 500
 oil prices, 312
 pages remaining to read in book, 35
 paper money life expectancy, 229
 park dimensions, 570
 pay before taxes, 283
 paychecks received in one year, 85
 Pentagon's outer wall, 138
 piano practice times, 178, 213
 picture frame measurements, 714
 plastic pipe lengths, 213
 postage stamp size, 476, 478
 postal delivery routes, 354
 postal service revenue, 86
 postcard length, 453
 price comparisons, 110
 print area on page, 569
 proofreading pages, 102
 proportion calculations, 343–344, 360, 362
 public television licensees, 123
 PVC pipe needed for project, 167
 radio station formats, 306
 redwood log cutting lengths, 453
 ribbon lengths, 241
 room cleaning times, 213
 rope length measurements, 72, 444–445, 452
 scarf lengths, 238, 500
 seats in lecture hall, 58
 Seattle Space Needle height, 568
 shadow cast by flagpole, 569
 shadow cast by tree, 569
 shipping costs, 272
 shipping orders, 78–79
 shoe polish amounts, 496
 soil needed to fill hole, 584
 spinner outcomes, 626–627, 628, 637, 645
 stacked boxes depth, 452
 Statue of Liberty measurements, 213, 353, 452
 swimming pool measurements, 326
 tall buildings by region, 635
 tanning lotion applications, 352
 tea bags produced in one day, 60
 total cost of an order for DVDs, 55
 total land area, 105
 tower height, 584
 tree section lengths, 453
 types of books at library, 607
 typing speeds, 411
 UPS delivery fleet, 15
 UPS revenue from each package, 86
 UPS tracking requests per day, 14
 U.S. flag measurements, 232
 vacuum canister volume, 579
 Vietnam Veterans Memorial wall length, 501
 volume of paperweight, 550
 waste disposal budget, 379
 waste disposed per person each day, 621
 waste dumping charges, 432
 water bills, 260
 water in aquarium, 466
 wedding expenditures, 311
 weight conversions, 455–456
 window washing calculations, 61
 wireless-only households, 304
 words per book estimates, 55
 working parents' time spent caring for others, 223
 yards per mile, 73

Politics

electoral votes Florida vs. California, 747
 electoral votes Ohio vs. Alabama, 747
 presidents born in Ohio, 120
 presidents who were freemasons, 37
 registered voters in Delaware, 332
 rulers in Liechtenstein, 748
 rulers in Norway, 748
 votes cast per candidate, 758

Real estate

acreage for single-family homes, 226–227
 commission calculations, 382, 416, 419, 420, 586, 750
 fencing needed for lot, 528
 home loan interest, 425
 home prices, 410
 home value changes, 434
 house sale profits, 82
 land purchases, 240
 lots per acre, 229
 new home construction, 633
 rectangular vacant lot, 82
 seller's profit, 750
 selling price of house, 419

Recreation/entertainment

analog movie screens, 683
 Appalachian Trail mileage by state, 402
 best-selling albums in U.S., 598
 card game scores, 665, 666, 680
 favorite music types, 642
 Ferris wheel measurements, 284
 film ratings, 139, 142, 336
 films released in 3-D and 2-D, 327
 independent films released, 327
 kite stick lengths, 453
 LEGO bricks sales, 83
 lottery winnings, 72, 78, 82, 332, 333
 Monopoly money requirements, 83
 mountain bike sales, 750
 movie attendance, 150
 movie screen area, 714
 movie ticket costs, 105, 273
 museum attendance, 16, 84
 music industry revenue, 412
 Netflix revenue, 282
 opening day film income, 15
 permanent digital song downloads, 412
 play attendance increase, 406
 Radio Flyer Wagons introduced, 83
 recreational vehicle speeds, 477
 roller coaster rides, 263, 282
 roller coasters per amusement park, 147
 song download card sharing, 173
 song downloads for each person, 69
 streaming music revenue, 264
 television households, 254
 3-D movie screens, 408
 ticket prices and sales, 55, 59, 319, 412
 tickets sold per moviegoer, 333
 top-grossing concert tour, 333
 top-grossing movies, 264, 359
 triangular sail dimensions, 579, 762
 TV actors' incomes per show episode, 778, 779
 U.S. theater screens by type, 184
 virtual reality devices, 412
 Walt Disney World attendance, 84

Sports

artificial climbing wall height, 410
 artificial turf needed to cover football field, 171
 average baseball player's salary, 45, 107
 average football player's salary, 45

baseball caps sold, 138
 baseball field foul lines, 531
 baseball hits, 352
 baseball home run distance, 531
 baseball's Hank Aaron career RBIs, 26
 basketball baskets made/attempted, 350
 basketball court measurements/area, 326, 710, 714
 basketball free throws attempted/made, 166, 374, 700
 basketball points scored, 44, 61, 297, 749, 762
 Beach Soccer World Cup scores, 600–601
 birth dates of track stars, 27
 Boston Marathon participation, 36, 262
 car racing speeds, 264, 296
 distance across baseball diamond, 579
 female/male Marathon finishers, 328
 football field measurements, 557, 560
 football field perimeter, 531
 football passes completed/attempted, 361
 football points scored, 15, 297, 750
 football punt length, 263
 football touchdowns made, 73
 football yards lost/gained, 683, 722
 gold medals awarded at Summer Olympics, 138, 328, 408
 golf course distance between holes, 72
 golf scores, 600, 666, 680, 695
 golf shirt costs, 105
 group admission price, 410
 gymnast's balance beam width, 477
 gymnast's rings height from floor, 477
 highest paid Chicago Cubs, 333
 IndyCar track lengths, 255
 mainsail proportions, 327
 medals awarded during Summer Olympics, 634
 pole vault record, 230
 polo field measurements, 569
 race car speeds and gas mileage, 255, 272
 race runners, women vs. men, 762, 796
 races won by Porsche, 304
 skating rink area, 544
 ski slalom times, 262
 snowboarding trails, 409
 soccer field measurements, 534, 544, 560
 sport preferences, 374, 602
 stadium capacity, 749
 team genders, 121
 tennis practice schedule, 213
 trampoline netting needed, 532
 volume of Zorb sphere, 551
 weight resistance for Total Gym, 408
 women's running speed per second, 296
 workout times, 182
 World Series wins, 336, 750

Temperature/weather

average temperatures, 73, 272, 412, 672
 Barrow, Alaska, average/normal monthly temperatures, 687, 690
 Fahrenheit/Celsius temperature conversion, 481–482, 483, 497, 701, 714
 high temperatures for New Orleans, 635
 high/low temperatures for Annapolis, MD, 611
 hurricanes making landfall in U.S., 597
 rainfall calculations, 160, 168, 213, 255, 272, 636, 641–642, 779
 record high and low temperatures, 651, 655, 667, 673, 676
 snowfall measurements, 238, 273
 temperature changes over time, 663, 666, 673, 695, 696
 temperature highs and lows, 36, 85, 601
 tornado occurrences, 152
 tornado wind speeds, 632
 tropical storms that became hurricanes, 120
 wind speeds, 272, 298

Time/distance

conversions of distance, 120, 138, 167, 284, 296, 312, 313, 501, 701

conversions of time, 82, 120
 distance between cities, 25, 36, 46, 102, 287, 312,
 317, 351, 478, 744–745, 748
 distance between wall and buildings, 453
 distance calculations, 179
 distance estimation on maps and
 blueprints, 42, 46, 346–347, 351, 361, 365,
 439, 647
 distance needed to balance boards, 355
 distance needed to lift weight on board, 355
 distance traveled on trip, 46
 hiking/walking distance, 150, 168
 jogging/running distance, 179, 182, 185
 miles traveled in selected number of hours,
 776–777, 779
 odometer readings, 35

Transportation

airline passenger average cost per mile, 283
 bridge caisson measurements, 284
 bridge lengths, 76, 83, 254, 500
 bridges per highway miles, 72
 cell phone use while driving, 328
 cinders purchased for roadway, 495
 distance driven by each driver, 495
 driving speed at selected hours driven, 729
 driving times at selected speeds, 729
 English Channel Tunnel length, 254
 Ford car and truck sales, 412
 gas tank measurements, 471
 gasoline cost/prices, 259, 272, 274, 439
 gasoline prices, 472
 highway mileage in selected states, 28
 highway soundproof walls, 366, 452
 highway speed limits, 183, 477

lane divider placement, 72
 leisure travel in U.S., 375
 licensed drivers, 404
 light pole placement, 72
 mileage categories, 152
 miles driven by adults per week, 296, 599
 miles driven on trip, 35, 46
 miles driven per amount of gasoline, 335
 overweight luggage sizes, 212
 parking lot dimensions, 82
 parking sign dimensions, 336
 pontoon bridges, 214
 railroad track gauge, 229
 railroad track inspection, 182
 registered vehicles in U.S., 103
 road congestion causes, 183
 road sign costs, 570
 speed after braking, 569
 stop sign perimeter, 531
 time to drive certain number of miles, 365
 vessels passing through Panama Canal, 282
 weight of truck load, 196

World records

deepest bat colony, 651
 deepest hole drilled in Earth's crust, 675
 driest city, 273
 fastest computer, 16
 first bipedal robot, 364
 heaviest baby, 463
 heaviest zucchini, 463
 highest freestanding tower, 14
 highest recorded temperature, 740
 highest temperature produced in lab, 484
 highest town, 14

hot dogs eaten per minute, 334
 hottest temperature recorded, 501
 largest cities, 597
 largest commercial building, 20, 59
 largest free-floating soap bubble, 551
 largest hotel lobby, 59
 largest ice cream sundae, 501
 largest illuminated indoor advertising
 sign, 541
 largest Monopoly board, 27
 largest pearl, 533
 largest permanent maze, 37
 largest pizza, 541
 largest pontoon bridge, 214
 largest round barn, 532
 largest suitcase, 233
 largest suspension bridge, 284
 largest university enrollment, 748
 largest U.S. flag, 541
 largest yacht, 364
 longest bridge in New York, 83
 longest stairway, 335
 longest truck, 453
 lowest recorded temperature, 740
 shortest man, 452
 slowest mammal, 200
 smallest baby, 463
 smallest cathedral, 553
 smallest jigsaw puzzle, 27
 snowiest city, 273
 tallest buildings, 13, 77, 619
 tallest man, 452
 tallest roller coaster, 263
 tallest tree, 568
 tallest waterfall, 26

The Whole Numbers

A Selection of Resources for Success in This Mathematics Course

Elayn Martin-Gay

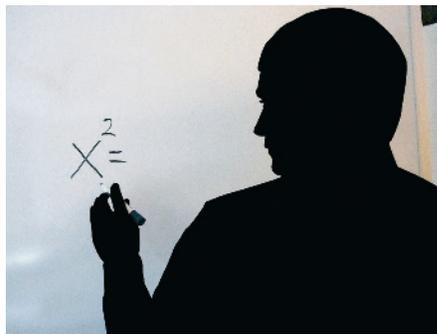

Basic College Mathematics

Sixth Edition

Textbook

Instructor

MyLab Math and MathXL

Video Organizer

Interactive Lecture Series

For more information about the resources illustrated above, read Section 1.1.

1

Whole numbers are the basic building blocks of mathematics. The whole numbers answer the question “How many?”

This chapter covers basic operations on whole numbers. Knowledge of these operations provides a good foundation on which to build further mathematical skills.

Sections

- 1.1 Study Skill Tips for Success in Mathematics
- 1.2 Place Value, Names for Numbers, and Reading Tables
- 1.3 Adding Whole Numbers and Perimeter
- 1.4 Subtracting Whole Numbers
- 1.5 Rounding and Estimating
- 1.6 Multiplying Whole Numbers and Area
- 1.7 Dividing Whole Numbers
- Integrated Review**—Operations on Whole Numbers
- 1.8 An Introduction to Problem Solving
- 1.9 Exponents, Square Roots, and Order of Operations

- Chapter Highlights
- Chapter Review
- Getting Ready for the Test
- Chapter Test

1.1 Study Skill Tips for Success in Mathematics

Objectives

- A** Get Ready for This Course.
- B** Understand Some General Tips for Success.
- C** Know How to Use This Text.
- D** Know How to Use Text Resources.
- E** Get Help as Soon as You Need It.
- F** Learn How to Prepare for and Take an Exam.
- G** Develop Good Time Management.

Before reading this section, ask yourself a few questions.

1. Were you satisfied—really satisfied—with your performance in your last math course? In other words, do you feel that your outcome represented your best effort?
2. When you took your last math course, were your notes and materials from that course organized and easy to find, or were they disorganized and hard to find—if you saved them at all?

If the answer is “no” to these questions, then it is time to make a change. To begin, continue reading this section.

Objective A Let's Get Ready for This Course

1. *Start With a Positive Attitude.* 😊

Now that you have decided to take this course, remember that a *positive attitude* will make all the difference in the world. Your belief that you can succeed is just as important as your commitment to this course. Make sure you are ready for this course by having the time and positive attitude that it takes to succeed.

2. *Understand How Your Course Material Is Presented—Lecture by Instructor, Online With Computer, or Both?*

Make sure that you are familiar with the way that this course is being taught. Is it a traditional course, in which you have a printed textbook and meet with an instructor? Is it taught totally online, and your textbook is electronic and you e-mail your instructor? Or is your course structured somewhere in between these two methods? (Not all of the tips that follow will apply to all forms of instruction.)

3. *Schedule Your Class So That It Does Not Interfere With Other Commitments.*

Make sure that you have scheduled your math course for a time that will give you the best chance for success. For example, if you are also working, you may want to check with your employer to make sure that your work hours will not conflict with your course schedule.

Objective B Here are a Few General Tips for Success

Below are some general tips that will increase your chance for success in a mathematics class. Many of these tips will also help you in other courses you may be taking.

1. *Most Important! Organize Your Class Materials. Unless Told Otherwise, Use a 3-Ring Binder Solely for Your Mathematics Class.*

In the next couple pages, many ideas will be presented to help you organize your class materials—notes, any handouts, completed homework, previous tests, etc. In general, you **MUST** have these materials organized. All of them will be valuable references throughout your course and when studying for upcoming tests and the final exam. One way to make sure you can locate these materials when you need them is to use a three-ring binder. This binder should be used solely for your mathematics class and should be brought to each and every class or lab. This way, any material can be immediately inserted in a section of this binder and will be there when you need it.

2. *Choose to attend all class periods.*

If possible, sit near the front of the classroom. This way, you will see and hear the presentation better. It may also be easier for you to participate in classroom activities.

Helpful Hint

MyLab Math and MathXL
When assignments are turned in online, keep a hard copy of your complete written work. You will need to refer to your written work to be able to ask questions and to study for tests later.

3. Complete Your Homework. This Means: Attempt All of It, Check All of It, Correct Any Mistakes, and Ask for Help if Needed.

You've probably heard the phrase "practice makes perfect" in relation to music and sports. It also applies to mathematics. You will find that the more time you spend solving mathematics exercises, the easier the process becomes. Be sure to schedule enough time to complete your assignments before the due date assigned by your instructor.

Review the steps you took while working a problem. Learn to check your answers in the original exercises. You may also compare your answers with the "Answers to Selected Exercises" section in the back of the book. If you have made a mistake, try to figure out what went wrong. Then correct your mistake. If you can't find what went wrong, **don't** erase your work or throw it away. Show your work to your instructor, a tutor in a math lab, or a classmate. It is easier for someone to find where you had trouble if he or she looks at your original work.

It's all right to ask for help. In fact, it's a good idea to ask for help whenever there is something that you don't understand. Make sure you know when your instructor has office hours and how to find his or her office. Find out whether math tutoring services are available on your campus. Check on the hours, location, and requirements of the tutoring service.

4. Learn from your mistakes and be patient with yourself.

Everyone, even your instructor, makes mistakes. (That definitely includes me—Elayn Martin-Gay.) Use your errors to learn and to become a better math student. The key is finding and understanding your errors.

Was your mistake a careless one, or did you make it because you can't read your own math writing? If so, try to work more slowly or write more neatly and make a conscious effort to carefully check your work.

Did you make a mistake because you don't understand a concept? Take the time to review the concept or ask questions to better understand it.

Did you skip too many steps? Skipping steps or trying to do too many steps mentally may lead to preventable mistakes.

5. Turn in assignments on time.

This way, you can be sure that you will not lose points for being late. Show every step of a problem and be neat and organized. Also be sure that you understand which problems are assigned for homework. If allowed, you can always double-check the assignment with another student in your class.

Objective C Knowing and Using Your Text or e-Text

Flip through the pages of this text or view the e-text pages on a computer screen. Start noticing examples, exercise sets, end-of-chapter material, and so on. Learn the way this text is organized by finding an example in your text of each type of resource listed below. Finding and using these resources throughout your course will increase your chance of success.

- **Practice Exercises.** Each example in every section has a parallel Practice exercise. Work each Practice exercise after you've finished the corresponding example. Answers are at the bottom of the page. This "learn-by-doing" approach will help you grasp ideas before you move on to other concepts.
- **Objectives.** Every section of this text is divided into objectives, such as **A** or **B**. They are listed at the beginning of the section and noted in that section. The main section of exercises in each exercise set is also referenced by an objective, such as **A** or **B**, and also an example(s). There is also often a section of exercises entitled "Mixed Practice," which is referenced by two or more objectives or sections. These are mixed exercises written to prepare you for your next exam. Use all of this referencing if you have trouble completing an assignment from the exercise set.

Helpful Hint

MyLab Math and MathXL

If you are doing your homework online, you can work and re-work those exercises that you struggle with until you master them. Try working through all the assigned exercises twice before the due date.

Helpful Hint

MyLab Math and MathXL

If you are completing your homework online, it's important to work each exercise on paper before submitting the answer. That way, you can check your work and follow your steps to find and correct any mistakes.

Helpful Hint

MyLab Math and MathXL

Be aware of assignments and due dates set by your instructor. Don't wait until the last minute to submit work online.

- **Icons (Symbols).** Make sure that you understand the meaning of the icons that are beside many exercises.  tells you that the corresponding exercise may be viewed on the video Lecture Series that corresponds to that section.  tells you that this exercise is a writing exercise in which you should answer in complete sentences.  tells you that the exercise involves geometry.
- **Integrated Reviews.** Found in the middle of each chapter, these reviews offer you a chance to practice—in one place—the many concepts that you have learned separately over several sections.
- **End-of-Chapter Opportunities.** There are many opportunities at the end of each chapter to help you understand the concepts of the chapter.

Vocabulary Checks contain key vocabulary terms introduced in the chapter.

Chapter Highlights contain chapter summaries and examples.

Chapter Reviews contain review problems. The first part is organized section by section and the second part contains a set of mixed exercises.

Getting Ready for the Tests are multiple choice or matching exercises designed to check your knowledge of chapter concepts, before you attempt the chapter test. Video solutions are available for all these exercises.

Chapter Tests are sample tests to help you prepare for an exam. The Chapter Test Prep Videos found in MyLab Math and YouTube provide the video solution to each question on each Chapter Test.

Cumulative Reviews start at Chapter 2 and are reviews consisting of material from the beginning of the book to the end of that particular chapter.

- **Student Resources in Your Textbook.** You will find a **Student Resources** section at the back of this textbook. It contains the following to help you study and prepare for tests:

Study Skill Builders contain study skills advice. To increase your chance for success in the course, read these study tips, and answer the questions.

Bigger Picture—Study Guide Outline provides you with a study guide outline of the course, with examples.

Practice Final provides you with a Practice Final Exam to help you prepare for a final.

- **Resources to Check Your Work.** The **Answers to Selected Exercises** section provides answers to all odd-numbered section exercises and to all integrated review, chapter review, getting ready for the test, chapter test, and cumulative review exercises. Use the **Solutions to Selected Exercises** to see the worked-out solution to every other odd-numbered exercise in the section exercises and chapter tests.

Helpful Hint

MyLab Math

In MyLab Math, you have access to the following video resources:

- Lecture Videos for each section
- Getting Ready for the Test Videos
- Chapter Test Prep Videos
- Final Exam Videos

Use these videos provided by the author to prepare for class, review, and study for tests.

Objective D Knowing and Using Video and Notebook Organizer Resources

Video Resources

Below is a list of video resources that are all made by me—the author of your text, Elayn Martin-Gay. By making these videos, I can be sure that the methods presented are consistent with those in the text. All video resources may be found in MyLab Math and some also on YouTube.

- **Interactive Video Lecture Series.** Exercises marked with a  are fully worked out by the author. The lecture series provides approximately 20 minutes of instruction per section and is organized by Objective.
- **Getting Ready for the Test Videos.** These videos provide solutions to all of the Getting Ready for the Test exercises.

- **Chapter Test Prep Videos.** These videos provide solutions to all of the Chapter Test exercises worked out by the author. They can be found in MyLab Math and YouTube. This supplement is very helpful before a test or exam.
- **Tips for Success in Mathematics.** These video segments are about 3 minutes long and are daily reminders to help you continue practicing and maintaining good organizational and study habits.
- **Final Exam Videos.** These video segments provide solutions to each question.

Video Organizer

This organizer is in three-ring notebook ready form. It is to be inserted in a three-ring binder and completed. This organizer is numbered according to the sections in your text to which it refers.

It is closely tied to the Interactive (Video) Lecture Series. Each section should be completed while watching the lecture video on the same section. Once completed, you will have a set of notes to accompany the (Video) Lecture Series section by section.

Objective E Getting Help

If you have trouble completing assignments or understanding the mathematics, get help as soon as you need it! This tip is presented as an objective on its own because it is so important. In mathematics, usually the material presented in one section builds on your understanding of the previous section. This means that if you don't understand the concepts covered during a class period, there is a good chance that you will not understand the concepts covered during the next class period. If this happens to you, get help as soon as you can.

Where can you get help? Try your instructor, a tutoring center, or a math lab, or you may want to form a study group with fellow classmates. If you do decide to see your instructor or go to a tutoring center, make sure that you have a neat notebook and are ready with your questions.

Objective F Preparing for and Taking an Exam

Make sure that you allow yourself plenty of time to prepare for a test. If you think that you are a little “math anxious,” it may be that you are not preparing for a test in a way that will ensure success. The way that you prepare for a test in mathematics is important. To prepare for a test:

1. Review your previous homework assignments.
2. Review any notes from class and section-level quizzes you have taken. (If this is a final exam, also review chapter tests you have taken.)
3. Review concepts and definitions by reading the Chapter Highlights at the end of each chapter.
4. Practice working out exercises by completing the Chapter Review found at the end of each chapter. (If this is a final exam, go through a Cumulative Review. There is one found at the end of each chapter except Chapter 1. Choose the review found at the end of the latest chapter that you have covered in your course.) *Don't stop here!*
5. Take the Chapter Getting Ready for the Test. All answers to these exercises are available to you as well as video solutions.
6. Take a sample test with no notes, etc, available for help. It is important that you place yourself in conditions similar to test conditions to find out how you

Helpful Hint

MyLab Math and MathXL

- Use the **Help Me Solve This** button to get step-by-step help for the exercise you are working. You will need to work an additional exercise of the same type before you can get credit for having worked it correctly.
- Use the **Video** button to view a video clip of the author working a similar exercise.

Helpful Hint

MyLab Math and MathXL

Review your written work for previous assignments. Then, go back and re-work previous assignments. Open a previous assignment, and click **Similar Exercise** to generate new exercises. Re-work the exercises until you fully understand them and can work them without help features.

will perform. There is a Chapter Test available at the end of each chapter, or you can work selected problems from the Chapter Review. Your instructor may also provide you with a review sheet. Then check your sample test. If your sample test is the Chapter Test in the text, don't forget that the video solutions are in MyLab Math and YouTube.

7. On the day of the test, allow yourself plenty of time to arrive at where you will be taking your exam.

When taking your test:

1. Read the directions on the test carefully.
2. Read each problem carefully as you take the test. Make sure that you answer the question asked.
3. Watch your time and pace yourself so that you can attempt each problem on your test.
4. If you have time, check your work and answers.
5. Do not turn your test in early. If you have extra time, spend it double-checking your work.

Objective G Managing Your Time

As a college student, you know the demands that classes, homework, work, and family place on your time. Some days you probably wonder how you'll ever get everything done. One key to managing your time is developing a schedule. Here are some hints for making a schedule:

1. Make a list of all of your weekly commitments for the term. Include classes, work, regular meetings, extracurricular activities, etc. You may also find it helpful to list such things as laundry, regular workouts, grocery shopping, etc.
2. Next, estimate the time needed for each item on the list. Also make a note of how often you will need to do each item. Don't forget to include time estimates for the reading, studying, and homework you do outside of your classes. You may want to ask your instructor for help estimating the time needed.
3. In the exercise set that follows, you are asked to block out a typical week on the schedule grid given. Start with items with fixed time slots like classes and work.
4. Next, include the items on your list with flexible time slots. Think carefully about how best to schedule items such as study time.
5. Don't fill up every time slot on the schedule. Remember that you need to allow time for eating, sleeping, and relaxing! You should also allow a little extra time in case some items take longer than planned.
6. If you find that your weekly schedule is too full for you to handle, you may need to make some changes in your workload, classload, or other areas of your life. You may want to talk to your advisor, manager or supervisor at work, or someone in your college's academic counseling center for help with such decisions.

1.1 Exercise Set MyLab Math

1. What is your instructor's name?
2. What are your instructor's office location and office hours?
3. What is the best way to contact your instructor?
4. Do you have the name and contact information of at least one other student in class?
5. Will your instructor allow you to use a calculator in this class?
6. Why is it important that you write step-by-step solutions to homework exercises and keep a hard copy of all work submitted?
7. Is there a tutoring service available on campus? If so, what are its hours? What services are available?
8. Have you attempted this course before? If so, write down ways that you might improve your chances of success during this attempt.
9. List some steps that you can take if you begin having trouble understanding the material or completing an assignment. If you are completing your homework in MyLab Math and MathXL, list the resources you can use for help.
10. How many hours of studying does your instructor advise for each hour of instruction?
11. What does the  icon in this text mean?
12. What does the  icon in this text mean?
13. What does the  icon in this text mean?
14. Search the minor columns in your text. What are Practice exercises?
15. When might be the best time to work a Practice exercise?
16. Where are the answers to Practice exercises?
17. What answers are contained in this text and where are they?
18. What are Tips for Success in Mathematics and where are they located?
19. What and where are Integrated Reviews?
20. How many times is it suggested that you work through the homework exercises in MyLab Math or MathXL before the submission deadline?
21. How far in advance of the assigned due date is it suggested that homework be submitted online? Why?
22. Chapter Highlights are found at the end of each chapter. Find the Chapter 1 Highlights and explain how you might use it and how it might be helpful.
23. Chapter Reviews are found at the end of each chapter. Find the Chapter 1 Review and explain how you might use it and how it might be helpful.
24. Chapter Tests are found at the end of each chapter. Find the Chapter 1 Test and explain how you might use it and how it might be helpful when preparing for an exam on Chapter 1. Include how the Chapter Test Prep Videos may help. If you are working in MyLab Math and MathXL, how can you use previous homework assignments to study?
25. What is the Video Organizer? Explain the contents and how it might be used.
26. Read or reread objective  and fill out the schedule grid on the next page.

1.2 Place Value, Names for Numbers, and Reading Tables

Objectives

- A** Find the Place Value of a Digit in a Whole Number. 
- B** Write a Whole Number in Words and in Standard Form. 
- C** Write a Whole Number in Expanded Form. 
- D** Read Tables. 

The **digits** 0, 1, 2, 3, 4, 5, 6, 7, 8, and 9 can be used to write numbers. For example, the **whole numbers** are

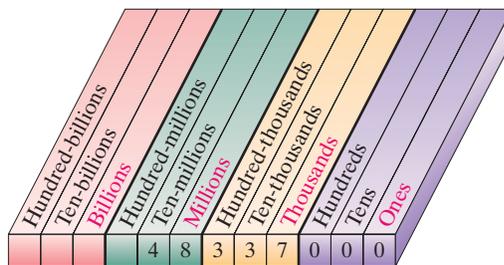

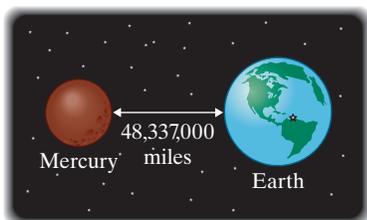

0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, . . .

and the **natural numbers** are 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, . . .

The three dots (. . .) after each 11 means that these lists continue indefinitely. That is, there is no largest whole number. The smallest whole number is 0. Also, there is no largest natural number. The smallest natural number is 1.

Objective **A** Finding the Place Value of a Digit in a Whole Number

The position of each digit in a number determines its **place value**. For example, the distance (in miles) between the planet Mercury and the planet Earth can be represented by the whole number 48,337,000. Next is a place-value chart for this whole number.

The two 3s in 48,337,000 represent different amounts because of their different placements. The place value of the 3 on the left is hundred-thousands. The place value of the 3 on the right is ten-thousands.

Examples

Find the place value of the digit 3 in each whole number.

1. 396,418

↑
hundred-thousands

2. 93,192

↑
thousands

3. 534,275,866

↑
ten-millions

Work Practice 1–3

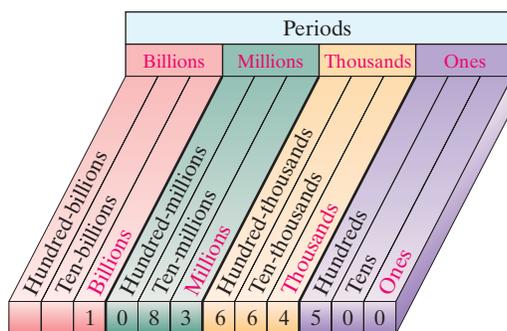

Practice 1–3

Find the place value of the digit 8 in each whole number.

- 38,760,005
- 67,890
- 481,922

Objective B Writing a Whole Number in Words and in Standard Form

A whole number such as 1,083,664,500 is written in **standard form**. Notice that commas separate the digits into groups of three, starting from the right. Each group of three digits is called a **period**. The names of the first four periods are shown in red.

Writing a Whole Number in Words

To write a whole number in words, write the number in each period followed by the name of the period. (The ones period is usually not written.) This same procedure can be used to read a whole number.

For example, we write 1,083,664,500 as

one **billion**,
eighty-three **million**,
six hundred sixty-four **thousand**,
five hundred

Helpful Hint

Notice the **commas** after the name of each period.

Answers

- millions
- hundreds
- ten-thousands
