

Solution 1.44

What is the weighted average cost of capital for a corporation that finances an expansion project using 40% retained earnings and 60% venture capital? Assume the interest rates are 10% for equity financing and 16% for debt financing.

Solution:

$$\text{WACC} = 0.40(10\%) + 0.60(16\%) = 13.60\%$$
